### Gold Discovered in Lows.

"A great deal of excitement exists in the neighborhood of Charlton, in consequence of the recent discovery of gold in Clarke county. It was first discovered about eight miles north-east of Osceola, the county-sent, some eight weeks ago, and has since been found in three other places. Men are making from three to five dollars per day digging. It has been fully tosted and proves to be "real stuff," and is found in quartz rock, and fine black sand, similar to that in California. Many are now out prospecting through that county; with what success is not known, although the prospect seems very favorable.
