I shall, ent poultry henceforth.

CONNECTICUT YANKEE.

A writer in the Edinburg Journal of Agriculture, commenting on the views of Prof. Voelcker, as to the exposure of fresh manure on the surface of the of our exchanges. We have only to add ground, relates the following striking that the author of it ought to be conexperiment, made by a scientific man, for the purpose of testing expressly the | wicked perpetrator of the following: several methods of using manure:

"There being a difference of opinion among scientific men regarding the advantage of spreading dung upon the - surface, and leaving it exposed for some plough. No. 3 was treated in the men in the city.' same manner, with this difference, that the hoe was used instead of the plough. The same quantity of dung was carried to No. 4, and allowed to remain spread for three weeks on the soil before being covered in by the hoe. On the 10th of October the four lots subjected to experiment were sown with about 65 pints of rye seed each. The following are the total results of the crop of each lot, grain and straw included:

No. 1 produced 538 lbs. No. 2 produced 770 lbs. " 3 " 818 " " 4 " 936." The writer very justly remarks, that a single experiment should not be con- deferential to housewives ..

sidered conclusive, but that it is sufficiently striking to warrant a repetition of it on a larger scale.

Large Crop of Pointers. We perceive in a communication in the Ohio Cultivator, that A. R. Ivins, of Franklin county, in that State, raised, this season, from a measured balf acre of land, one hundred and ninety-six bushels of first-rate table potatoes, meais affixed. We heard, twenty years diskiver," ago, of 400 bushels having been obtain-
