WORK YOUR WAY TO THE BOTTOM

When you come to work for Gulf, you could find yourself drilling for oil at the bottom of the ocean. Or gasifying coal that lies in seams so deep and slanted, conventional mining techniques can't get it out of the ground.

Because the bottom line in energy exploration means we have to search for all sorts of energy. In strange, difficult places all over the world.

We need people with talent, skill, and imagination to join in the search.

To explore energy alternatives such as coal liquefaction, oil shale, tar sands, solar energy, uranium, and others, as well as finding new sources of oil and natural gas.

While taking care not to disturb the natural balance of the environment.

So we need graduates from many areas, especially from the scientific/technical disciplines.

If you'd like to get to the bottom with us, see our recruiter. Or write to: William E. Johnston, Jr., Human Resources Department, Gulf Oil Corporation, P.O. Box 1166, Pittsburgh, PA, 15230.

Because with Gulf, working your way to the bottom can mean working your way to the top.
