

Secretary Dobbin.—The incident to which the Hon. James C. Dobbin owed his Cabinet appointment is thus given in an exchange paper:  
“He was in the Baltimore Convention, and was the instrument of Gen. Pierce's nomination. On the 4th ballot Pierce had 55 votes, the largest number he had received. The 4th ballot commenced, and twelve States voted, with but slight changes from the previous ballot. Then, as the State of North Carolina was called, Mr. Dobbin rose, and in a timely speech announced that his delegation cast their votes for Franklin Pierce, which fact at once secured the nomination for the latter gentleman.”

A Clerical Horse Jockey.—A few days since a minister in Seneca Falls, N. Y., hired a livery horse and wagon to go a journey. He was absent two days, swapped horses six times, and came back to the stable with the same horse he took out, having made \$100 by his operations.

A Pedestrian Feat.—A party of pedestrians reached the Tip-top House, Mount Washington, N. H., on the 5th of August. Up to that time they had walked 184 miles. They climbed up to the summit of Mount Washington via Tackerman's ravine, &c., passing through the great snow arctic, which is 75 feet long, 10 feet high, and 25 feet wide!

Northern Cavalry at the South.—The Memphis Navy Yard grounds have been sold for \$600,000 to an association of Northern capitalists, who will establish thereon several factories and a repairing dock.

Ingenuous Mode of Escape.—On Saturday a convict escaped from the State prison at Sing Sing, N. Y., by throwing a plank in the river, on which he got astride, when his fellow convicts covered him with shavings from the shops. In this guise he floated with the tide past the wharves, and has not been heard of since.

The wheel of fortune is continually turning; those that are up to-day may be down to-morrow, and those that are down to-day may be up to-morrow, as witness the following:—A beggar girl, who solicited alms in the streets of Philadelphia, got taken to California, a few years since, grew into handsome girlhood, won the admiration of a millionaire there, was married to him, and has recently returned to Philadelphia, equal in beauty and wealth to any of those of whom she formerly sought charity.

The High Sea.—A vessel 64 feet high, by 41 feet wide, and weighing 4,000 pounds, has been constructed in the office of the Farmers' and Merchants' Savings Institution, in S. W. corner of the public square. Every body nearly in town has been to see it. Our friends from the country have been and are still dropping in, to see this, the largest Staff Boat ever constructed.

The Safe.—A safe for the deposit of the deposits they make is of the same character, and as extensive as those afforded by a bank to its depositors, the stockholders in the one and the other being in the same manner. The safe is kept in the vault, and the deposits are deposited there, thus affording a double security to those thinking of depositing their money where, instead of lying idle, they will produce interest in the Savings Institution.

There are occasions when even the healthiest people need medicine, the changes of diet, of the weather, and hundreds of other causes, produce a laxity in the system that needs correcting, or in other words, the liver becomes slightly deranged, and needs a stimulant. If all our ailments in this situation, we are sure to get relief, as we can testify to our efficacy in curing Brachide, Indigestion, Sour Stomach, and other ill humors in a family. It acts as a medicine, easier and better than any dose of pills we ever swallow, and is so mild that the weakest infant can take it.

Ward's Hair Restorative.—This wonderful preparation is having an extensive sale in all parts of the Union. It is one of the few patent medicines which are sold over the country that are really what their inventor claims for them. Wherever it has had a fair trial, the result has been precisely as Wood predicts. It has never failed to turn the white hair back to the natural color, where the directions have been strictly followed, and in a large number of cases it has restored the hair to its original color, where baldness had been pronounced that it would take the hair grow in every case, but where it falls there is certainly no remedy. The restoration of the hair has been effected in so many instances where the case seemed hopeless, that it is certainly worth while for the hair to be treated in this way. The experiment of using a bottle or two of Wood's Restorative.—[Mention Workman.]
