So wide is the field of its usefulness and so nu-merous are the cases of its cures, that almost every section of country abounds in persons pub-licly known, who have icen restored from alarning and even desperate diseases of the lungs by its use. When once trid, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer tosistate what autionte to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies throust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afficient they can never forget, and yroon the afficted they can never forget, and pro-duced cures too numerous and too remarkable to be forgotten. - PREPACED BY
