TECHNICAL & COMMERCIAL STUDENTS

The most successful problem solvers look at things differently and see solutions no one else can. Who would have thought to use fish protein to stop gas freezing in subsea pipes? One of our people did. And right now we're looking for more people who can bring a fresh perspective to the energy challenge. We'll provide training, support and career choices to develop your potential. We'll get you working with some of our most accomplished problem solvers. And together we can help build a responsible energy future. Think further.
