# 32-year-old Lion mark falls to Rea in I.C.4-As

Lion sprinter Mike Sands broke the 440 record twice

By RICK STARR  
Collegian Sports Editor

Thirty-two years ago Barney Ewell, wearing Penn State's colors, won the long jump event at the I.C.4-A Track and Field Championships. He soared 25 and a half feet and ever since 1942 the athletes have been jumping after that new record.

On Saturday, March 2, 1974, a long jumper from the University of Pittsburgh held himself aloft for the split fraction of a second that it took to finally beat Barney's jump, the longest standing record on the I.C.4-A's book.

Bill Rea was the leaper who came down 25 feet, 9 inches from the spot he took off. Surprisingly, Ewell's record was only the second obstacle Rea had to overcome that day — his team left him behind at its motel.

Barney's record was one of two that Penn State owned, and then lost at this year's I.C.4-A Track and Field Championships March 2-3 at Princeton.

Penn State finished 11th back in the team standings this year despite a furious pair of record breaking runs by Lion sprinter Mike Sands.

Sands squashed the old I.C.4-A mark in his 440

qualifier by ripping off a :48.4.

He then lowered his own record with a 48.2, but finished behind Seton Hall's Charles Joseph and West Virginia's Danny Buggs. Joseph was clocked at :47.7.

"I guess you could say I ran a stupid race," Sands said, reflecting on the final. "I was given the inside lane which gave me the steepest turns. I did the first 220 faster than I should have perhaps."

Lion fieldman Al Jackson heaved the 35-pound weight 59.9 in his finals, placing fifth, and Lions Fred Singleton and Mike Shine ran in the finals of the 60-yard high hurdles. Singleton placed third in 7.3 while Shine was sixth in 7.4.

In a championship that was decided in the last turn of the last race, Villanova won the I.C.4-A indoor title.

In the final leg of the last event, the mile relay, runner up Manhattan made a bid for the crown with its freshman Jim Nathaniel.

Halfway through the final 440, Nathaniel pulled almost even with Seton Hall's Howard Brock. To the standing cheers of the crowd of almost 5000, the two athletes raced for the tape, but Nathaniel fell slightly back, and his team,

Manhattan, stayed slightly behind Villanova in the final team standings.

On the merits of Brock's race, Seton Hall pulled into a tie with Manhattan for second, one point behind the Wildcats.

Villanova's champion was John Hartnett, who ran a sparkling double on the final afternoon.

His feat consisted of an 8:33.2 two-mile, followed 50 minutes later with a 4:00.8 anchor mile for the distance medley team. Villanova took both events.

Penn State also sent representatives to the NCAA Track and Field Championships in Detroit March 8-9.

Sands again captured third in the 440, this time coming in at 49.2.

Consistent weightman Jackson again placed in the finals, ending up seventh. His best throw in the finals was 62-3/4 feet.

I.C.4-A Team Point Totals

## Becoming a physician is a tremendous satisfaction. Let us give you the job satisfaction that should go with it.

Whether you're still in medical school with the rigors of three to five years of graduate medical education still to be faced, or are already a practicing physician, it's our opinion that the Air Force can offer both professional and personal satisfaction hard to duplicate in civilian life.

An overstatement? Not if you consider the specifics.

Take the problem of graduate medical education. It's a period of your life the Air Force can make considerably easier with comfortable salary and living conditions.

Create comforts aside, the Air Force offers professional advantages. Besides receiving training in your own specialty, you'd be in contact with physicians in all of the medical specialties. You'll function in an environment which is intellectually stimulating and professionally challenging.

Not all physicians pursue post residency fellowships. But if you are interested, the Air Force conducts them both in-house and at civilian institutions.

The physician already in practice can look forward to other things. If you want training in the practice of the medicine of the future, you'll find it in the Air Force. For example, there's emphasis on group medicine and preventive medicine, and the growing specialty of "family physician." Whatever your interest, there are few specialties which are not being practiced in today's Air Force.

The physician starting his practice in civilian life has to take into account the cost of setting up an office. The physician commencing his practice in the Air Force does not. He finds his office established for him. Supplies and equipment readily available. He has many options available to him when treating patients. For example, he can consult with Air Force specialists. He also has referral to other Air Force facilities via aeromedical evacuation. Last, but not least, are the satisfactions that come with having the opportunity for regular follow-up and a missed appointment rate that is practically 0.

Whether you are already a physician, or soon to become one, you might find it extremely interesting to find out what the Air Force has to offer. We think it could be a real eye-opener. If you'll mail in the coupon, we'd be happy to send you detailed information.
