Miscellaneous.

Force of Imagination. Buckland, the distinguished geologist, one day gave a dinner after dissecting a Mississippi alligator, having asked a good by many of the most distinguished classes to dine with him. Ilis house and all his establishment were in good style and taste. His guests congre_ated. The dinner table looked splendid. with class, china and plate, and the meal commenced with excellent soup. "How do you like the soup?" asked the doctor, after having Inke the soup?" asked the doctor, after having finished his own plate, addressing a famous gourmand of the day.—"Very good, indeed!" answered the other. "Turtle, is it not? only ask because I do not find any green fat." The doctor shook his head. "I think it has something of a musky taste," said another—"not unpleasant but poculiar!" "All alligators have," replied Buckland, "the cayman reculiary so—the fellow whom I disaceted. peculiary so—the fellow whom I dissected this morning, and whom you have just been eating!" There was a general rout of all the guesta. Every one turned pale. Two or three ran out of the room; and only those who had stout stomaches remained, to the close of an excellent entertainment. "See what im-agination is," said Buckland; " if I had told them it was turtle, or terrapin, or bird's nest they would have pronounced it excellent, and their digestion been mone the worse-such is prejudice!" "But was it really an alligator?" asked a lady. "As good a call's head as ever evore a coronet!" answered Buckland.

"Except the Captain."

Passing the pantry of his boat, Captain Birch overhoard one of the cabin boys indulg-ing in animadversions on the officers and

requested to call on the Heirs, residing thereon. A clear title and possession will be given on the first of April next.

He turned a severe countenance upon him and said:

"Young man, hereafter when you have

anything to say about any one on the boat, please except the captain! A few days after the captain happened to be on deck; the same cabin boy carried past If hot sold on said day, the property will him a dish prepared for the table, when a hog running between his extremities, completely upset hus, effectually disbursing the prepared food. Picking himself up with a most rueful countenance the boy commenced berit ing the hog-"You are the most miserablest hog I ever seen," when, catching a view of the captain and remembering his injunction, had a secure berth on Captain Birch's boat

Tall Leaping.

" Bill, do you see those two houses?" "I do. "Well, Bill, perhaps, you won't believe

me, but-you see those two houses?" " Certainly I see them." "I can take my boots off and jump over them."

Over your boots! Humph! so can I. Jim I'm some at jumping. I can leap higher than "Ifigher than a meeting house! A meet-

ing house is pretty high."
"But A can leap higher than a meeting house." 'No you can't."

"I can leap higher than a meeting house -how high do you think a meeting house can leap. Jim?" Get out, Bill."

Boys.-The boy, said a philosopher, is the east understood of anything in the animal kingdom. Not long ago the mother of a juvemile acquaintance of ours, had occasion to empty the pockets of the youngster, while he was asleep. The following is an invoice of the contents: A broken jack knife, three nails, two pieces of brick, an orange peel, one spool, one marked postage stamp, several marbles, three or four buttons, ditto fishing hooks, an old steel pen, a piece of China ware, and two cigar stumps. With such a fortune the deat of the United States.

A member of the Mississippi Legisla ture, at one of its late sessions, introduced a bill to change the name of a certain County in that State to Cass county. One of the opposition moved as an amendment, that the letter C be stricken out of the proposed name. This motion created some laughter at the expense of the member offering. Nothing daunted, however, he arose in reply and said: Mr. Speaker, this is the first instance that ans come to my knowledge in which a member had the assurance, upon the floor of any legislature, to propose to name a county af-

A fellow who wanted a job of sprinking a street in Troy, N. Y., and was refused on account of his exorbitant price, got a pair of horses and "exercised" them at full speed up and down the street for about an hour, uising a cloud of dust and compelling every one in the neighborhood to close their windows and go to dusting.

"Married couples resemble a pair shears," says Sydney Smith, "so joined that they cannot be separated, oft'en moving in opposite directions, yet always punishing any one who comes between them.

An exchange, noticing the present of silver cup to a cotemporary, saye: 'He needs no cup. He can drink from any vessel that no cup. contains liquor, whether the neck of a bottle, the mouth of a demijohn, the spile of a keg or the bung of a barrel.'

A Threatened Difficulty.

There is a prospect of another misunderstanding between the United States and English governments. By the last intelli-gence from the Pacific we learn that the United States government had taken possession of the island of San Juan, of the entrance of France river, on the Pacific.—A fair idea of the nature of the controversy which has led to this, step on the part of our government, is conveyed by the annexed explanation. The matter calls for immediate adjustment :

The treaty of 1846 provides that the line separating the British and American territories should commence at the summit of the Rocky Mountains, in latitude 45 degrees, to which point it had been previously brought from the east, thence run westward with the 49th parallel to the middle of the Gulf of Georgia, thence southward with the main channel to the Straits of Fuca, and through the middle of those straits to the ocean. Now, it so happens that between the point where the line leaves the 40th parallel and the point where it enters the Straits of Fuca there is the Archipelago de Haro, through which several large channels run; the two main ones being the Rosario Strait and the Caual de Haro .from the ocean to Fraser river, but the latter is the widest, though obstructed by some

small islets.

Both are wide channels, deep enough for the largest ships. Between them lie a dozen islands, the chief of which are San Juan, Lopes and Orcas Islands, and altogether they may include 200 square miles of land, or 128,000 acres. San Juan Island is the most valuable, and has about 70,000 acres; much of it is good soil, covered with fine grass .and the Americans say the Canal de Haro is cupy San Juan Island as a sheep pasture.

The Next Census.

Next year the eighth census of the United which the Government has to perform. A timely suggestion is made by the National Intelligencer which is worthy of considera-tion, and which we quote in the bope that it may be heeded before the census takers shall be called upon to discharge their duties. The suggestion is this:

That each furmer this fall, as he gathers his crops, shall keep something like an accurate account of the quality and value of the same: and if he will take the trouble, to make out a statement of the names and ages of his servants; the number of his horses and mules; the number of bales of cotton, barrels of corn, bushels of wheat, oats, rye, corn, harley, potatoes, &c., and the value of each; and ticket, leave it some place where any snember of the family, who may be at home when the deputy marchal shall call, can readily get hold of it. It will save time to all concerned and very

It starts out with a lie, ends with a lie, and every sentedes and paragraph is a lie. We pass over a stereotyped attack upon slavery in the States, in which the Republicans profess to have no concern, but are constantly meddling with, to reach the grand climaz of audacity, in the following passage which would be ri-

diculous, if it were not so outrageously false: The requirement of the passage of a slave code for the Territories, by Congress, is now boldly put forth, and has received the recognition of that large division of the "Demo-cratic party," which adheres to the National Administration in this State and elsewhere.— It is an issue which must be met, it is for you to declare at the polls your decision upon it. You cannot oppose it, and at the same time this State, not excluding the Star and Sen-tined, were quite earnest, a month or two ago, in Pennsylvania. In personal qualities we can speak for Mr. Douglas as being a most estimable and worthy man, and if merit—moral, social and political—can entitle a man to the good opinions of his fellows then is he worthy of their highest esteem. That he is a man of intelligence, and sterling honesty of character, possessing all the requisites to make a safe and sagaciout Legislator no one, where he is known, will attempt to deny. As a Democrat he stands above reproach. No man has more firmly advocated and stood by than Mr. Douglas. He has always been a willing worker in the Democratic cause, and its men and its measures have ever found jus him an efficient and devoted friend. We much mistake the signs of the times if his siasm in the party rarely equalled, and which will leave no room to doubt his triumphant election in October .- Chambersburg Spirit.
