**ANDERSEN & THE ENVISIONEERS™**  
 CONSULTING & ENVISIONEERS™

**Here's this week's brainteaser:**

If you recall from the last ad, Frank had to make the shot. Samantha had bet Chris a vacation in Hawaii that Frank would make it. And, as we all know, Frank did make the shot, thus sending Samantha to the open blue seas and endless sun rays. However, Frank and Chris need a partner. Kim ever so generously decides to take over for Samantha. Chris, Kim, and Frank are hard at work helping a client compile data and compute values for a preliminary manufacturing study of a new product. These final values are determined within the computer program using a coded algorithm. All but the final value for the input of 1 have been calculated, but sadly their only on-site computer has crashed! Using the table below, try to figure out the algorithm and solve for the missing output.

Input	Output	Input	Output
2	7	5	16
3	10	6	19
4	13	1	?

*Hint: Think Binomial... $(ax+b)$  where  $a$  and  $b$  are integers*

**Prize** **How to enter:**

**\$10 Cash** to one winner. Answer correctly to enter drawing for a **\$350 gift certificate**. Visit our WEB site to see if you won last week. Submit answers on 8.5 x 11 paper with your name, phone #, address, and major by **5 pm Wed (3/13)** in: Box at HUB Desk (look for this ad) or answer on our WEB site at: <http://eec.psu.edu/lc/teaser>

As mentioned before, our big event is coming up on Saturday afternoon, March 23. What is even more interesting is the **\$2000.00** dollars in prizes (no, this is not a typo). Right now, all you have to do is **watch** for Friday's special ad in the Collegian for details.
