A Story For Washington's Birthday

By EVERETT P. CLARKE

There are many noted points connect shops, is electrically driven. ed with the American Revolution in New Jersey. The main struggle began in Massachusetts, was transferred to New York and the bulk of it was fought a modern village of several hunout in New Jersey, the surrender being dred, residences, which were conmade in Virginia. After the battle of structed by the Rochester & Pitts-Long Island General Washington's central point-that is, when he was not In the field-was at Morristown, in a house which is now owned by a so of the mine. Many of the men own ciety whose business it is to keep it in heir own homes and reside at Hoorder as a memento of the Father of mer City, a beautiful spot just a His Country

Some ten miles south of Morristown is Basking ridge, where is situated one of New Jersey's historic homes. Dur ing Washington's occupancy of the house at Morristown a wedding occur he stopped at a house in a little place of his staff who were with him to ride interesting games, the past season within the town. on slowly and he would overtake them

Dismounting from his horse the gen eral entered the gate and asked for ad mittance by means of the brass knocker which in those days was used in stead of the modern bell. He was ad mitted by Miss Dorothy Hughes, the daughter of the person he sought.

"How now, Mistress Dorothy?" said the general, noticing that she was very Remaining uncalled for in the Inpale and all of a tremor. "What is the liana offic March 13, 1915:

"Nothing." stammered the girl, "exhonored by so important a personage hrist, Commercial Printing Co., as the commander in chief." "I fear you are exaggerating. Is your

father within?" "No. general. He went to Elizabeth-

town this morning. We do not expect his return till late this evening." General Washington thought a mo-

"Do you think you could deliver a

message to him when he returns?" "I fear, general, that I am a bit flustered at the honor of this call. I may not give your message aright."

"How is it, Mistress Dorothy, that not withstanding this high honor which you consider done you by the commander in chief you permit him to stand without invitation to enter?"

"Pardon me, your excellency; I did were advertised, giving date. not suppose that you would stop after hearing father is not at home. Will you be pleased to enter?"

"Only for the purpose of writing a FURK GOVERNOR VOWS message since you are not minded to deliver it verbally."

The girl led the general into the liv ing room, where she left him for a few minutes to go for writing paper and a the quill with his penknife sat down it Smyrna by Rahmy Bey, the liam C., of Marion Center, and N. heavy damask curtains, and his excel lency in order to get a better light moved one of them aside. In doing so his arm encountered a resistance oth er than wood. Throwing back the cur 'f tain, he exposed a young man in the uniform of a lieutenant in the British

The reason for Dorothy's agitation and unwillingness to admit him flashed upon Washington at once.

He regarded the young man sternly. then turned his gaze on Dorothy, who. white as a cloth, was supporting her self by a mantel over the great stone fireplace. The general saw at once that [he had discovered a pair of lovers.

"Don't fear. Mistress Dorothy." he said. "Fortunately your guest is in uniform. Had he come without the in signia of his office it would have been my duty to have him arrested and tried for being within our lines as a spy His object in coming is only too apparent- not to look at our forces and [our equipment to carry information of it to General Howe at New York, but | to feast his eyes on a very charming young lady." Then to the officer be [continued: "My position as an officer in the Continental army does not require me to make a mountain of a motehill by accusing you of intentions which you have not, but it does re quire me to take you into custody. Yet even that need not inconvenience you or shorten your visit. You are my prisoner. Give me your name and

"I am Lieutenant Ralph Harding of his British majesty's -th regiment

"Very well, lieutenant. Now give me your word of honor as an officer and a gentleman that as soon as you have finished your visit to my esteem ed friend, Mistress Dorothy Hughes, you will proceed to the British lines and will not bear arms against the Continental forces until you have been in duly exchanged."

An expression of relief, which was reflected in Dorothy's features, appear ed on the young man's face as he gave h the required promise. Washington in went to the table, wrote something and handed it to him. It read as follows: | Pass Lieutenant Ralph Harding of the British army without our lines

Lieutenant Harding turned his eyes from the paper to the man who gave it in "General," he said, "I don't wonder that the Americans revere you. Ac-

cept my heartfelt thanks." Then the commander in chief handed the message he had written to Dorothy and was turning to leave the room when she threw her arms around his

neck and sobbed her thanks. Within a month Harding was ex 2 changed for an American officer of pqual rank

FOG WIRES TO AID SHIPS.

Practical Demonstration Is Given Showing How Powerful Electric Voltage Will Detach Particles of Carbon and Other Material Substances From Gases Passing Up a Chimney.

A means of making Pittsburgh a spotless town, of doing away with London's fogs and of enabling safe navigation in thick weather was outlined in three papers read before the D. By whom are the electors members of the American Institute of Electrical Engineers at the closing session of the convention in New York. Electrical precipitation, a method first practically applied by Sir Oliver Lodge of England, was stated as the solution of these problems.

A practical demonstration showing how a powerful electric voltage will D. What does the Legislature detach the particles of carbon and other material substances from the gases passing up a chimney, thereby doing away with the objectionable smoke, was given in the auditorium. A quan-D. How many State in the un tity of lampblack was blown up through a fifteen foot smokestack placed on the platform. The flying particles filled the air. Then 50,000 volts were turned on, and at once the lamp-D. When was the Declaration black attached itself to the interior of the chimney and the air cleared.

By adjusting the voltage to the size of the smokestack to be treated factories will be made smokeless, it was said, and thousands of dollars that are now lost through smoke damage will be saved.

Moving Pictures of Fogs. Moving pictures of fogs and clouds

and their elimination as produced by electricity have been taken, it was D. Which is the capital of the said, to show the practicability of the plan to free London from the grip of the dense fogs and to eliminate a menace of sea travel. At the present time Sir Oliver Lodge is said to be working D. How many Senators has on a plan by which London will be each state in the United States strung with wires through which a high voltage will be passed and the fogcleared away. Engineers at the meeting agreed that the plan was not impossible and expressed great interest in

An unusual idea was suggested for removing the fogs from about ships at sea. A small aeroplane electrically propelled from a ship will fly about two boat lengths in front of the liner during the fog. From the flying machine will be strung a high powered electric wire reaching back to the ship. The current passing through the wire is expected to cause a precipitation of the ulation one to every 211,000, (the moisture in the air and clear a channel ratio fixed by Congress after each some 2,000 feet in advance of the ship and to some extent on either side through which the ship may safely pass. This will enable the lookouts to detect another ship approaching in time to maneuver the liner out of dan-

The patent rights on the discovery are owned by the Smithsonian institution at Washington and the Mellon Institute of Industrial Research of Pittsburgh. The income on the patents will be devoted by the institutions to furthering research work on scientific sub-

jects, it was said. The papers dealing with the discovery were read by Dr. W. W. Strong of Mechanicsburg, Pa., Arthur F. Nesbit, professor of electrical engineering at the University of Pittsburgh and electrical engineer of the Mellon institute, and Linn Bradley.
