## The Twenty-First Century Overture

Where will time take us next?

To an information utopia where knowledge belongs to everyone? To an age when the computer becomes one with communications and thought travels everywhere, anywhere and at anytime? To a brave new world where electronic intuition solves the impossible problems that have followed us through history?

Getting to this future first is our mission.

We're Bell Communications Research (Bellcore), established as the central source for the research and technologies that will enable the Bell Operating Companies to meet the needs of the future.

We are working in areas that include software development; applied research; information systems; systems engineering; network planning services; and equipment assessment.

Our purpose is to know more, understand more, see more so that we can provide others with the expert advice they need in many different technical and scientific areas. Our mandate is to provide leading edge answers.

The Bell Operating Companies look to us for the software and technologies they need to operate efficiently.

We are a 'brain trust' that imagines a new tomorrow.

We have opportunities at our northern and central New Jersey locations for individuals with PhD, MS or BS degrees in Electrical Engineering, Computer Science, Mathematics, Operations Research, Chemistry, Physics, or Human Factors Psychology.

If you want to write the technological harmonies that the future will play

**Meet us on campus during Engineering Career Days September 18 & 19 at the Hub**

Alternatively, send your resume, detailing your education and experience to: Manager, Technical Employment, Bell Communications Research, RRC Department 127/3538/85, CX 1800, Piscataway, New Jersey 08854.

An equal opportunity employer

**Bell Communications Research**

Because the mind must meet the future

## doonesbury

**My doctor pronounced me cured of cancer.**

**My boss didn't.**

My boss didn't understand that I was healthy again.

So I was let go.

A lot of people are like my boss. They think that everyone dies of cancer. I thought so, too. Until the American Cancer Society, through one of its service and rehabilitation programs, helped me return to a normal life.

The ACS also has local Units that help Americans who've never had cancer understand it better.

Today, more and more, cancer is a curable disease. Ignorance about cancer is curable, too.

American Cancer Society
