Reeves/Calkins:

Executive Council should be more 'goal-oriented' and not just react to problems

COLLEGIAN: Should USG serve the students by providing things like DateMatch, Florida trips and term break buses, or by dealing with the administration and helping influence policy decisions? Which is more important? REEVES: I don't necessarily feel there is a trade-off between serving students through things such as DateMatch and between dealing with the administration. Both end up serving the

As far as services go, the ones you mentioned have the added student service of providing funds which USG reallocates into other student organizations and other student-related projects. Unfortunately, a criticism of USG is that they are lacking in the service aspect. Right now I feel that is where some emphasis needs to be placed, to offer more services to the students.

In dealing with the administration, USG needs to remain in contact with the administrators even when a crisis is not present. This would add an increasing acceptability of student criticism of administration projects. So, there is no tradeoff, but what has been lacking has been a lot of

COLLEGIAN: What is the role of USG president? REEVES: The USG president has several established functions, among them chairing the

what projects of a more temporary nature should be undertaken.

This is evident in the trade-offs in the business department, between making a profit, and providing a service. It is always the president's responsibility to decide which takes precedence. The president also deals with the administration as far as relating the student feeling back to the administration on various programs. COLLEGIAN: What structure would you have

for handling money and how would you prevent it from being spent without being approved? REEVES: Accountability has become a very important issue in student government recently. believe in and participated in writing legislation that requires any large expenditures or any large projects to be funded through the

senate. This would prohibit, say, the business director from purchasing new equipment only on his own initiative. As far as executive spending goes. I think there should be a limit on it and that t should be countersigned by the treasurer. COLLEGIAN: Do you have any special ideas, proposals or programs you would like to im-

programs that we would like to implement. We Executive Council, attending SAB (Student would like exec council to become more goaloriented and not simply to react to the problems Advisory Board) and trustee meetings, and in all

these places represent the students' interests. that have arisen. One of the projects we would The president also gives USG direction as to like to undertake would be a plan for the decade,. where all the members of the exec council would sit down and try to formulate a plan for what direction student government should go for the '80s. This would include matters of philosophy as well as alternative sources of funding apart from ASA. Exec council would be the place to decide

> the merits of a co-op plan. Another idea we have is to establish an effective set of liaisons between the student organizations, and to enhance communication between the organizations. This would also result in better cooperation. Along the lines of better cooperation we would like to hold informal meetings between representatives of the major student organizations to discuss an informal setting the issues which are important to students at this University and ways we can go about dealing with these issues.

We would like to see an expansion of the student opinion survey and to bring the student government closer to the actual student feeling. And finally we would like to see, in a programming nature, some pure entertainment programs for the students during the Summer and Winter terms when there is traditionally a lull in the activities the students have available

COLLEGIAN: What type of pay system do you

REEVES: In order to talk about pay we have to talk about structure first. Chris (Calkins) and believe the structure should be that of the business aspect of USG. The rationale behind this is that accountability is very important at this time. The structure of a department is very much more accountable than that of a separate

To get to the pay issue, we believe that the director of the department and his project managers should not be paid but that the physical laborers should. We believe that the director and the department managers should be more oriented toward volunteerism as much as they would be gaining a lot of experience and satisfaction from undertaking a large project and doing it successfully, whereas the projectionist and the bus loaders, that's just another

COLLEGIAN: How can you improve USG's credibility with the students and with the ad-REEVES: Unfortunately USG has had some

we feel that USG can become more credible is through becoming a more effective voice for the This can be accomplished through greater cooperation among the student organizations

and a better communication with the students.

problems with credibility in the past. The way

establish is that of press releases put out on regular basis, informing the press and the students of what is planned within USG in orde, for them to have time to comment and critize that As far as improving the credibility with the

administration I think three things are in portant: sincerity, consistency and planning Although an administrator may disagree with us, we feel he'll still respect us if our present tation was well thought-out, sincere and cord sistent. Consistency is in both outlook and i consistently meeting with the administrators t develop a feeling for one another and a working relationship. In this manner we believe that this administration would be more willing to place reliance in our presentations and ideas. COLLEGIAN: What is USG's bigges

REEVES: Lack of communication and cooperation are the largest problems in USG this

This has in turn affected USG's leadership effectiveness. I would work to improve com munication with the ideas represented earlier such as press releases and exec council and expanding the student opinion surveys. In addition Chris and I are able to work together

A dancer's life

Ann Reinking stars with Roy Scheider and Jessica Lange in "All That Jazz," playing downtown this week. The film is directed by Bob Fosse, and chronicles the life of this mous dancer/choreographer. See today's review.

An unfaithful wife

"The Blue Angel," starring Marlene Dietrich and Emil Jannings, traces the relationship between a school teacher and a dance hall singer, and the teacher's resultant fall from respectability to drunken dissolution. Tonight only, downtown.
