R. No.

D. What is an anarchist?  
R. A person who does not believe in organized government.

D. Are you a bigamist or polygamist?  
R. No.

D. Have you ever violated any laws of the United States?  
R. No.

## CALLS FOR MANY QUALITIES

Archaeologist Must Be Scholar, Linguist, Engineer, and Artist, and Expert Handler of Men.

The modern archeologist in Egypt must be more than a scholar. He must be familiar with what is known of the art and life of Old Egypt and he must have mastered the ancient language so that he can read the hieroglyphs carved on temple and tomb.

But scholarship is only part of his equipment. He must know something of engineering and something of drawing; he must have a sense of organization; he must himself be ready to turn to with pick and shovel, should occasion arise.

The task of disinterring ancient structures and their precious contents uninjured is a delicate one, not to be done hastily or haphazardly.

In addition to being scholar and engineer, linguist and artist, the modern archeologist must understand how to handle men. The men employed in archeological excavation in Egypt are usually boys from 10 to 20 years of age. Older than that, in a country where men and women age tragically fast, they are likely to be stupid.

Usually they are irresponsible and, spurred on by the light-fingered "antika" dealers in neighboring villages. The wise archeologist puts them on piece-work—so much for every cubic foot of earth removed, with bakshish, carefully calculated on the basis of the "antika" dealers' current rates, for every object unearthed.

Since the bakshish varies with the condition of the object, it is to the interest of the worker to get each "find" out entire, if possible, or if breakage is inevitable, with no part missing.

Half of the minor objects discovered go to the Egyptian government and half are retained by the institution conducting the exploration.

## WOMEN SMARTER THAN MEN

North Dakota College Reports Show Girls in First Place by 4.1 Per Cent.

Fargo, N. D.—Are women smarter farmers than men?

An announcement by the North Dakota Agricultural college would so indicate. During the spring term of 1920, women students averaged grades 4.1 per cent higher than men. The general average for all men was 80.8 per cent. The averages were for all departments. The women averaged 84.9 per cent and all students 82.3 per cent.

But the registrar's office, in giving out the averages, stated that in the college department the women's average was six points higher than that of the men and this brought up their general average.

## GLORY ACCRUES TO LEADER

To Be Remembered, One Has Only to Be First in Some Undertaking That Succeeds.

Adam's glory was in being the first man, and Eve's in being the first woman. They have been talked of through all the centuries for nothing except that they were the first to live, the first to be tempted and the first to fall.

And so it is with many other persons and events that find their places in history. Always it is the beginnings of things that shed glory on the participants. Christopher Columbus has just been honored again because he was the first to discover America, and the landing of the Pilgrims is celebrated because they were the first to colonize Massachusetts. Harvard rejoices in being the first institution of learning in what is now the United States and having set up the first printing press. The first settlers of any community are always persons of prime interest, and the first man to wear pantaloons or carry an umbrella, if living today, could coin money by putting himself on exhibition.

If one wants to be remembered, one has only to pick out the spot where a great city is to be built, or connect himself with an industry that is bound to grow, or do something that is bound to become the fashion. He is at once immortalized. Generation after generation will speak his name, and on anniversary occasions orators will sound his praise. He may be individually no greater than thousands who have come after, but the glory of having been the first will be upon him forever and a day.—Columbus Dispatch.

## Nervous Cow and More Nervous Pig.

It is little realized by the laity how much the health of animals affects our own, nor how much is being done in the veterinary world on this account. There is even published a large veterinary directory, but it is not difficult to imagine that a bull or a horse would require some patient handling when toothache set in. One veterinary has had a cow suffering from nervous shock. She could not bear anyone near her, and walked with a stiff, irregular gait, making the motions of stepping over an obstacle before she came to it. Sodium cacodylate and restful solitude in a darkened stall led to a complete cure. It is rather difficult to believe, but pigs also are delicate, nervous animals, and require more care than cows.

Equipped.

"Do you think your wife would excel in statesmanship if she had an opportunity?" "Yes," replied Mr. Meekton. "Henrietta is not only a powerful hand in a regular argument, but she has gifts for prolonged discourse that would make her a wonder at filibustering."
