

Peace Corps is major University recruiter

By GRETCHEN GORDON
Daily Collegian Staff Writer

Most students are familiar with recruiters who come to the University looking for engineers and business students. But Penn State is also a major recruitment area for another type of employer — the Peace Corps.

Mary Keith, a campus representative for the Peace Corps and former corps volunteer, said in 1977 the University had 229 Peace Corps applicants, the highest number from any campus in the nation. Eighty-nine University students entered the Peace Corps last year, but Keith said the average is usually around 60.

Representatives from the international organization will be in the HUB lobby from 8:30 a.m. to 4:30 p.m. today through Friday, recruiting applicants for duty in one of five developing nations. Volunteers teach skills and fill shortages

of skilled and semi-skilled manpower. Students can sign up in the placement office, 408 Boucke, for an interview with a recruitment officer, said Erich Rudy, a recruiter from the Peace Corps/VISTA office in Philadelphia. Students who want more information about the programs should talk to Keith, in 239 Agricultural Administration Building.

The film "The Toughest Job You'll Ever Love" will be shown at 7 tonight in Waring Dining Hall, and at the same time tomorrow night in Findlay Union Building. The film is free to all interested students and faculty. A question and answer period will follow.

Peace Corps volunteers must be at least 18 years old, U.S. citizens, in good physical condition and skilled in a field that could be useful to the citizens of a developing nation.

"General agriculture and skilled trades are the hottest moving areas

right now," Rudy said. "We'll be specifically targeting for applicants in these areas."

Other areas include forestry, business, engineering, education and health, but there are fewer openings in these fields.

But Rudy, who is on campus recruiting this week, said "We usually have more applicants than positions to be filled — it's very competitive. But there are a substantial number of positions presently available to qualified applicants."

Positions are not established in the United States. The Peace Corps receives invitations from other nations and these host countries designate the areas in which individuals are needed, Rudy said.

If an applicant is accepted, the Peace Corps tries to place the person into the skill and geographic region of his or her choice.

The volunteer is then given information about the assignment and undergoes a training period of approximately two to three weeks in the host country.

A tour of duty lasts two years, but volunteers can serve up to five years if they show that the job they are doing is necessary and there is no one available to replace them.

The expenses of living in a foreign country are paid by the corps.

Rudy said benefits of the Peace Corps program include cultural exchange and experience in the chosen skill area. Volunteers also receive a subsistence allowance for living expenses, which Rudy said is enough to allow the person to live comfortably. Also, a readjustment allowance of \$125 a month is saved in Washington, D.C., so the volunteer will have money for living expenses immediately after completion of the tour of duty.

Freshmen career conscious, study shows

By MARK GREEN
Daily Collegian Staff Writer

Freshmen entering Penn State in 1979 were more concerned with careers, more willing to let University officials ban controversial campus speakers, and more optimistic about college than their 1969 and 1972 counterparts, according to a study recently released by the University.

The study, a comparison of freshmen surveys from 1969, 1972 and 1979, was completed in September by Kenneth W. Boras, planning analyst for the Office of Planning and Budget. It is the first comparison of the annual surveys the University has done, he said.

Boras said although students still have approximately the same socioeconomic backgrounds and the same age and race distributions, the most evident differences are in their attitudes and expectations for the future.

For example, when asked what objectives they considered to be essential, the majority of incoming freshmen in 1969 and 1972 said developing a philosophy of life was most important.

Last year, developing a philosophy of life was ranked sixth. Being well off financially, getting recognition from peers, being an authority in their own fields, and raising a family were among those objectives that preceded developing a philosophy of life.

Also according to the study, freshmen in 1979 agreed more with University regulation of student publications, campus speakers and off-campus behavior than did students in 1972.

Higher academic expectations were obvious in last year's survey. For example, only 6.5 percent surveyed said they thought they would fail one or more courses, and almost 60 percent expected grades of B or better.

The surveys used in the study are given yearly to freshmen in participating colleges across the nation. Results are compiled at the respective colleges and then sent to the University of California at Los Angeles, which sponsors the survey.

The study also shows:

- More than 80 percent of the 1979 University freshmen said they depend on parental aid for at least part of their college costs.
- 6.2 percent of last year's freshmen said they smoked cigarettes, compared to 11.5 percent nationally.
- Women entering University Park as freshmen shifted away from traditional careers such as education, health professions and the arts, to business, engineering, law and science.
- The percentage of freshmen favoring the legalization of marijuana has dropped off from 56.7 percent in 1972 to 46 percent last year.

Astronaut defends space program

Space — no longer a final frontier

By THOMAS SAKELL
Daily Collegian Staff Writer

The space program is too vital to national interest for the United States to phase out, astronaut Robert Stewart said yesterday.

Stewart discussed the National Aeronautics and Space Administration space shuttle program and astronaut eligibility in a program sponsored by Army ROTC.

"Space is no longer a frontier; space is a commodity," he said. "More people are using space for commercial interests."

Stewart said the shuttle program, slated to go into operation next year, will be able to transport commercial items such as satellites and power sources, and scientific equipment such as telescopes, into outer space.

Corporations will foot the \$20 million of expenses for each flight when they use the shuttle system, he said. NASA does not expect to make a profit, Stewart said.

Other countries which cooperate with NASA, including the Soviet Union, will be able to use the shuttles, Stewart said, since all countries using the service will pay for it.

The goal of the space shuttle program, Stewart said, is to send a manned spaceship into space, have it orbit the earth for an indefinite time, and return and land at Florida's Cape Kennedy. A 15,000-foot landing strip sur-

rounded by swampland has been built for just that purpose.

The shuttle is as big as a DC-9 airliner, he said, and its cargo hold is large enough to carry a Greyhound bus. It weighs 4.4 million pounds including rockets, and has a thrust capability of 7 million pounds.

"I'll be on board, maybe as a crew member," he said. "I don't know if I'll actually fly a shuttle, or command one, but I'll be on board."

"You strap yourself to the side of 4.4 million pounds and blast yourself off the face of the earth; there's still several thousand people who want to do that."

One of the projects which still needs funding, he said, is the Galileo probe, scheduled for take-off in 1985. Galileo will send an unmanned spacecraft past Uranus on an intelligence gathering mission, similar to the Voyager explorations.

Because of the orbital patterns of the outer planets, it is integral that the mission go off on time "or we won't make another one for 11 years," Stewart said.

Stewart, who graduated from Southern Mississippi University in the Army ROTC program in 1964, logged over 1,000 hours of combat flying time as an Army helicopter pilot in Vietnam.

He was accepted into the NASA space program in 1978 as the first astronaut from the Army. Currently, he is involved in the re-entry flight control system for the first space shuttle.

The program has already received \$3.3 billion in federal monies, Stewart said, but NASA is still trying to get the funds to add one more shuttle to its four ship fleet.

Stewart said he plans to fly with the space shuttle.

"I'll be on board, maybe as a crew member," he said. "I don't know if I'll actually fly a shuttle, or command one, but I'll be on board."

Coping with stress

topic of workshop

- The Office of Student Activities will sponsor a workshop on "How To Deal With Stress And Relax When You Feel Like It" at 12:30 this afternoon in 307 HUB.
- Colloquy will meet at 7 tonight in 321 HUB.
- Student Counselors will meet at 8 tonight in 323 HUB.
- Bread for the World will meet at 7 tonight in 312 Boucke.
- WDFM will hold Sports Talk at 8 tonight. Call 238-0661 to talk with Lady Lion Basketball co-captains Louise Leimkuhler and Cheryl Ellison.
- The Marketing Club will meet at 7:30 tonight in 151 Willard.
- The department of man-environmental relations will meet at 8:25 this afternoon in S-131 Henderson Human Development Building.
- Circle K will meet at 7 tonight in 314 Boucke.
- The Society of Women Engineers will meet at 7:30 tonight in the Kunkle Activities Center in Hammond Building.
- The Office of Student Activities will sponsor session five in the Student Leadership Workshop Series at 8 tonight in 305 HUB.
- Students For Anderson will watch election returns starting at 8 tonight at Anderson Headquarters, South Fraser Street.
- The Society of Physics Students will meet at 7 tonight for a tutoring session in 105 Osmond.
- The Science Fiction Society will meet at 7 tonight in 311 Boucke.
- Alpha Phi Omega service fraternity will meet at 7 tonight in 265 Willard.

Gold chain worth \$125 stolen from dorm room

Paul Pochan, 113 Stuart, told University Police Services on Sunday that a gold chain valued at \$125 was taken from 107 Stuart.

Sue Bernatt, 340 Simmons, told University Police Sunday that the front wheel of her bicycle was taken while her bicycle was parked in front of Hartranft Hall.

Abscam indictment found valid

WASHINGTON (AP) — The Supreme Court yesterday rejected U.S. Rep. Michael Myers' challenge to the grand jury indictment that led to his bribery conviction and expulsion from Congress.

Myers became the first person expelled from Congress for corruption. Myers is running for Congress in today's election. If he wins, the House will be faced with the question of whether to seat him when the new Congress meets in January.

Philadelphia, was convicted in August of taking a \$50,000 bribe from undercover agents posing as Arab businessmen seeking political favors in the FBI's Abscam investigation.

Benefit to be held

Alpha Kappa Lambda fraternity and Kappa Alpha Theta sorority will be holding a balloon raffle this week to benefit the March of Dimes.

Raffle chairman Rick Kron said raffle tickets are attached to balloons and sold for \$1. He said fraternity and sorority members so far have raised about \$14,000.

The winner of the raffle will receive \$50, Kron said. He said 4,000 additional balloons, with raffle tickets attached, were launched at the University football game Saturday.

Kron said whomever returns the ticket from the balloon that travels the farthest distance from campus will win \$150. All tickets have to be returned before Jan. 1 in order to be eligible for the \$150 prize.

—Rebecca Clark

Correction

The polling place for the East Central 3 precinct was incorrectly reported in Friday's issue of The Daily Collegian. The correct location is Phi Sigma Kappa Fraternity, 501 S. Allen St.
