

University planning charter flights for Fiesta Bowl

For Penn State football fans who want to see more of the Nittany Lions than what a 12-inch television screen can afford, the University is making arrangements.

The University is planning to charter two flights from Harrisburg to Phoenix for the Fiesta Bowl. One flight will leave Dec. 24 and the other on Dec. 25.

The Dec. 24 departure date is for a four-night, four-and-one-half-day trip. The student cost is \$319 a person based on a double occupancy room. The price includes airfare, transportation to and from the airport and to and from the game. However, it does not include the \$10 price of the game ticket.

The Dec. 25 departure date is for a 3-night, 4-day trip and will cost the student \$299. Again, the price is based on a double occupancy room and does not include the cost of the game ticket.

The package deals are available only to those attending or employed by the University.

Former psych. professor dies

Bruce V. Moore, the first head of the University's Department of Psychology, died Nov. 14 after being stricken at his home in State College.

Moore, professor emeritus of psychology at his retirement in 1952, joined the University faculty in 1920 as an assistant professor of psychology. He was appointed head of the psychology department when it was reorganized in 1928.

The psychology department's office building was named in his honor in 1972.

Moore was the first person in the nation to obtain a degree in industrial psychology when he was named doctor of philosophy at Carnegie-Mellon University in 1921. He earned his bachelor of arts and master of arts

degrees from Indiana University at Bloomington, Ind.

Moore served as an officer on numerous national psychology associations and was the author of several books on industrial psychology.

New candidate wants tax cut

Warren County attorney William F. Clinger Jr., Republican candidate for the 23rd U.S. Congressional district, said in a press release that he would vote for an across-the-board federal tax cut.

Clinger said he officially will announce his candidacy for the district now served by Joseph Ammerman, at 9 a.m. Thursday in the Autoport Motel.

The 23rd district comprises 11 Pennsylvania counties, including Centre.

Clinger worked in Drew Lewis' campaign for governor in 1973 and 1974 and was a delegate to the 1972 Republican National Convention. He was also a delegate to the Pa. Constitutional Convention in 1968.

Clinger, 48, is married and a 1951 graduate of Johns Hopkins University.

PSU appoints nursing prof

Margaret A. Newman was appointed professor-in-charge of the University's graduate nursing programs last month. She also will serve as professor of nursing in the College of Human Development.

Newman received her bachelor of nursing degree at the University of Tennessee and master of science degree from the University of California at San

Francisco. She earned her doctor of philosophy degree in nursing science at New York University.

She is a former member of the faculties of New York University and the University of Tennessee.

Library tours are scheduled

Tours of the University libraries will be conducted Thursday and Friday for all new students.

Tours of Pattee for undergraduate students will begin in the main lobby at 9 a.m., 11 a.m., 1 p.m. and 3 p.m. Thursday and Friday. A special tour will begin at 7 tonight. Pattee tours for graduate students begin in the reference room at 10 a.m. and 2 p.m. Thursday and Friday. The Pattee tours will last from 45 minutes to an hour.

Loan totals up to \$45 million

In order to meet payroll and other obligations, the University is borrowing an additional \$9 million today, bringing the total loan to \$45 million and increasing daily interest to \$5,000.

Interest charges to date are \$325,000—enough to pay four-year full tuition for 64 students.

During yesterday's session, the House of Representatives in Harrisburg did not pass the tax increase needed to appropriate money to the state-related universities.

But University Controller Steve A. Garban said, "Sooner or later common sense will prevail."

Garban said the University is holding back on maintenance and temporary repairs until money becomes available.

NEW HERE?
You're important to Sera-Tec and we could be very important to you!

... Think of it this way, Would you like to make an easy \$1,800 during the next four years? If your blood type is in demand, you could make up to \$3,000.

You can donate blood plasma up to twice a week, since your body quickly makes up the difference. Donating takes about 1½ hrs., so get some studying out of the way while you're here.

BUT WHAT BECOMES OF THE PLASMA?

The plasma you donate may be used to produce GAMMAGLOBULIN (Used to treat and prevent RH disease, rabies and tetanus.) SERUM ALBUMIN (used as a plasma expander to aid shock and burn patients), or it may be used to make the clotting factor necessary for the treatment of HEMOPHILIA. We also supply plasma for laboratory and research purposes. Even now, a new development in plasmapheresis is helping in the treatment of cancer.

Stop by today, or call 237-5761 for details
