### Miscellaneous.

### Bullets in Battle

In the late battle of Solferino, between the Allies and the Austrians, it is computed that three hundred and fifty thousand soldiers were engaged for at least sixteen hours. Of these. three hundred thousand were armed with muskets. Suppose each one fired once in ten minutes, or six times an hour, then the number of shots fired was twenty-one million six hundred thousand; or it once in five misutes forty-three million two hundred thousand-i once in tan minutes, then only one shot tells fatally in seven hundred and twenty; if once in five minutes, then only one in fourteen hundred and forty; because the number killed from the beginning to the termination of of the battle was less than twenty-five thousand Austrians and fifteen thousand Italians and French. Add to the twenty-one million six hundred thousand shote, the tens of shousands of balls discharged respectively by the Austrian and French pieces of ordnance, then how comforting the truth that not much more than one ball in a thousand tells fatally in the battle field—a thousand fall harmless at the soldier's feet.

A Curious Fact .-- If an acorn be suspend ad by a piece of thread within half an inch of the surface of some water contained in a hyacinth glass, and so permitted to remain without being disturbed, it will in a few months burst and throw a root down into the water and shoot upwards its tapering stem with beautiful little green leaves. A young oak tree, growing in this way on the mantel shelf of a room, is a very interesting object. We have seen several oak trees, and also a chesnut tree, thus growing; but all of them, however, have died after a few months, probably owing to the water not being changed sufficiently often to afford them the necessary quantity of nourishment from the matter con-

The breathing will almost instantly be relieved. Soon as possible let the sufferer drink as much as it can; then whipe it dry, cover it warm, and soon a quiet slumber will relieve all anxiety." A friend of ours who has repeatedly tried this remedy informs us that it never failed to afford almost instant wave."

Snake Among the Poultry .- A correspondent of the Fredericksburg Herald, writing from Madison county, Va., mentions the following lowing as "a fact" which occurred there recently. It is one of those "facts" which are stronger and harder to believe than moderate

A lady hearing an alarm in her hen house proceeded to ascertain the cause, and found a very large black snake. She sent immediately for her husband, who shot its head off, and upon examination found it contained three eggs, seven chickens, and had swallowed a hen as far as the wings. A few days after, another was killed in the same place, and its body contained fifteen eggs.

## "Some Snair."

The Huntingdon American of last week is responsible for the following remarkable snake stories :-- A couple of weeks age we no ticed the fact that Mr. John White, jr., of this borough, came upon a den of snakes, on Warrior Ridge, and succeeded in kiling four of them. This week we are able to chronicle snake slaughter that exceeds anything o the kind we ever heard of. One day last week, whilst Mesars, James Watson and Conrad Buff were engaged plowing a field belonging to the farm of the former, in Woodcocl Valley, about six miles from this place, they plowed up a nest of snakes, and from the appearance of the ground, as the reptiles made for safe quarters, in all directions, they thought that they had trespessed upon a world of snakes, as the earth was completely covered for the distance of several yards. They immediately stopped their horses, and made an onelaught on them, and after about fifteen minutes hard labor, counted the killed, and found they had the number of eighty-twosixty-two vipers and twenty blacksnakes. Since the above was in type, Mr. John Stonebreaker, of Franklin township, has informed us of a snake story that takes the "spots off" the above, and anything we have ever heard in the snake line. Mr. Hampton, of the above township, one day last week, was engaged in quarrying stone, in a quarry close to the turnpike road, and observing two or

kill them, but as he approached they secreted themselves under the rock. Not wishing them to escape, he got his hammer and broke off a portion of the rock, when he beheld a den of copperheads. He procured a club, and succeeded in killing one hundred and eight! He says as many more got away. How Much will Fill a Pig .- The Lynn News is to be held entirely responsible for the

"A neighbor of ours was trying to convince another ne ghbor that it was better to buy large pigs in the Spring than small once, as the former would out little more. One of his reasons was the following: Last Spring I the other against the Union. Present partought a little pig from a drover, and he was good for eating, but wouldn't grow much.—
He got so after a week or two, that he would eat a bucketful at a time, and then, like Olimprovement of rivers and harbors, the dispersion of the present particle of t ver Twist, call for more. Well, one morning tribution of the proceeds of the public lands, I carried out a water backet full of dough, &c.; but these systems of policy, springing and after he had swallowed it all, I picked out of the administration of the Government up the pig and put him in the same bucket I had fed him from, and the little varmint didn't portance if that Union is to be dissolved,—
had full it up."

Persevere, persevere," said an old lady friend of ours to her help, "' tis the only way you can accomplish great things.' One day eight apple domplings were sent down stairs, and they all disappeared. "Sally, where are those dumplings?" "I managed formed, I ANNOUNCE MYSELF AS A MENDER OF stairs, and they all disappeared. "Sally, where are those dumplings?" "I managed to get through them, ma'am," replied Sally. "Wby, how on earth did you manage to eat so many dumplings?" "By persevering, ma'am," was the meek answer.

The Opposition, whose doctrines, if they were incorporated into the policy of the Government, would be like a millstone 'round the neck of foreign born citizens, have lately made a great ado about the rights of those citizens. These illatant hypocrites are wonderful friends of the foreigner, so far as talking goes, but when it comes to acting, where do we find them? In the dens of Know Nothingism, conspiring against the rights of those citizens; in the streets of Baltemore, Louisville. and New Orleans, shooting down voters of foreign birth! The Democracy guarantee (whilst the reins of government are in their hands) equal protection to all classes of citizens, without distinction of birth. Even now the President and his Cabinet are demanding the liberation of a naturalised citizen, a native of Handver, who, whilst on a visit to his native land, was forced into the army against his will. The opposition appear determined to "open the slave trade," "pass a slave code," and " oppose popular sovereignty" for the Democrats, as the latter will do none of these things themselves. Really, the miserable shifts the opposition are put to to " make up a case" are amusing, but not alarming. The old stories about Democratic enormities, horrible purposes, &c., &c., are rife again.-Once they were accused of forming a plot to burn all the churches in the country; then of Slave Code for the Territories. The Hegroes and the Republicans. We mentioned the fact, a couple of weeks since, that the negroes were about to hold a convention in Massachusetts, to determine upon what course to pursue in the approaching Presidential election. They met, an I the result of their deliberations is to give their assistance to the Republican party, as it more nearly represents their own views and interests than any other party which will likely be formidable in that contest. They thus call upon that party to consult its own interests by extending to the darkies the right of suffrage wherever it is able to do so :

Resolved, That, in view of the fact that in several States of the Union where the Repulican party is in the ascendant, the elective franchise of colored citizens is denied or its privileges abridged, we would carnestly call upon that party to take a manly position up-on this and correlative questions, that they may deserve what they would undoubtedly receive—the suffrages of all voters who love

the cause of freedom.

Resolved, That this convention would recommand colored voters to press these claims upon the Republican party, that, if defeated, it may not be any fault of theirs.

# Trouble in the Camp.

The "United Opposition" appears to the getting daily into more and more difficulty in respect to the Massachusetts doctrine of two can people who, without caring much about years' denial of the right to vote to persons of party politics, have had a hereditary reverence foreign birth after naturalization. A disposition to protest, on the part of the American branch of the aforesaid Unity, is quite outspoken and decided in various quarters. This is a point which, to the United Opposition, is oursly intestinal, and stands to outsiders only in the relation of a subject of rational curiosity and innocent recreation.

# Hickman's Last.

John Hickman, of Chester, the orator, mouth-piece and "great man" generally, of the Forsey-cators in Penusylvania, declared in a speech made in Chester, a few days ago, that he "would sooner vote for two decent niggers than for the Democratic candidates, Wright and Rowe!" Hickman has improved fast in niggerism, since he placed himself under the training of the Black Republicans. But, then, no man ever became associated with the leaders of that party, who wasn't willing, after feeding a few months on Black Republican pap, to vote for a negro, or do any other "dirty trick" to beat the Democracy. Hence the aforesaid Hickman's preference for "two decent niggers." We hope the people will re-member that this is the same Hickman who made a speech at Harrisburg at the Disappointed-Office-seeker and Whiskey and Flour Inspector's Convention, held in April last. and which speech the Black Republicans will, doubtless, circulate during the coming cam-
