BE TACTFUL.

Talent is something, but tact is everything. Talent is serious, sober, grave and respectable. Tact is all that and more too. It is not a seventh sense, but is the life of all the five. It is the open eye, the quick ear, the judging taste, the keen smell and the lively touch. It is the interpreter of all riddles, the surmounter of all difficulties and the remover of all obstacles. Tact is a wonder worker.

#### The River Tigris.

The river Tigris appears in the book of Genesis as Hiddekel, one of the four "heads" into which the river of Eden was parted. The name by which we know it does not exactly "mean" tiger. for the correct way of putting it is that both "tiger" and "Tigris" mean in Persian swift as an arrow. "Euphrates" is a Greek version of the Persian Hufrat, which signifies "the good abounding" and represents the old Asiatic Burat or Purat, akin to our verb "pour."

#### Long Lived Tennysons.

The Tennyson family was noted for its longevity. Miss Matilda Tennyson died in her ninety-ninth year; Charles was seventy-one at the time of his death; Mary, seventy-four; Emilia, seventy-eight; Alfred, poet laureate, eighty-three; Frederick, ninety-one; Arthur. eighty-five; Horatio, eighty, and Ceeilia, ninety-two.

#### A Very Old Rule.

The oldest mathematic book in the world is believed to be the "Papyrus Rhind" in the British museum, professed to have been written by Ahmes. a scribe of King Ra-a-us, about the period between 2000 and 1700 B. C. This "Papyrus Rhind" was translated by Eisenlohr of Leipzig, and it was found to contain a rule for making a square equal in area to a given circle. It was not put forth as an original discovery, but as the transcript of a treatise 500 years older still, which sends us back to approximately 2500 B. C., when Egyptian mathematicians solved, or thought they had solved, the problem of squaring the circle.

#### The Hungarian Crown.

The Hungarian crown worn at their accession by the emperors of Austria as kings of Hungary is the identical one made for Stephen and used at his coronation over 800 years ago. The whole is of pure gold, except the settings, and weighs almost exactly fourteen pounds. The settings above alludfifty rubies, one emerald and 338 pearls. It will be noticed that there are no diamonds among these precious adornments. This is accounted for by the oft quoted story of Stephen's aversion to such gems because he considered them "unlucky."

#### A False Alarm.

"I know something, I do, about a member of this family," said little Bobby Slithers triumphantly to his older sister. Maud.

"Oh, dear!" exclaimed Miss Slithers. "Half a dollar is all I have, Bobby. to guess the author, but almost impos-Will you promise not to tell if I give you that?"

"Sure, I will," answered Bobby in surprise. "But it ain't nothin' on you, sis. It was the cook and the iceman." -Birmingham Age-Herald,

The Great Eastern. The dimensions of the one time worl famous Great Eastern were as fol lows: Length, 692 feet; width, 83 fee depth, 60 feet; tonnage, 24,000 tons draft when unloaded, 20 feet; whe loaded, 30 feet. She had paddle wheel fifty-six feet in diameter and was als provided with a four bladed screw pro peller of twenty-four feet diameter She had accommodations for 800 firs class, 2,000 second class and 1,200 thir class passengers, 4,000 in all. He speed was about eighteen miles a hour. The Great Eastern was finally broken up for old iron in the yea 1889 after a checkered career of som thirty-one years.

#### Arms and the Men.

"I see you have your arm in a sling," said the inquisitive passenger. "Broken, is it?"

"Yes, sir," responded the other pas-

senger. "Meet with an accident?" "No. Broke it while I was trying to pat myself on the back." "Great Scott! What for?" "For minding my own business." "I see. Never could happen to me, could it?"

"No." "And if it did I wouldn't be blame fool enough to tell it." Then there was silence in the car.-

#### Machine Guns.

Machine guns are really rifles with a mechanical feed, which supplies them rapidly with cartridges. In all modern patterns they are automatic in action. The gas produced by the explosion or shock of the recoil opens the breech, rifle, closes the breech and fires the charge. These complicated operations are carried out with extraordinary speed. To give an example: The Maxim can fire at least 450 rounds a minute, or more than seven shots per seced to consist of fifty-three sapphires, ond, and if in exceptionally good order and cleverly operated can discharge 600 rounds a minute.-London Tit-Bits.

#### Trap For Quotation Experts.

If any one wants a catch question to spring on a gathering of self confessed literary sharps let him ask whence comes the quotation, "One touch of nature makes the whole world kin." This is one of the six best sellers in the world of quotations, yet not one person in a hundred knows where it comes from. It is comparatively easy sible to find a person who can name the work.

One could build any number of par lor games around "One touch of nature makes the whole world kin." Try it --Spokane Spokesman-Review.

The "Bult." The origin of the word "bull" as the definition of a confused utterance is doubtful. Some philologists say it comes from the French boule-"fraud" -and others that it is derived from ejects the spent cartridge, loads the the Icelandic bull-"monsense." Many definitions have neen attempted, but the best probaby in that of Sydney' Smith. Writing of the difference between wit and "bulls,' he says: "Wit discovers real relations that are apparent; 'bulls' admit apparent relations that are not real The stronger the apparent connection and the more complete the real disconnection of the lord of all the followers of the proph ideas the greater the surprise and the et," "direct and only lieutenant op better the 'bull.' "

#### Lords and Commons.

An ancient English custom forbids the participation of a peer in the eiection of a commoner, so that when a general election is actually in progress the lords are oratorically muszled by a fiction that supposes them to be quite that threw the sightless mendicant to indifferent to the composition of the the ground. He was speedily assisted lower house, but until the candidates to his feet, however, by a waggish have been actually nominated the peers may use all the elequence with heard some remarkable stories of the which nature has endowed them for or feats performed by dogs, but this was against the issue involved in the ap- the first time he had ever known one proaching election.

Mighty In Titles. The ruler of Turkey in addition to the titles sultan and kha-khan (high prince and lord of lords), also claims sovereignty over most districts, towns cities and states in the orient, specify ing each by name and setting out in each of his various titles "all the forts. citadels, purlieus and neighborhood thereof" in regular legal form. His of ficial designation ends. "Sovereign also of diverse nations, states, peoples and races on the face of the earth." Al this is in addition to his high position as "head of the faithful" and "suprema earth of Mohammed."

#### A Canine Feat.

A blind man, guided by a large and athletic dog, went down the street the other day. Just as they turned a corner the blind man's dog saw a dog it knew and darted forward in a way passerby, who remarked that he had to pull down the blind.-Exchange.
