DINSMORE BROS.

Indiana Penn'a.

She Knew How to Do It.

Little Alice, coming home from school, said: "Oh! mother, I've learned to punctuate." "Well, dear, how is it done?" asked her mother. "Why, when you write 'Hark!' you put a hatpin after it and when you ask a question you put a button hook after it," she answered.

Flowers Owe Life to Insects.

In California are several sorts of flowers that would bear no seeds except for the visits and activities of insects. One of these is the yucca. A tiny moth lives in the flower and performs a peculiar work, intricate, but without which the yucca could not perpetuate itself through seeds.

In Danger.

A few days ago a five-year-old boy came with his mother to visit the latter's cousin. The first night, upon retiring, they were given a room which contained a folding bed, which was something new to the young man. He watched the process of opening, then got into bed, lay there, and thought for a few minutes, then looked up and said: "Mother, we will have to look out, for this bed has a self-starter, and is liable to go up on us."

Art of Love Becomes Art of War.

We have heard during this war a great deal of camouflage—the art of making things seem what they are not. But it is nothing new. The fair sex have been practicing the art for many, many centuries, and a little paint, a sprinkling of powder, a tuft of hair and a few ruffles will mislead a male observer just as easily today as when Mother Eve pulled the first leaf off the fig tree.

The Largest Diamond.

The largest diamond that has yet been found is the Cullinan, which was discovered in the Premier mine in the Transvaal in 1907 and weighed 3,025 1/2 carats, or one and one-third pounds, in the rough, and at that it was apparently only a fragment of a larger stone. In cutting this immense gem it was divided into nine large stones and a number of brilliants, the largest finished stone being only 516 1/2 carats.

Manifold Uses for Cotton.

In calling attention to the manifold uses for cotton, cotton seed and cottonseed oil, the Boston Herald mentions the following products: Photographic films, automobile windows, buttons, "ivory," artificial silk, combs, knife handles, trunks, book bindings, shoes, furniture, headwear, handbags, lard, soap, butterine, paints, rubber, gun cotton and smokeless powder used in explosives.

Get Out!

A red signal, to be locked into position on an automobile when its owner is not using it, has been patented by a New York man to call attention to the fact that it is being used by an unauthorized person.

No Time for Debate.

"Jibbes is the kind of fellow who never makes a move without first asking himself whether or not it will be good for his health." "I saw him jump six feet in the air yesterday to dodge an automobile. Instinct probably told him what was good for his health, without his stopping to debate the matter."

The Workers' Intellectual Life.

We make this suggestion to any employer in any large establishment: Find out what your employees read, what newspapers and magazines they take regularly, what books they call for in the public library, what lectures they go to, or would go to if they had the opportunity. Make a similar study of the reading matter and favorite diversions and mental pastimes of the men immediately in charge.—Industrial Magazine.

Taking All the Smell.

Dolly and Dick had saved their pennies and bought their mother a bouquet. In carrying it home Dolly kept smelling it constantly till finally Dick said: "There won't be no smell left for mama when we gets it home."

Why the Weather Bureau?

Why the weather bureau? This question is likely to be asked, in more or less querulous tones, whenever the local weather prediction falls, as it often does, says the Popular Science Monthly. The inquirer overlooks the fact that the weather bureau has much more important things to foretell than ordinary changes of weather. It predicts with certainty great windstorms, destructive floods, severe freezes and other atmospheric visitations that endanger life and property on a large scale and collects climatic statistics for scientific agriculture.

Voter's Catechism

- D. Have you read the Constitution of the United States?
 - R. Yes.
- D. What form of Government is this?
 - R. Republic.
- D. What is the Constitution of the United States?
 - R. It is the fundamental law of this country.
- D. Who makes the laws of the United States?
 - R. The Congress.
- D. What does Congress consist of?
 - R. Senate and House of Representatives.
- D. Who is our State Senator?
 - R. Wilbur P. Graff.

- D. Who is the chief executive of the United States?
