

Weather

University Park Forecast for Monday, October 25

After a blustery weekend in Happy Valley, expect a pleasant change in the weather for the new week. High pressure should push into the region from the west today, resulting in warmer temperatures and mostly sunny conditions. This type of weather should dominate for much of the week, although two weak cold fronts will bring short periods of cloudy skies and cooler temperatures.

Today	Tonight	Tuesday
 Mostly sunny and seasonable High 57	 Clear and cool with a light breeze Low 37	 Breezy with thickening clouds in the afternoon High 61

THE EXTENDED OUTLOOK

TUESDAY NIGHT: Mostly cloudy. Low 43.

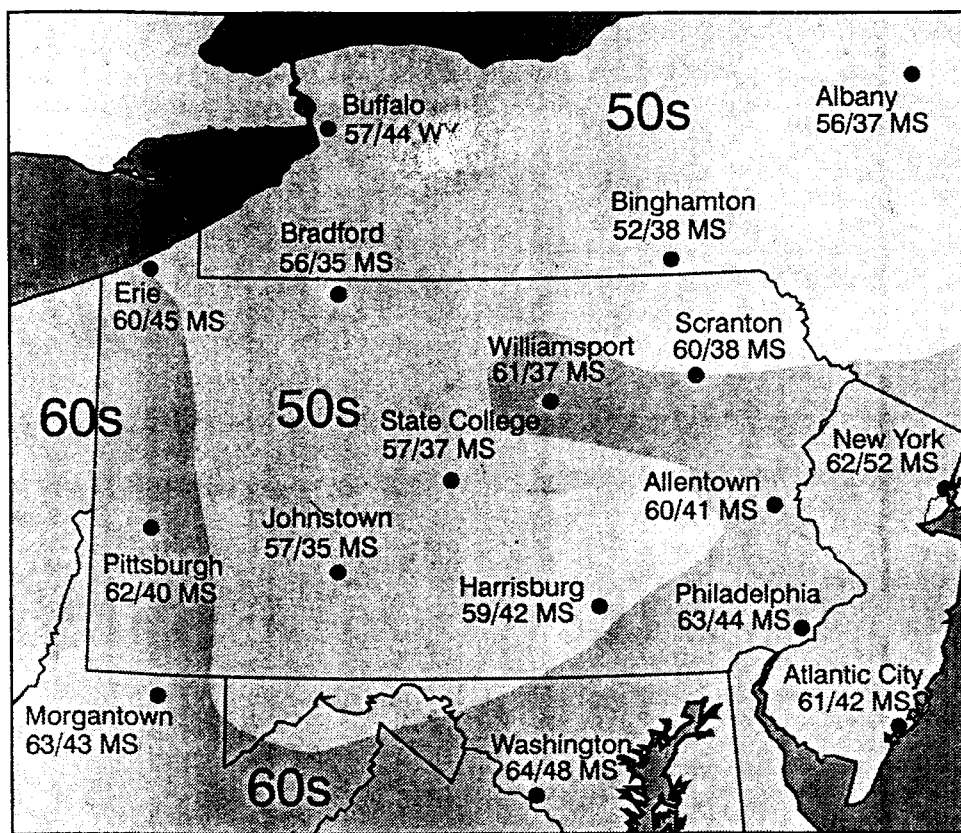

WEDNESDAY: Decreasing clouds. High 55, low 37.

THURSDAY: Partly sunny and mild. High 64, low 45.

FRIDAY: Increasing clouds with a late shower possible. High 59, low 40.

Regional Forecast Map

How to interpret this map Shades of gray indicate the expected high temperatures for today. Today's forecasted high and tomorrow morning's low are also shown for selected cities.
Legend SU(Sunny), MS(Mostly Sunny), PS(Partly Sunny), MC(Mostly Cloudy), CY(Cloudy), RN(Rain), RS(Rain/Snow), SH(Showers), SN(Snow), SF(Snow Flurries), IC(Ice), TS(Thunderstorms), WY(Windy).

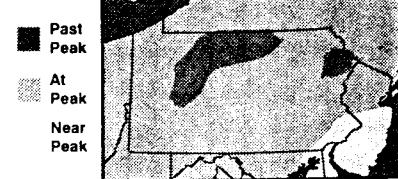

Weather Highlight

Hurricane Jose, the tenth named storm of this year, makes 1999 a typical year for Atlantic hurricanes. The typical Atlantic season consists of 9.8 hurricanes per year, with the last event occurring on or around October 21. As of yesterday, Jose had maximum sustained winds of 75 mph with gusts up to 90 mph. Jose is not expected to strike any land in the future.

Football

Continued from Page 1. straight win to open this season.

"We just wanted to throw the ball up in the end zone and see if Daniels could out-jump the guy," Tiller said of the final play-call.

Brees finished with 379 yards through the air, completing 31 of 48 attempts — but the most important toss of his day floated a few yards too far.

"We didn't have much room to work with, so I just tried to get it out there as fast as I could," Brees said. "The adrenaline was pumping, and I just threw it too far."

Despite a pinball-like first half in which Brees steered his team up and down the field almost at will, Penn State, well behind in almost every statistic, managed a 14-14 tie at the half.

Lions linebacker LaVar Arrington beat Boilers right tackle Brandon Gorin on a blitz, getting to Brees an instant before the junior got rid of the ball.

Arrington's shot knocked the ball loose

toward the end zone, which the junior All-American scooped up and hauled in for Penn State's first score.

Still trailing by a touchdown, Penn State finally knotted it at 14-14 on a perfect toss by Lions quarterback Kevin Thompson to streaking wideout Eddie Drummond, who carted in the pass for a 39-yard score.

Two quick touchdowns, one by Lions defensive end Courtney Brown and another Thompson touchdown strike, gave Penn State a 28-14 lead with five minutes gone in the third quarter.

But Brees and the Boilers clawed back, priming Purdue for its failed final-minute attempt.

"I thought we played a good game in a tough situation," Penn State coach Joe Paterno said. "I told everybody that this was going to be our toughest game of the year."

"Penn State has a great football team," Tiller said. "If they didn't, they wouldn't have won the football game."

Alcohol

Continued from Page 1.

However, Hulswit added, changes may be pending due to revisions in federal law.

"Right now, there is a piece of federal legislation that says that the university could inform parents about alcohol infractions but (university) officials are still deciding whether or not to adopt the policy," Hulswit said.

Purdue University is currently required to notify parents in instances where health and safety are concerned, said Tony Hawkins, dean of students.

"Since we already felt that we (Purdue) had that discretion, we are going to wait for the Department of Education before devising a definitive policy statement," Hawkins said. So far, response to the policy

changes is positive, Puzycki said.

"The students seem that, even though they might not agree with it or be thrilled with the manner of notification, they respect it and think it is fair," he said.

One Penn State student said he feels the university is taking the correct approach in taking the initiative to notify students' parents.

"I don't see anything wrong with it (notifying parents)," Michael Bazzar (sophomore-turfgrass science) said. "Most parents are helping to pay the tuition for their child to go here, so they have a right to know what their kid is doing."

Others question notifying parents. "There comes a point where parents lose authority over their children," Rob Hill (freshman-business) said.

Continued from Page 1.

Students seemed to agree with the philosophy of controlling enrollment.

A smaller student body could help with scheduling classes and other academic conflicts, said Nicole Monaco (freshman-architectural engineering).

"It would definitely help if less people were in classes," Monaco said. "It would also help for getting in touch with advisers."

Also, a large student enrollment could cause academic problems, said Baron Heimbach (sophomore-psychology).

Another problem at University Park that will be reduced by leveling enrollment is the lack of dorm space. A great number of students are placed in supplemental housing, said Alexis Stern (freshman-division of undergraduate studies).

"It's hard enough for a freshman to adjust without having to deal with it (temporary housing)," Stern said.
