GENERAL ANGELES.

General Felipe Angeles will be the next president of Mexico, supported by the United States government and the united choice of the belligerent factions which have been fighting since the exile of Huerta. This is the rumor current in political circles in Washington and was given every credence by diplomatic representatives of the Latin-American republics.

HANGED BY A GHOST.

Curious Story of a Murder and the Discovery of the Crime.

An old volume of the Quarterly Review mentions a crime discovered in a most extraordinary way in Australia in the year 1830, of which a public record is preserved and which figures with full details in the journals of that period.

The confidential steward of a wealthy settler near Sydney stated that his master had suddenly been called to England on important business and that during his absence the whole of his immense property would be in his exclusive care.

Some weeks after an acquaintance of the absentee settler riding through his grounds was astonished to perceive him sitting upon a stile. He strode forward to speak when the figure turned from him, with a look of intense sorrow, and walked to the edge of a pond, where it mysteriously disappeared.

On the morrow he brought a number of men to the water to drag it, and the body of the man supposed to be on his way to England was brought up. The steward was arrested, brought to trial and, frightened at the story of his master's ghost, confessed the crime, stating that he did the murder at the very stile on which his master's ghost had appeared. He was duly executed.—Case and Comment.

RUNNING UPSTAIRS.

Physical Energy It Expend Quoted in Horsepower.

To lift 550 pounds one foot in one second requires what is known as one horsepower. Similarly a horsepower is able to raise twice that weight one foot in twice the time, or one-half foot in just that time. Moreover, it can raise half 550 pounds one foot in half a second, or two feet in a second, and so on. Therefore when we lift one-fourth of that weight, 137½ pounds, four feet in one second, we are exerting a horsepower.

Accordingly, when a person who weighs 137½ pounds runs upstairs at the rate of four feet a second, he is exerting the equivalent of a horsepower. For a man weighing twice that much, 275 pounds, it would be necessary to climb at the rate of only two feet a second to exert a horsepower. It is possible to do much more.

TWINS BORN FAR APART.

Oddly Enough They Also Have Different Birthdays.

A boy and a girl, twins, were born in Alliance, O., on different days and at different places. They are healthy, and their mother, Mrs. Rosina Folgia, thirty-two, is doing well. The girl was born shortly before midnight in the Folgia home. The next morning Mrs. Folgia was taken to a hospital, where she gave birth to her son. He weighs ten pounds. His sister weighs six and one-half pounds.

NIGHT ATTACK REPELLED

Turks Hold Off Allies in Dardanelles. Land Operation Reports.

Berlin, March 29.—Included in the news items given out by the Overseas News agency was a story concerning the operations in the Turkish war zone reading as follows:

"Reports from Constantinople say the nocturnal attempts of the allied torpedo boat destroyers and mine sweepers to make another attack on the outer defenses of the Dardanelles were frustrated by the fire of the Turkish batteries.

"The report published in English newspapers telling of successes gained by the allied landing forces on the shores of Saros bay is a flat invention.

"Great indignation prevails in Constantinople because of the attempt of the British admiral to entice the governor of Smyrna by bribery to hand over the fortifications of Smyrna. The governor contemptuously rejected the offer."
