

# Booters have few worries

continued from page 2

not, this will be the team's weak link. "The halfbacks are the most undecided in my mind," Schmidt said. "We have some freshman that we've just begun to work with." There are plenty of names vying for any vacancies. Emil Kopilovich, Randy Garber, Scott Matlack, and Mike Bojeun are all possibilities.

**WINGS** — Sophomore Marsden should have one wing position tied down. The other wing is less certain with Jimmy Startzell leading the other contenders, which include Al Vitiello and Ciro Baldino.

**INSIDE** — Obviously the BIG question on Schmidt's mind as the October 3rd opener nears. Everyone and his mother will be considered, but Bahr and Kehan seem the likely choice.

Chris Bahr and Tom Kehan

# Pioneer engineering puts living room sound in your car.

Only Pioneer is engineered to Go.

That's why you get the kind of sound and performance from Pioneer car stereo you'd expect from the finest home equipment.

Pioneer components are specially designed for road and car conditions, and each set

is stress-tested by shaking, jarring, heat, cold and moisture.

And what a sound! Give yourself the experience today.

How small can car stereo get?

Pioneers TP-222—only 4 3/4" x 2" x 6 1/2".

It's the first compact car stereo that fits under any dash, fits in any glove box, fits any budget—yet holds its own with the most expensive jobs.

The TP-222 boasts tone, volume and balance controls; auto and manual track change; track indicator lights. 7.6 watts R.M.S. to give you everything your tapes can deliver. Price? Down there where you like it.

Come in for a sell-yourself demonstration.

**PIONEER**  
Engineered to go.
