Scrofula, or King's Evil; is a constitutional disease, a corrup.ion of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously not destroy. The scrotulous tant is variously caused by mercurial disease, low living, dis-ordered or unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the venereal infection. What-ever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation ;" indeed, it seems to be the rod of Him who save. "I will visit the iniquities of the fathers upon this children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sorcs. This foul cor-ruption, which genders in the blood, depresses public, that acts as a Cuthartic, casier, milder, and more effectual than any other medicine known. It is not only a Cathartic, but a Liver remody, acting first on the Liver to eject its morbid matter, then on the stomthe energies of hife, so that scrofulous constitu-tions not only suffer from scrofulous comach and bowels to carry off that matter, thus plaints, but they have far less power to with-stand the attacks of other diseases ; consequently, vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination ; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or

and indeed, or all the organs, area invested are aggravated by the same cause. One quarter of all our people are scrofulous ; their persons are invaded by this lurking in-fection, and their health is undermined by it. To cleanse it from the system we must ren the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

Bisease. Bo wide is the field of its usefulness and so ru-merous are the cases of its cures, that almost every section of country abounds in persons pub-licly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape becaution, and where its whereas known, the other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no konger hesitate what antidots to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits² on the afflicted they can never forget, and wroon the afflicted they can never forget, and pro-duced cures too numerous and too remarkable to
