Manures.

One great point with farmers should be to prevent loss of their barn manures by checking their fermentation. Strong manures heaped up, soon ferment and burn unless much extra matter is mixed in the pile. Some heaps heat so much as to turn white. They are "firefanged" as the old gardeners used to express it, and they are almost worthless when this excessive heating has been permitted. We incline to think that more of the essence of our manures oath, and where he would go if he is wasted by this fermentation—this told a lie. Important Discovery.

MONSUMPTION and all Diseases of the Lungs and Threat are positively Cured by Inhalation, which conveys the remedies to the cavities in the lungs through the air passages, and coming in direct contact with the disease, neutralizes the tubercular matter, allays the cough, causes a free and easy expectoration, heals the lungs, purifies the blood, imparts renewed vitality to the nervous system, giving that tone and energy so indis-pensable for the restoration of health. To be able to state confidently that Consumption is curable by inhalation, is to me a source of amelloyed pleasure. It is as much under the control of medical treatment as any other formidable disease : ninety out of every hundred cases can be cured in the first stages, and fifty per cent. in the second ; but in the third stage t is impossible to save more than five per cent, for the Lungs are so cut up by the disesse as to bid defiance to medical skill .-Free, however, in the last stages, Inhalation affords extraordinary relief to the suffering attending this fearful scourge, which annually destroys ninety-five thousand persons in the STILL COMING AT FAHNESTOCK'S.— United States alone; and a correct calculation We have just received from New York and shows that of the present population of the Philadelphia another supply of cheap Goods, earth, eighty millions are destined to fill the Consumptive's grave.
