

Baiorunos still moving around

By MARK SIMENSON
Assistant Sports Editor

When Jack Baiorunos came to Penn State, he did as much moving around as Allied Van Lines. Now an experienced offensive lineman, he is still moving around—other people that is.

Spurning an offer from Harvard, the Lion center wanted to play big time football. He sifted through offers from Notre Dame, Purdue and Penn State before deciding on the Nittany Valley climate.

John Rosenberg, now an assistant coach at Villanova, recruited Baiorunos out of Boston College High. He didn't have much trouble selling Penn State to the three-sport athlete.

"I wanted to go to a few bowl games and go to Dental school," he said with his Boston accent.

As a freshman Baiorunos began to worry if he'd every wear a first team jersey. "I wondered if I would ever get to play," he recalled. "Maybe I

shouldn't have worried."

That was when he was a second string defensive tackle. His future there was limited because at 6-3, 225-pounds, he wasn't going to move too many mammoth linemen aside.

Baiorunos's odyssey then had stops at inside and outside linebacker. The following spring he bounced around from offensive tackle to guard and finally found a home at center. Each place Baiorunos added, "it didn't work out there."

He said he prefers being a center because he can block the linebackers, which are more his size. "I don't know where else I could play," he added.

Baiorunos is the lightweight on the heavyweight line that averages close to 6-4, 245 pounds. "I worried a lot about my weight," he said. "I went up to 230, but I felt sluggish. I'm better off at 225."

Baiorunos took over at center in the middle of last season when Rick Brown was injured. He has been

there ever since.

Baiorunos doesn't have the image as a dumb jock who lives in a frat. He has a 3.37 All-University cum as a science major and is president of his fraternity, Delta Upsilon.

"I think fraternities are coming back" he said. "The enrollment for DU nationally is up 20 per cent. Fraternities here have a strong system. Most of them have mansions as houses."

The anonymity of linemen is greatest for centers, but Baiorunos has been spared that fate. He is the subject of a sports feature in Boy's Life this month. Last year it was Gregg Pruitt.

"The man doing it had never done an offensive lineman and centers get the least recognition, so he decided to do it."

Baiorunos cautions the readers on the story. "You have to keep in mind that it was written for 7-8-9 year olds," he laughed.
