  - R. No.
- D. Who makes the ordinances for the City?
  - R. The board of aldermen.
- D. Do you intend to remain permanently in the U. S.?
  - R. Yes.

- FOOD CONTROL IN ITALY**
- Italy's present sugar consumption averages about 1.1 pounds per month per person, or approximately one-seventh the amount used in the United States.
- The manufacture of confectionery in Italy is illegal and a large fine is placed on the sale of candy and even powdered sugar for cakes.
- Supplies of eggs are limited and preference has been ordered, in their distribution, to invalids and nursing mothers.
- Sales of fresh meat to the public and to hotels and restaurants are prohibited on two consecutive days in the week.
- Dealers in foodstuffs such as vegetables and meats must display a list of their prices.
- Fish is being urged as a substitute for meat and salt fish is extensively used at the front.
- Feeding corn to hogs has been almost entirely prohibited.
- Hotels, cafes, dining cars are specified classes of other public eating places are required to furnish the police a copy of the bill of fare every day.
- The most pressing shortage in Italy is coal and the next is wheat.

**SI VENDE**  
Un magnifico piano in legno di rosa. Rivolgersi al N. 56 Fifth St.

**FACTS ABOUT WORLD FOOD.**  
In Europe fines up to \$500 are levied on persons who throw away stale bread.  
The success of food conservation in American homes depends entirely upon voluntary action.  
Our Allies are dependent on us for food because the route to North America is the shortest and the safest.  
Scarcity of ocean-going ships makes it important for us to export foods of concentrated value, such as meats, sugar, wheat, condensed milk and fats.  
The success of the Allies will depend largely on winning the war against food waste in this country. It is now being waged in 22,000,000 American kitchens. Are you winning yours?  
The people of the United States consume double the amount of fatty food needed for proper nutrition. Our European Allies are suffering privations from lack of sufficient fat in their diet.  
The war in Europe is a great co-operative effort of democracy to resist autoeracy. Democracy must win, but it can win only if all the people help by conserving meat, wheat, sugar and fats.

**ENOUGH FOOD FOR ALL**  
An important effort of the United States Food Administration is to regulate the handling of staple foods so there will be enough for all in spite of the large supplies sent abroad.  
Mr. Hoover recently stated, "We have and will retain sufficient food for all our people. There is no economic reason why there should be exorbitant prices. We are not in famine. It is obvious that our people must have quantities of food and must have them at prices which they can pay from their wage."  
The entire question revolves upon the successful substitution of foods that cannot be exported for those that can be readily handled

in this way and of course the saving of edible foods now being wasted.

**Dolly Dillon.**  
Dolly Dillon, denouncing dawdlers, disdained dashing Dick Dereritt, debonair dancer. Dick, despairing, defied decorum, dug ditches daily, duly demonstrating devotion. Dolly, delighted, discarded derision, discontinued disparagements. Dick's diamond decorates Dolly's dainty digit.—Christian Register.

**Plants Are Proliffo.**  
If all the seeds of any one sort of plant were allowed to grow they would soon cover the earth to the exclusion of all else. A single orchid plant produced more than 10,000,000 seeds in a season and many common plants, as the foxglove, very nearly equal this remarkable record.

**Costly Curiosity.**  
A friend of ours has handed us this interesting definition: Curiosity—Paying a thousand dollars to see your appendix.—New Haven Register.

**The First Garment.**  
Come to think of it, Eve must have worn a coat of tan even before the apple episode.—New Haven Register.

**Ground Squirrels.**  
More than 50 species and races of ground squirrels inhabit the United States and Canada.

**Plants on Defensive.**  
Though some plants assume the offensive and catch insects for food, others act on the defensive to protect them from being used for food. This special provision accounts for the presence of thorns, spines, stinging hairs, etc.

**Understanding.**  
More hate would be mellowed to love by intimate knowledge than would regard to disfavor. A smattering information is a treacherous possession. All it requires to effect better relations between nations as well as individuals is knowledge, and more knowledge.

**Lost Motion.**  
"I've climbed these stairs six times to see you, sir," said the bill collector. "Too bad, too bad," murmured Mr. Jobbles. "Now, what do you think of that, sir?" "Um. Well, I guess that comes under the head of lost motion."
