The inventor knowing the danger apprehended on account of the flimsey manner in which Matches are generally packed in paper, has by the aid of New Steam Machinery of his own invention, succesded in getting up a safety patent square upright wood box; this box is far preferable, inasmuch that it occupies no more room than the old round wood box, and contains at least Two Hundred per Cent more Matches, which to Shippers is considerable advantage; it is entirely new, and secure against moisture and spontaneous combustion, and dispels all danger on transportation by means of Railroad, Steamboat or any other
