

Rural Economy.

The Time to Cut Wheat.

This has become a matter of careful experiment in England, and much more depends upon it than is generally supposed.

From a very careful series of experiments made in England, in 1849-51, by Mr. John Hanman, of Yorkshire, with a view of determining the proper period of reaping wheat, it was decided that the best time for performing the operation is, when it is in a "raw" state, or when the straw, as seen from a distance, appears green, but, closely examined, is found to be approximating to yellow, and the grain itself being separated from the chaff, is plump and soft, and not in the milky stage.

The chief advantages derived from this method are stated to be a greater weight of grain to a given space of ground, which produces more flour of a superior quality; the straw contains more nutritive matter, and is better relished by animals; and there is a better opportunity of securing the crop, and a saving in doing so, as there is less waste in moving or reaping the wheat at the dropping out of the seed.

It will be seen in this matter, how much a farmer's success depends upon an accurate knowledge of his business. Even in so small an item as the cutting of grain, the owner of fifty acres would lose three hundred dollars, by harvesting a few days too late. There are many other farm operations in which accurate knowledge is quite as important. Is it any wonder that so many of our farmers do not make money when there are a hundred holes in their pockets, through which the money is dripping out in dollars, dimes, and cents. The whole year is a scene of prodigal waste, for want of a little knowledge. Wood is wasted for want of a good stove, or a tight house. Ashes are wasted for want of a dry place to put them. Fodder is wasted for want of a tight barn to shelter cattle, in the winter nights. Manures are wasted for want of a barn cellar, and sheds, and absorbents. Labor is wasted for want of manure to produce maximum crops. Is it strange with all these leaks, that the farmer's till does not fill up faster?

—Homestead.

To Kill Barbed.

There are many ways to exterminate this pest, but the following is highly recommended: Let the plant grow until midsummer, when the stalks and leaves are full of sap. Then cut off the roots with a strong sharp sword, or two or three inches below ground, pluck off the plant with a smart pull, and stamp the ground firmly over the remaining stump. It will seldom sprout again; but if it does, it will be in so weak a state that another application of the spade will end the matter.

A Truthful and Cheap Barometer.

Take a clean glass bottle and put in it a small quantity of finely pulverized alum. Then fill up the bottle with spirits of wine. The alum will be perfectly dissolved by the alcohol, and in clear weather the liquid will be as transparent as the purest water. On the approach of rain, or cloudy weather, the alum will be visible in a flaky spiral cloud, in the centre of the fluid reaching from the bottom to the surface. This is a cheap, simple and beautiful barometer, and is placed within the reach of all who wish to possess one. For simplicity of construction, this is altogether superior to the frog barometer in general use in Germany.

A Remedy for Rats.

When a house is infested by rats which refuse to nibble at the usual baits, a few drops of the highly scented oil of rhodium, poured on the bottom of a cage trap, will almost invariably attract it full of the "mischievous vermin." We have known this to be tried with extraordinary success. Where a trap baited with all manner of edibles had failed to attract a single rat, the oil of rhodium caused it to be completely crowded night after night, until the house was cleared of them.—Exchange.

A Simple and Effectual Remedy for Diarrhea.

Take a large table spoonful of flour and mix it thoroughly with a little less than half a tumbler full of water. Drink it, and if the disease is not checked in half or three quarters of an hour, repeat until it is. It will soon arrest the most obstinate case, and cannot do any possible harm.

Wanting to Sell his Wife's Teeth.

The Norwich (Conn.) Courier says: A man, named Hyde, lost his wife one year ago. She was his third wife, and had been married only a year when she died. About one week ago, Hyde went to the cemetery, dug up the grave, broke open the coffin, and rifled it of a set of false teeth, that he might coin the gold plate upon which the teeth were set into money to put in his pocket. When she died he had attempted to remove the correct teeth from her mouth, but the rigid muscles would not relax, and he was consequently compelled to suspend operations for the time.

The Model Husband.

Mrs. Smith has a company to dinner, and there are not strawberries enough; she looks at Mr. S. with a sweet smile, and offers to help him (at the same time kicking him gently with her slipper under the table); but he always replies: "no, I thank you, my dear, they don't agree with me."

Who to Marry.

An Exchange remarks: "Never marry a girl who is fond of being always on the street, who is fond of running to night meetings—who has a jeweled hand and empty pockets—who will sew her mother's wash, and do up all work, and toil while she lies in bed and reads novels—leaves sickens—and is ashamed to own her mother."

You bachelors ought to be taxed.

and a lady to a resolute evader of the matrimonial. I agree with you perfectly, ma'm, was the reply; bachelors are a luxury."

The four front coils of life are said to be, standing collars, stove-pipe hats, tight boots and tobacco.

Restress & Winter.

NEW OXFORD, Adams county, Pa. Prof. J. H. Fowler, of the University of Pennsylvania, has been in the city of New Oxford, Pa., for the purpose of examining the wheat raised in Adams county, and for the purpose of examining the wheat raised in Adams county, and for the purpose of examining the wheat raised in Adams county.

Lumber and Coal.

THE subscriber informs the public that he continues the Lumber and Coal business at LITTLETON, Adams county, on a large scale, and has a large stock of White Pine Boards and Plank, Scantling, Framing Stuff, Plastering Lath, Shingles, Palings, &c., with all kinds of Store, Lumbermen's and Blacksmiths' Coal. Yard near the Depot. He invites the calls of the public, and will sell as low as the very lowest.

New Lumber Yard.

AT NEW OXFORD.—The undersigned has opened a LUMBER YARD, on a large scale, in the city of New Oxford, Adams county, where the Gettysburg Railroad has been already extended. His assortment embraces all kinds of Lumber—Panel, First and Second Common and Culling Boards, First and Second Common and Culling Plank, Hemlock, Spruce, Fir, Hemlock, Pine, Scantling, Plastering Lath, headed and plain Palings, &c., &c., &c.

He invites calls from those in want of Lumber, feeling assured that in quality or price his stock can't be beat. He will endeavor to receive a large share of public patronage. JACOB ALUBAUGH, Feb. 15, 1858.

The First of the Season!

MARCUS SAMSON has just received from the New York Auction Sales, a large lot of READY-MADE CLOTHING for spring and summer, which he is able to sell at prices unprecedently low. The new arrival consists of Frock, Sack and Raglan Coats, with Pants and Vests, in great variety, new styles and patterns—for Men and Boys. Call and examine the large assortment before purchasing elsewhere. Goods will be received from New York every few weeks throughout the season.—Inducements to purchase such as cannot be offered by any other establishment in the county are now, and will continue to be, offered. M. SAMSON'S, Opposite the Bank, March 29, '58.

C. H. McCormick's

REAPER AND MOWER.—I still have the Agency for C. H. McCormick's Reaper and Mower, and will offer to the Farmers this year two machines, the two-horse machine and the four-horse machine—and will guarantee fair charges and full satisfaction to any person who may want to purchase a machine. Any man purchasing a machine from me may work the machine against any other machine during hay-making and harvest, and if it does not give better satisfaction than any other machine with which it may be worked, they are at liberty to return it. Farmers will send in their orders to myself, at Fairfield: David Schwartz, at Littleton; or Franklin Hersch, at New Oxford, as early as possible, and say which sized machine they want, as we are taking in orders now for the coming season. J. S. WITHEROW, Agent for Adams county, April 12, 1858.

Fine Old Brandy.

THE subscribers, Importers and Dealers in the various kinds of LIQUORS, would most respectfully call the attention of purchasers to their Old Establishment, No. 5 North Front Street, Philadelphia, where they have a large assortment of Wines and Liquors of the choicest brands and qualities. Having made arrangements with some of the first houses in Cognac and Rochelle, enables them to furnish guaranteed pure and full satisfaction in every respect, and to furnish the most reliable and the following brands of Cognac and Rochelle. BRANDIES: Otard, Hennessy, Dubouché, F. Martell, J. J. Dreyfus & Co., T. Hines, A. Serravallo, J. A. Martell, &c., &c., of various kinds and qualities. WINES: Chateau, Madaira, Libanon, Old Oporto, Tokay, Burgundy, Hock, Malaga, Claret, Sherry, and Malaga Wines. Holland Gin, Seidelin Schuapps, Jamaica Spirit, Scotch and Irish Whiskey, Peach Apple, Blackberry, Cherry, Ginger, and various kinds of Cordials, Wine Bitters, Amsterdams Bitters, &c., &c., &c.

Now is the Time!

THE subscriber would inform the public that he has opened a CLOTHING STORE, in Chambersburg street, Gettysburg, near the Foundry, where he will have various kinds of Machines on hand at any time hereafter, such as Thrashing Machines, Corn Shellers, Corn Crushers, Clovered Cutters, Straw Cutters, and Harvesting Machines, &c., &c., &c. Two or three horses, to suit purchasers;—indeed all such as can be had at Hanover or Littleton. Also, Milling Machines, for house carpenters, put up in the very best and most substantial manner. Cutting Screws or long Blows, any kind or size less than eleven feet in length, always attended to, as well as Turning in iron, casting or wood. Also all kinds of REPAIRING on Machinery, dressing-up Mill Spindles, &c., done on the shortest notice.

I hope that all in want of anything in my line will call at my Shop before going elsewhere. I will warrant all my work to give satisfaction to purchasers. DAVID STERNER, March 29, 1858.

New Goods.

IN HEIDELBERG.—P. A. & G. F. ECKENROBE have just returned from the eastern cities with a large stock of Dry Goods, Groceries, and all kinds of Hardware kept in country stores. They have splendid articles of Sugar for 7, 8 and 9 cents, and olives in proportion. They have on hand also a large assortment of Boots, Shoes, Hats, Caps, &c., the latter articles all being kept up stairs, as they have not room below in the store.

All goods bought of them in the Men's Wear line will be cut free of charge. Tailoring done with neatness, and ready dispatch, by J. A. Brechner, Tailor. Goods bought elsewhere will be cut or made up at the shortest notice and on reasonable terms. Give us a call before purchasing elsewhere. P. A. & G. F. ECKENROBE, Heidelberg, April 26, 1858.

New Goods.

AT THE NEW FIRM OF PAXTON & McILHENY, at the South-East Corner of Centre Square.

The subscribers would respectfully inform the citizens of Gettysburg and the public generally, that they have just received, and are now opening, a very choice selection of Hats and Caps, consisting of Oxford's Philadelphia Spring Style, Milkskin Dress Hats, unsurpassed for neatness of shape and elegance of finish; Felt, Fur and Wool Hats, of all colors and styles, together with complete assortment of Men's and Boys' Hats, and a large assortment of the most fashionable styles, all of which will be offered at very low prices. Also, Straw Goods of every variety and style. These goods were carefully selected and bought for cash, which will enable them to sell at very low prices. PAXTON & McILHENY, to May 10, 1858.

Important Discovery.

CONSUMPTION and all Diseases of the Lungs and Throat are positively cured by Inhalation, which consists in directing the air to the cavities in the lungs through the air passages, and coming in direct contact with the diseased, neutralizes the tubercular matter, allays the cough, causes a free and easy expectoration, heats the lungs, purifies the blood, imparts renewed vitality to the nervous system, and restores the patient to health. To be able to state confidently that Consumption is curable by inhalation, is to me a source of unalloyed pleasure. It is as much under the control of medical treatment as any other form of disease; ninety out of every hundred can be cured, and the mortality is only one per cent. in the second; but in the third stage it is impossible to save more than five per cent. for the lungs are so cut up by the disease as to bid defiance to medical skill.—Even, however, in the last stages, Inhalation affords extraordinary relief to the suffering patient, and is a good source, which immediately destroys the tubercular matter, and is responsible for the restoration of health. To be able to state confidently that Consumption is curable by inhalation, is to me a source of unalloyed pleasure. It is as much under the control of medical treatment as any other form of disease; ninety out of every hundred can be cured, and the mortality is only one per cent. in the second; but in the third stage it is impossible to save more than five per cent. for the lungs are so cut up by the disease as to bid defiance to medical skill.—Even, however, in the last stages, Inhalation affords extraordinary relief to the suffering patient, and is a good source, which immediately destroys the tubercular matter, and is responsible for the restoration of health. It is as much under the control of medical treatment as any other form of disease; ninety out of every hundred can be cured, and the mortality is only one per cent. in the second; but in the third stage it is impossible to save more than five per cent. for the lungs are so cut up by the disease as to bid defiance to medical skill.—Even, however, in the last stages, Inhalation affords extraordinary relief to the suffering patient, and is a good source, which immediately destroys the tubercular matter, and is responsible for the restoration of health. To be able to state confidently that Consumption is curable by inhalation, is to me a source of unalloyed pleasure. It is as much under the control of medical treatment as any other form of disease; ninety out of every hundred can be cured, and the mortality is only one per cent. in the second; but in the third stage it is impossible to save more than five per cent. for the lungs are so cut up by the disease as to bid defiance to medical skill.—Even, however, in the last stages, Inhalation affords extraordinary relief to the suffering patient, and is a good source, which immediately destroys the tubercular matter, and is responsible for the restoration of health.
