

## Award-winning illustrator visits Penn State

By ELLEN STERN  
Collegian Staff Writer

Aspiring illustrators, among others, had a chance to meet and talk with noted illustrator and author Donna Diamond at the Penn State Bookstore on Campus' Meet-the-Author day Wednesday.

Diamond has illustrated books which won such prestigious awards as the Newbery Award and The New York Times Best Books Award. She has also exhibited her work in New York galleries and museums, including the Metropolitan Museum of Art.

"I basically illustrate books for children ages 4 to 16," Diamond said. She also shared her knowledge of illustration with local grade school children while visiting the eight State College district elementary schools throughout the week.

"I'll spend time with the fifth and sixth graders, and give a little presentation about myself. I'll also talk about how a book is made—from the author's point of view, of course," she explained.

"I've found that the kids are very experimental. When I visit the schools, I have the children act as

editors and we write a book together. I'll give them a simple poem, and they'll tell me how they want to illustrate it," she said.

For example, Diamond said she gave some children the poem "Humpty Dumpty" during one of her elementary school visits. The children told her to "make Humpty Dumpty into a woman or drawing him with a purple 'mohawk' haircut," she said.

Books she has illustrated include Rumpelstiltskin, Swan Lake and The Pied Piper.

Diamond's art was also featured in a group exhibition of work done by illustrators promoting nuclear disarmament. The exhibit, titled "And Peace Attend Thee," has been displayed across the country.

"We wanted to make a stand against nuclear weaponry, and as far as I know, the exhibit is still traveling," Diamond said.

After signing books for a number of adults and children and giving encouragement to some young illustrators seeking advice, Diamond discussed her career as an illustrator.

The owner/manager of a Calder Square video rental store damaged by fire last month said he wants to have the business open again by the end of April.

"We're shooting for the last week in April," Mondo Video owner Ned Owen said. "I can't give a definite date but it will probably be within the next two weeks."

"We've been repairing everything—the walls, the ceiling, the carpet, the inventory," Owen said.

Donna Diamond  
Collegian Photo/Jean Hoggar

"The store should be ready to go a week from Monday," he said. Purchases of replacement videocassettes will then be made.

The inside of the store, 250 Calder Way in the Calder Square Building, was destroyed March 10 when acetate used in cleaning videocassettes spilled on a light bulb in the store. No one was hurt in the blaze. Mondo Video has continued business in a second store in Bellefonte.

Owen said it was "hard to say"

what the effects of the fire were on his Bellefonte store. "Not too many people go to Bellefonte unless they're Beta (videocassette player) owners."

Owen said he does not have a final estimate of repair and replacement costs. "It's going to be awhile before we figure that one out," Owen said. He also expects smoke damage estimates from other businesses in the Calder Square Building.

*If you need to work, but you'd like to have some fun...*

## YOU CAN GET THE BEST OF BOTH WORLDS BY FINDING YOUR SUMMER JOB IN A GREAT SUMMER RESORT AREA!

Sure, we'll still expect you to work, but in your off hours, there's plenty to do that'll let you know the summer didn't pass by while you were sitting in some dreary office! A summer job at Conneaut Lake Park lets you earn money while spending time in one of the area's fastest growing vacation spots!

→ **NO EXPERIENCE IS NECESSARY** for most jobs, and you'll gain valuable experience in working with a wide cross section of people. Plus, many jobs let you be outdoors in the fresh air, and some even allow you to work on your tan at the same time!

→ **LODGING** is available at low cost in our employee dorms, and you'll also receive a **FREE BEACH PASS, FREE RIDE & WATERSLIDE ADMISSION**, and be eligible for our **DISCOUNT FOOD COUPON** plan.

→ We've got a great **BONUS PLAN** that'll earn you additional **BUCKS** if you stay until the end of the summer, and if you stay the season and we like you and you like us, you can come back and work for us again for as many summers as you'd like!

→ In your off hours, you can enjoy the Park, and there's also swimming, fishing, boating, sailing, waterskiing, golf and other great entertainment available in the area — plus the Park's own employee recreation program for softball, volleyball and more!

Here are some of the positions available for the '86 season:

**LIFEGUARDS — CASHIERS — CLERKS — LABORERS — MECHANICS — GARDENERS — GAME STAND OPERATORS AND HELPERS — RIDE AND WATERSLIDE OPERATORS AND HELPERS — STOCK ROOM AND COMMISARY JOBS — FOOD SERVICE JOBS** (including waiters / waitresses, bartenders, hostesses, busboys, dishwashers, catering, concession stand help, and more) — **JANITORS, MAIDS, CLEANING — BOOKKEEPERS — TELEPHONE / PBX OPERATORS — HOTEL DESK CLERKS AND RESERVATIONISTS — BELLHOPS — AND MANY MANY MORE!**

If you're interested, or want more information, contact the Student Employment Office, or write to the below address. A personal interview is preferred, but is not absolutely essential if scheduling is a problem.

## Animal containment facility under construction

By MICHAEL CARLIN  
Collegian Science Writer

An animal infectious disease containment facility, which will be used to research avian influenza and other avian diseases, is under construction at the University in Wiley Laboratory.

Barrett S. Cowen, University associate professor of veterinary science, said the \$600,000 facility is scheduled to be completed in mid-June.

The project is being funded by a state legislative appropriation in response to the avian flu epidemics that have been plaguing Pennsylvania poultry farms, he said.

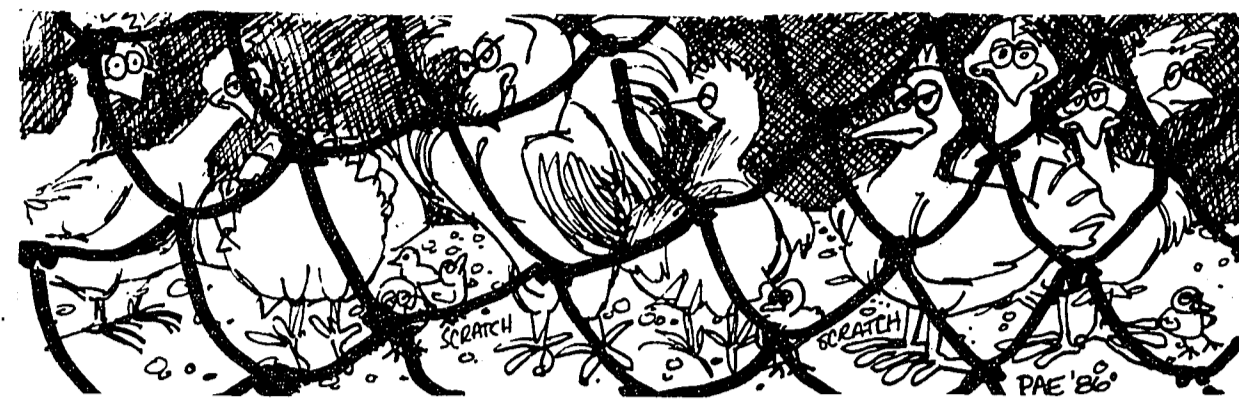

Warren Lamm, executive director of the House agriculture committee, said the committee initiated the legislation to fund the facility. Committee members agreed unanimously that funding the facility would help deal with avian flu, he said.

"When we had this widespread epidemic of avian flu, there were a number of us who decided we'd better be better prepared to diagnose outbreaks of this type," Lamm said, adding that the new facility will help speed outbreak diagnosis.

"An ounce of prevention is worth a pound of cure, and that's true in this case," he said. Recent avian flu epidemics have been very costly for individuals and for the state, he added.

Cowen said the facility is designed to prevent an accidental escape of animal disease-causing agents during testing.

David Kradel, University poultry diagnostician and epidemiologist, said only a few places in the country exist where highly pathogenic avian diseases can be tested and studied.

## State seeks lifting of poultry embargo

Now that avian influenza is believed eradicated, state Secretary of Agriculture Richard Grubb has requested that embargoing states and nations allow Pennsylvania poultry to be sold in their markets.

Charles Muir, a spokesman for the state Department of Agriculture, said trade with 17 states and several foreign countries may now resume, if these markets accept Grubb's request to dissolve the ban imposed Feb. 5. The ban was set up to curb the spread of avian flu.

The avian flu virus — H5N2 — is spread by live poultry and eggs, Muir said. Since January, the virus has contaminated more than 10 Pennsylvania flocks, resulting in the loss of 307,000 chickens.

However, a substantial period without reported infections indicates the threat of avian flu is over, he said. "There haven't been any confirmed cases of avian influenza . . . in six weeks, so we have asked for a lifting of the embargo," Muir said.

This university's proposed project, as well as a containment facility planned for the University of Pennsylvania, will be the first two facilities in Pennsylvania able to safely research such pathogens as avian flu, he said.

When the avian epidemics broke

Grubb requested the states and nations involved in the self-imposed embargoes recognize that "Pennsylvania) poultry are no longer a threat to spread influenza and that restrictions upon the importation of Pennsylvania eggs and live poultry should therefore be removed."

Maryland and Ohio have accepted Grubb's request to end the embargo, and imported Pennsylvania poultry products may soon appear again on their shelves, Muir said.

Grubb announced the eradication of the avian flu April 2.

"The department believes that H5N2 influenza virus — known to cause avian flu — has been eliminated from Pennsylvania poultry and that, in view of our surveillance and quarantine program, there is no safer state at this time from which to purchase poultry products," Grubb said last week.

—by Diane Woznicki

out, research facilities were very limited for avian disease testing. The state legislature decided there should be a place in Pennsylvania to research the diseases, he said.

The avian flu has been an economic as well as a scientific problem, he said, adding that other states and countries have placed embargoes on Pennsylvania poultry during the avian flu epidemics.

Cowen said in the future, the facility will probably be used by other University departments to investigate other animal diseases, like hoof and mouth disease in cattle.

## Trout season opens Sat.

By HEATHER L. MALARKEY  
Collegian Staff Writer

Pennsylvania lakes, streams and dams will be crowded with anxious fishermen this weekend for the start of trout season, said the regional supervisor for the Pennsylvania Fish Commission at Lamar.

Paul Swanson said if the temperature and flow of Pennsylvania streams stays pretty near normal, and with streams in pretty good shape already, an ideal opening weekend is anticipated. The season officially begins at 8 a. m. tomorrow.

Joe Humphreys, an assistant professor of physical education and the host of the "Fly Fishing Journal" television show, has his doubts about the weekend. He was out fishing with his class earlier today and said the water was a cool 46 degrees and the fish were slow to bite.

The abundance of good waters and the cooperation of private land owners who allow fishing on their properties is part of the reason fishing is a popular sport in Pennsylvania, Swanson said.

Humphreys agrees that the resources in central Pennsylvania are a major contributor to fishing popularity. He added that the area has gotten a good bit of publicity because of its historic streams.

The commission is expecting about 1 million licensed fishermen, along with an additional 500,000 people under age 16 who do not have to have a license, to gather at their favorite spots to reel in the fish, Swanson said.

"It's a good time for me to spend time with my dad," said Jim DeCocco (freshman-architecture), who has been fishing with his father since he was about 5 years old.

The DeCocco fish about every weekend in the summer and go out nearly every time Jim gets home from school, DeCocco said.

Another avid fisherman, Doug Swanger (junior-journalism), enjoys fishing with family and friends and looks at fishing as a relaxing time to think and get back to nature.

He expects a good opening day tomorrow because the weather has been warmer than usual this year.

"It's usually about 40 degrees in the water, the tip of your rod freezes and you're usually all bundled up," he said, adding that he hopes the sunshine lasts at least through the weekend.

Bald Eagle Creek and Penn's Creek are just two of the most popular fishing holes in central Pennsylvania, Humphreys said.

Swanson said the fishing commission has heavily stocked area waters with trout.

During the pre-season, waters were stocked with 2.5 million trout, and another 2.5 million trout will be added during the main season, Swanson said.

The main emphasis for the 1986 fishing season is courtesy to private land owners who have allowed fishing on their properties, Swanson said.

The fishing commission has offered to stock privately-owned lakes and streams for individuals permitting fishing on their lands, he said.

A limit has been set of eight fish per day throughout fishing season, which is expected to last until around Labor Day, he said.

## The Student Dietetic Association

presents "Career Days"

Come listen and talk with four Penn State University Nutrition Alumni who will discuss their careers in the nutrition field.
