**5 THINGS EVERYONE SHOULD KNOW ABOUT CREATIVE INTELLIGENCE**

- Creative intelligence is that impelling force which continually gives rise to new expressions of life and order.
- Creative intelligence is by its very nature, progressive and evolutionary.
- There exists a pure field of creative intelligence.
- There exists a simple, natural, reliable technique which enables any person to open his or her awareness to the field of pure creative intelligence.
- Owning the field of pure creative intelligence permanently in our awareness is called enlightenment and results easily and naturally from the transcendental meditation program.
