### PennDOT gets extension bids

The Pennsylvania Department of Transportation yesterday received bids for the Park Avenue extension of the State College bypass, a PennDOT official said.

Joseph Walter, transportation system management coordinator for PennDOT, said the contract would be awarded within 30 days.

However, a spokesman for the lowest bidder, Glenn O. Hawbaker Inc. of State College, said the contract might be awarded within a week to allow contractors to start work as soon as possible. This would ensure the scheduled Sept. 1, 1984 completion date.

The three lowest bids were from: Glenn O. Hawbaker Inc., \$3,165,791.22; Herbert R. Imbt Inc., State College, \$3,383,697.94; and Pavex Inc., Harrisburg, \$3,635,596.85. The highest bidder was Hempt Bros., Inc., Camp Hill, \$4,040,024.65.

The Park Avenue Extension is the first part of a five-phase project to close the State College bypass's 2.06-mile "missing link." It will connect Park Avenue with the bypass interchange at Centre Community Hospital.

### Teachers use videodiscs to supplement courses

**By CHRIS STAMBOULIS**  
Collegian Staff Writer

Some faculty members at the Delaware County Campus of Penn State have been using videodiscs as an educational aid.

Videodiscs, which are similar to record albums but have both audio and video recording capacities, have been used at the Delaware County Campus since February 1983, as part of its library network.

Mary Matus, senior instruction service specialist at Delaware, said videodiscs are used in several classes, including political science, human development, and English composition courses.

Videodiscs are used primarily as supplementary components to courses, she said. Feedback, from both teachers and students who have used the videodiscs, has been positive, Matus added.

Last Spring Term, the videodiscs were tested at the University's Pennarama to see how well the discs would operate in the video system.

Pennarama, the Pennsylvania Learning Network at University Park, is a cable television network dedicated to adult learning and is available for use by all educational institutions in Pennsylvania, said Jerry Sawyer, Pennarama coordinator.

Sawyer said Pennarama had been operating in eastern Pennsylvania since 1980, and is scheduled for completion this summer.

Sawyer said the testing was sponsored by the National University Consortium (NUC), which has been conducting a four-month study on the use of videodiscs.

The NUC, in its third year of operation, is a national network of colleges and universities in partnership with public broadcasting stations and cable TV systems.

Allan Herschfield, executive director of the NUC, said the study went very well, but that a complete report will not be ready for another month.

Herschfield said the NUC was able to complete the study with the aid of the Maryland Center for Public Broadcasting, which developed a broadcasting quality signal for the discs.

Pioneer Video, Inc. made video equipment available for the study, he said. Pioneer Video also mastered the discs, which is like mastering a record for further copying.

Herschfield said the advantage of using the discs over video tapes is that they do not need to be stored in a climate-controlled area.

Ralph France, executive producer for the Maryland Center for Public Broadcasting, said the study was conducted to explore the use of videodiscs as a medium for video software.

The system now used in the broadcasting system requires that programs be fed by satellite to broadcast and then to cassettes, which costs a great deal, he said.

He added that the overall cost of using videodiscs in the satellite-television-cassette relationship can be very cost-effective.

France said if enough discs are produced—about 200—the cost is equal or less than the cost of three-quarter-inch cassettes.

### Trustees approve 9 new scholarships, funds

**By PHIL GUTIS**  
Collegian Staff Writer

The University Board of Trustees recently approved several new scholarships and two special funds for University departments.

The first fund, The Liberal Arts College Educational Advancement Fund, will provide money for a variety of needs and activities in the University's College of The Liberal Arts.

Money for the fund has been contributed by faculty members, alumni, interested persons and organizations, according to information in the trustee's docket and news releases.

"The fund has been established to provide for the enrichment of undergraduate students of high academic accomplishments," said Stanley F. Paulson, dean of the college. "It will assist students engaged in activities, attending conferences and studying overseas."

"The fund also will assist faculty members with the expenses that are sometimes required for research or presenting scholarly papers at meetings," the dean said. "With the reduction in other resources in the college, we consider this kind of assistance to students and faculty members to be of critical importance."

All uses of the fund will be approved by a committee appointed by the dean of the college. Expenditures for students will also be approved by the Office of Student Aid.

The other fund, the Carolyn Wood Sherif Memorial Research Fund, will be used to provide grants for travel, special equipment, supplies and other purposes to graduate students doing research in social psychology or the psychology of women.

Sherif, who died last year, was a professor of psychology at the University. She joined the faculty in 1966 and wrote numerous studies and 10 books. Her research involved work with adolescents and groups in large cities, social judgment, ego involvement and the psychology of women.

All graduate students in a program of research in the fields noted above who need financial assistance will be eligible for grants.

A committee appointed by the head of the psychology department will approve expenditures. All awards will also be approved by the Office of Student Aid.

The trustees also approved one award, the Teresa Cohen Mathematics Service Award.

The award is in honor of Cohen, 91, a retired University professor emerita of mathematics. She joined the faculty in 1920 and officially retired in 1982, but continued to tutor students daily at her office on campus.

The annual service award, which will recognize two faculty members in the Department of Mathematics, was created from gifts to the University in Cohen's honor.

Recipients will be selected by the Policy Committee of the Department of Mathematics from nominations received from departmental faculty members at University Park and Commonwealth campuses and from current or former students.

At their May 27 meeting, the trustees also approved seven scholarships. They include:

- The John W. and Rosanel O. Oswald Scholarship to provide financial assistance to medical students enrolled in the University's College of Medicine at the Milton S. Hersey Medical Center.
- Oswald, the 13th president of the University, retired next Thursday. Students enrolled full-time in the College of Medicine who have a demonstrated financial need will be eligible for the scholarship. Recipients will be selected by the assistant dean for student affairs in consultation with the dean of the College of Medicine.
- The principal of the scholarship fund has been received as gifts from alumni, friends of the University and from professional fees from the medical center.
- The Donald and Ruth Childs Memorial Renaissance Scholarship to provide financial assistance to outstanding undergraduates enrolled or planning to enroll, who need funds to meet their college expenses.
- Donald Childs is a University graduate from the class of 1925. He earned his bachelor's degree in commerce and finance.
- The principal of the scholarship fund will be received as a bequest from the Childs' estate upon their death.
- Recipients of the scholarship will be selected by the Scholarship Selection Committee of the Renaissance Fund with the approval of the Office of Student Aid.
- The Samuel Thompson Pollock, Sr. Memorial Scholarship to attract outstanding students to Penn State.
- Pollock, who died in 1968, was a 1919 graduate in forestry. Money for the scholarship has been received as a bequest from the estate of his son, the late Samuel T. Pollock Jr. of Media, Pa., in the memory of his father.
- Recipients of the scholarship will be chosen by the Freshman Scholarship Committee and approved by the Office of Student Aid. All first-year students planning to enroll in the University who exhibit outstanding academic capabilities as demonstrated by their Scholastic Aptitude Test scores, high school grades or other measures of achievement.
- Their predicted University grade-point averages should not be less than 3.4.
- The Pella Fay Braucher Scholarship for encouraging research in physiological and biological chemistry.
- Braucher, who died in 1966, was a

### Horizons planned for August

The Horizons staff has begun to schedule events for its annual two-day festival which will be held Aug. 26 and 27.

Horizons, an awareness program that gives on- and off-campus groups the opportunity to acquaint students with their organizations, has already received proposals for more than 70 tables on the HUB lawn, said Chris Kelly, steering committee chairman.

"We're showcasing groups for the new students getting in," Kelly said.

Kelly (12th-computer science), said the committee has enough organizations participating, but is "working on scheduling other (musical) groups."

The Penn State Dance Band and Cartoon will perform on Friday on the HUB lawn, he said. Also, a feature band from New York, Do'a, will appear in the HUB ballroom Saturday night, Kelly said.

"Various outside workshops with food are planned and demonstrations on the HUB lawn," Kelly said.

University Health Services will also sponsor tours and a blood-typing workshop will be sponsored by the Ritenour Health Center, Kelly said.

The steering committee still needs volunteers to help plan the festival. Any persons interested in participating should contact John McCauley, the assistant director of student activities and project advisor for Horizons.

McCauley's office is located in 217 HUB.

**Be prepared.**

You wouldn't go camping without a tent, show up at an exam without a No. 2 pencil, or go to registration without your bursar's receipt, would you?

And you wouldn't dream of going to an interview without a resumé prepared by Collegian Production, right? Unless, of course (check one):

- you choose not to be remembered for your initiative in having your resumé professionally typeset and printed.
- you'd rather not have your resumé stand out on a desk crowded with ordinary typewritten résumés, or
- your uncle happens to be president of the company that's interviewing you.

The choice is yours. But, before your life's ambition and experiences roll out of your old typewriter, check out your options at Collegian Production.

Come browse through our resumé portfolio. Imagine your name at the top of one of our many samples and think of how much better you'll feel about yourself with one of our résumés. Not to mention how much better you'll look.
