*HUB debate presents pros and cons

By LISA DOHNER

Daily Collegian Staff Writer The United States is making it very easy for countries to buy arms, a member of the Coalition for a New Foreign and Military Policy said

Arms manufacturers are "pushing them, bribing them to buy," Erica Foldey said. She spoke as part of the "Thinking About War?" program vesterday in the HUB. She said the United States' arms exports have risen

15 percent from 1978 to 1980. Since the invasion of Afghanistan, Foldey she said, President Carter has called for a restriction on arms. But the invasion has sent arms sales skyrocketing, she said. "We're arming India because they're upset that we're arming Pakistan."

Foldey was featured from 3:30 to 5:30 p.m. in a discussion on human rights. She spoke after a showing of a 1978 ABC documentary, "The Politics of Torture." The documentary showed citizens imprisoned without trial, police brutalities and torture victims - extreme human rights violations practiced in the last decade in the Phillippines, Chile and Iran. The documentary also' showed how the United States supported these governments through military and

economic aid. The documentary depicted Carter in December 1978, introducing the shah of Iran and his wife to a crowd on the White House Lawn as "longtime friends of our country," while feuding anti-shah and pro-shah demonstrators were being tear gassed less than a block away. The film also showed Carter in December 1978, saying that "human rights is the soul of our foreign policy."Foldey then gave an update on the film. In 1973, she said, Congress passed a bill which denied foreign and a nuclear war, a U.S. delegate to the understanding of the kind of world we three steps, she said.
