Copter crash kills 1

By CATHERINE CROCKER
Associated Press Writer

NEW YORK — A traffic helicopter plunged into the Hudson River as the reporter aboard frantically screamed "Hit the water!" in a live radio broadcast yesterday. The accident killed the reporter and critically injured the pilot.

More than a dozen passers-by jumped into the water to try to rescue the two working for WNBC aboard the helicopter, which crashed in the Hudson near the USS Intrepid, a permanently docked aircraft carrier and museum, officials said.

Minutes later, scuba divers pulled the occupants from the helicopter, and rescuers worked at dockside to revive them, said Donna Osso, a spokeswoman for the Emergency Medical Service.

Jane Dornacker, 40, the traffic reporter, was taken to St. Vincent's Medical Center, where she died from drowning after resuscitation efforts failed, said hospital spokeswoman Caroline McBride.

Pilot Bill Pate was taken to the trauma unit at Bellevue Hospital, where he was listed in critical condition and was taken into surgery for internal bleeding, said hospital administrator Bill Allen.

Those who jumped in the water to try to rescue them were treated for exposure.

It was the second time this year that Dornacker was aboard a WNBC traffic helicopter that crashed. On April 18, she and another pilot escaped unharmed when a helicopter crashed into the Hackensack River in New Jersey.

Dornacker was giving her regular rush-hour traffic report on the air yesterday when the crash occurred.

"Heading to New Jersey, the out-bound Lincoln Tunnel looks a lot

Jane Dornacker, a New York radio station traffic reporter, is aided by Emergency Medical personnel after the station's helicopter plummeted into the Hudson River during a rush-hour traffic report.

better for you. In New Jersey . . . she said. Then she gasped and screamed, "Hit the water! Hit the water! Hit the water!"

After a long pause, a stunned Joey Reynolds, the disc jockey, said: "OK, we're gonna play some uh, some music here, I think. Find out what's going on with the helicopter. There's something happening. It's a quarter to five, it'll be five on WNBC . . ."

Reynolds said later that after the first crash, Dornacker "was getting afraid of flying" and had worked from the studio for a time. Recently, he said, she had been getting "a little more confidence back."

The Reynolds show is a mixture of comedy and music, with Dornacker often serving as a target for wisecracks. In the wake of the crash, however, the show turned somber, listeners called in to express their horror at the accident and offer their prayers for the two.

The helicopter was submerged in the water, with one of its rotors visible underwater.

Mamdouh Bayoumi, who was working at a car wash across from the Intrepid, said he saw smoke coming from the back of the helicopter before it crashed.

Assistant Chief of Patrol Gerard Kerins said an underwater rescue unit based nearby was able to get the two out of the water within 10 minutes.

Reagan signs tax bill

By JIM LUTHER
Associated Press Writer

WASHINGTON, D.C. — With the stroke of several pens and a renewed vow to oppose tax increases, President Reagan signed into law yesterday a far-reaching tax overhaul that he termed a victory for fairness and nothing short of a revolution.

"I feel like we've just played the World Series of tax reform. And the American people won," Reagan said after using a fistful of pens to put his name to the 879-page bill printed on artificial parchment.

"This is a tax code designed to take us into a future of technological invention and economic achievement, one that will keep America competitive and growing into the 21st Century," Reagan told an applauding crowd of aides, a dozen members of Congress and scores of corporate officials invited to the ceremonies on the sunny South Lawn of the White House.

He praised members of Congress and his administration who led the fight for the bill, which he termed "the most sweeping overhaul of the tax code in our nation's history." He mentioned the two chief authors of the measure, Sen. Bob Packwood, R-Ore., who did not attend, and Rep. Dan Rostenkowski, D-Ill., who did.

So sweeping are the changes, the president added, that "this tax bill is less a . . . reform . . . than a revolution."

The new tax plan, which Reagan put at the top of his second-term agenda, is patterned after the one he sent to Congress on May 19, 1985; significantly lower tax rates and a tax base broadened by elimination or reduction of several deductions and exclusions.

Most provisions take effect next Jan. 1, although many will be phased in gradually. The new law will cut taxes by an average of 6.1 percent for three-quarters of Americans and raise taxes on corporations by \$120 billion over the next five years. By 1988 the top individual tax rate will be cut to 33 percent from the present 50 percent; the 46 percent maximum corporate rate will drop to 34 percent.

The Tax Reform Act of 1986 will affect every person who pays a federal income tax and sweep onto the tax rolls many wealthy investors and profitable corporations that have been able to legally avoid the Internal Revenue Service through judicious use of deductions.

More than 20 million couples and individuals, including several middle-income families whose rate cuts will not make up for loss of deductions, will face tax increases in 1987 and beyond.

Some of the deductions that are being curtailed are the same ones favored by middle-income families.

Unlike Penn State, however, many of the University of Maryland's science- and engineering-oriented programs such as agricultural engineering, agronomy and chemical physics do not require GRE scores.

The applied mathematics department within the College of Computer, Mathematical and Physical Sciences at the College Park campus also does not require applicants to send GRE scores.

For example, the linguistics department requires the scores for financial aid; the math department, for foreign applicants; and the theater department, for admission into the doctoral program, said Beynon.

Fifteen of the remaining 28 programs at Pitt require the GRE scores. However, the other 13 just "strongly recommend sending the scores," she said.

Josephine Withers, coordinator for graduate studies in art history at College Park, said GRE scores are not a requirement for admission to the art history graduate program, but they will be next fall.

"This is not because we believe the scores are good indicators of a student's graduate school performance, but because the student's application will be more competitive in the university's fellowship-awarding competition," she said.

Witthers still maintains that a student's undergraduate transcript, essays and recommendations "speak more eloquently than a certain kind of test score."

Gretchen Beynon, the University of Pittsburgh's administrative assistant to the faculty of arts and sciences graduate studies, said some of its programs require applicants to submit scores while others do not.

Of Pitt's 21 graduate programs, three require the scores for reasons other than predicting a student's performance in graduate school, Beynon said.

At Temple University in Philadelphia, the graduate applications are processed by individual programs, said Beth Bradley, manager of the graduate admissions office.

Bradley said Temple's Tyler School of Art and Social Administration does not require GRE scores for admission but that the School of Business and Management requires the GMAT for admission into their MBA program.

Temple's College of Education and College of Health, Physical Education and Recreation and Dance will take either the Miller's Analogy Test, a series of 100 analogies that test general knowledge, or the GRE scores. The College of Education requires GRE scores for doctoral programs, unless the student applying already earned a master's degree.

Both the verbal and mathematical parts of the general test have a minimum score of 200. The maximum on each is 800, making a perfect score of 1,600.

The Graduate Management Admissions Test, required by many graduate business programs, is designed to help the programs determine whether a student is qualified for advanced study in business or management.

The GMAT is required for graduate programs in business at the University, said Michael Hottenstein, assistant dean and faculty director of graduate programs in business.

The GMAT is given each year in January, March and June. Students who wish to take the test in January must have their application postmarked by Dec. 22.

Applications can be picked up in the business graduate program office in 106 Business Administration.

The cost of the general and subject tests of the GRE is \$29 each. GMAT tests cost \$28, Nardi said.

The University's graduate business programs will not accept the GRE or the Miller's Analogy Test, a 30-minute test with 100 analogies, as a substitute for GMATs, Hottenstein said.

Industrial heating oil spilled on Philly's Schuylkill River

PHILADELPHIA (AP) — A spill of hundreds of gallons of heavy industrial heating oil forced the city to close two water intakes on the Schuylkill River yesterday as the thick goo spread three miles from a container company.

A spokeswoman for the Water Department said the oil presented no danger to the city water. Water was being drawn from the intakes coming from the back of the helicopter before it crashed.

Assistant Chief of Patrol Gerard Kerins said an underwater rescue unit based nearby was able to get the two out of the water within 10 minutes.

The helicopter was submerged in the water, with one of its rotors visible underwater.

Mamdouh Bayoumi, who was working at a car wash across from the Intrepid, said he saw smoke coming from the back of the helicopter before it crashed.

Requirements for GREs vary among schools

By VALERIE BAILEY
Collegian Staff Writer

The Graduate Council recently decided not to make the Graduate Record Examination a Universitywide requirement for entering graduate students. However, the University is joining the national trend by allowing individual graduate programs to decide whether the tests should be a requirement.

Howard Palmer, senior associate dean of the Graduate School, said many universities and colleges across the country have let individual programs decide whether GREs are required for admission.

Joanne Matthews, supervisor of graduate admissions at the University of Maryland's College Park campus, said its individual graduate programs make admission decisions about whether applicants should send GRE scores.

The graduate business program and the business and public management programs require the Graduate Management Admission Test, Matthews said.

Unlike Penn State, however, many of the University of Maryland's science- and engineering-oriented programs such as agricultural engineering, agronomy and chemical physics do not require GRE scores.

The applied mathematics department within the College of Computer, Mathematical and Physical Sciences at the College Park campus also does not require applicants to send GRE scores.

For example, the linguistics department requires the scores for financial aid; the math department, for foreign applicants; and the theater department, for admission into the doctoral program, said Beynon.

Fifteen of the remaining 28 programs at Pitt require the GRE scores. However, the other 13 just "strongly recommend sending the scores," she said.

Josephine Withers, coordinator for graduate studies in art history at College Park, said GRE scores are not a requirement for admission to the art history graduate program, but they will be next fall.

"This is not because we believe the scores are good indicators of a student's graduate school performance, but because the student's application will be more competitive in the university's fellowship-awarding competition," she said.

Witthers still maintains that a student's undergraduate transcript, essays and recommendations "speak more eloquently than a certain kind of test score."
