THIS CALCULATOR BEATS SR-50 & HP-35

KingsPoint SC-40 full scientific calculator

The SC-40 — A truly Scientific Calculator that offers Algebraic mode entry with 2 parenthesis levels — a feature no other scientific calculator has.

That's only one of the features that makes the SC-40 a better calculator than the others.

COMPARISON

Functions and Features	Kingspoint SC-40	T.I. SR-50	Hew. Pack. HP-35
Scientific Notation (Exponent)	yes	yes	yes
Bracket and Parenthesis [()]	yes	no	. no
Log, Ln, Pi	yes	yes ·	yes
Trig (arc, sin, cos, tan)	yes	yes	yes
Degree/radian mode selection	yes	yes	no
x ^y , e ^x , square-root, 1/X	yes	yes	yes
X ² .	yes	yes	no
Exchange X with Y	yes	yes.	yes
Store, récall (memory)	yes	yes	yes
Summation to memory	no	yes	' no
Total number of keys	40	40	35
Rounding to ten digits	yes	yes	no
Data hold key	yes	no	no
Ready/busy indicator	yes	no	no

The SC-40 SCIENTIFIC CALCULATOR is especially designed for use by scientists, engineers, statisticians and those who require a pocket-size, reliable, precision computation instrument capable of transcendental function performance.

This unique, compact, and unusually complex system with a total of eight data registers is not only capable of performing almost all functions in various fields of technology, but also is extremely simple to operate since it employs the true algebraic notation entry method. The signs, numbers in full floating decimal point or scientific notation, function instructions, and even the brackets and parentheses are repeatedly entered exactly in the same sequence as the problems would be stated. This means that no reprograming of the problems is necessary prior to beginning operation.

The five-memory system of the SC-40 is powerful too. The two sub-memory resisters back up the bracket and parenthesis keys for automatic bracketing and parenthesizing sub-problems. The ten digit precision values of (pi) and (epsilon) are stored as fixed memories for instant recall. In addition, a separate memory register is provided for storing any data or constant at your option, for intermediate calculation result of ten digit mantissa and two digit exponent — for high efficiency in processing large amounts of data and problems, or for a rare complex problem. Yet, this extraordinary system consumes very little energy. The special built-in computer-controlled energy saving system controls and allocates power according to the minimum energy demand by the SC-40, depending on each phase of operation.

Bus crash kills children

ROCKMART, Ga. (AP) - Seven children were killed and 68 injured vesterday when a work train backed into a crowded school bus and dragged it hundreds of feet before coming to a stop with the caboose resting on top of the crushed bus.

"I looked up. I saw the train coming, then I heard a thump when it \underline{hit} and everybody started rolling over. Everybody was screaming and crying," said Bobby Bannister Jr., 15, one of the youngsters on the bus. He was not seriously hurt.

A total of 78 children, ranging in age between 10 and 15, were on the bus. Only three escaped injury.

The bus is built to carry 66 passengers, but Georgia law allows a 20 per cent overload. One of the injured children was listed in critical condition and another in guarded condition. All but five of the rest were treated for cuts and bruises and released, hospital

Don Tate, administrator of the Rockmart-Aragon Hospital, said earlier that about two dozen children had been hurt, but that more children were brought in later in the af-

ternoon with minor injuries. "These children had crawled out from the windows of the bus and went to a nearby store, telephoned their parents and went home," Tate said.

The 11-car train was in the area clearing up an earlier derailment along the Southern Railway tracks when it backed through the crossing. There were warning signs but no flashing signals

Darrell Smith, who works at a general store near the rural crossing in northwest Georgia, said the bus stopped for the crossing, then "started on across. The train was backing up. It seemed like it speeded up and hit the bus." State Trooper Charles Sanders said a brakeman was in the caboose as the train backed south at the crossing but he did not see the bus.

Bike-a-thon to help kids

Alpha Kappa Lambda Greensburg. fraternity will sponsor its fourth annual bike-a-thon this weekend for Children's Hospital in Pittsburgh.

Project co-ordinator Jim will bicycle from State College to Pittsburgh, making stops at Altoona, Johnstown and

Schaeffer said members of fraternity and sorority will Alpha Kappa Lambda frater-followin cars and a U-Haul. nity and Alpha-Sigma Alpha sorority will be collecting for Children's Hospital this week Schaeffer said 12 to 15 riders on the ground floor of the HUB

and at the foot of the mall.

Schaeffer said cars will ride

ahead, collecting money in towns before the cyclists

He said the most money • Schaeffer said the cyclists collected on any previous will ride four-man shifts. He bike-a-thon was \$2,600.
