ALL'S FOR THE REST.

All's for the best! be sanguine and cheerful, Troubles and sorrows are friends in disguise Nothing but folly goes faithless and fearful; Courage forever is happy and wise; All's for the best-if man would but know it; Providence wishes us all to be blest; This is no dream of the pundit or poet;
Heaven is gracious; and—All's for the best.

All's for the best! set this on your standard, Soldier of sadness, or pligrim of love, Who to the shore of despair may have wandered, A way furing swallow, or heart-stricken dove; All's for the best! be a man but confiding, Providence tenderly governs the rest, And the frail bark of his creature is guiding, Wise and warily, all for the best.

All's for the best! then fling away terrors, Meet all your fears and your foes in the van And in the midet of your dangers or errors, Trust like a child, while you strive like a man All's for the best ! unbiased, unbounded, Providence reigns from the East to the West, And by both wisdom and mercy surrounded, Hope and be happy that—All's for the best!

The Warning Voice of George Washington.

On the 17th of September, 1796, sixty-three years ago, George Washington published to the people of the United States his Farewell Address. That memorable document is real estate of the defendant sold upon Alias among the richest legacies bequeathed by Vend. Exponss in the name of Isaac Trimmer, that great patriot to his countrymen. It was the dving counsel of the most illustrious man and succeeding generations. In the circumstances which elicited that address-the exalted character of its author—and the patri-otic and profound lessons of wisdon it inculcates-the author and the document remind as of Moses delivering his farewell charge to the children of Israel. We wish that every one, in this solemn and important crisis of our country's history, would take the trouble of perusing this hallowed and consecrated state paper, since many of its passages are so strictly applicable to existing circumstanso strictly applicable to existing circumstan-nes, that they seem almost to have emanated their son, a key eleven years of age, to take from a purplet relied up by heaven to mind care of the fromse. At a late hour in the from a prophet raised up by heaven to point out the shoals and quickenede that now threa-ten to destroy the ship of state.

The one idea which seems to have absorbed the luminous mind and pulpitating heart of Washington, when he penned his Farewell Address, was to impress upon his countrymen, then and thenceforward, the imperative neces-SILV OF PRESERVING INVIOLATE THEIR BOND OF UNION, and the chief danger which would assail and jeopard it. In proof of the clearners and the graphic and soulfelt eloquence, with which he gave utterance to his admonitious, we quote a leading passage from that address,

which reads as follows :-"The UNITY OF GOVERNMENT, which constitutes you ONE PEOPLE is dear to you. It fice of your roal Independence—the support of your safety, of your prosperity, of that very than robbers, were besieging the house. liberry which you so highly prize. What a beautiful picture of Christianity has been drawn by Mary Howitt. She says that, like a child, it goes wandering over the world. Fearless in its innocence, it is not abashed before Princes, nor confounded by the wisdom of synods. Before it the bloodstained warrior sheathes his sword, and night murderer turns from his purpose, and, like the heart smitten disciple, goes out and weeps bitterly. It brings liberty to the captive, joy to the distressed, freedom to the fettered, repentance and forgiveness to the sinner, hope to the faint-hearted, and assurance to the dying. It enters the hut of the poor man, and sits down with him and his children: it makes the poverty-stricken contented in the midst of privations, and leaves behind an everlasting blessing. It walks through great cities amid all their pomp and splendor, their overweening pride and their unutternble misery, a purifying, ennobling, correcting and redeeming angel. It is alike the beautiful companion of childhood, and the comforthing associate of age. It enpobles the noble: gives wisdom to the wise; and adds new grace to the lovely. The patriot, the priest, the poet, and the eloquent man, all derive their sublings power from its influence.

Somebody has said, " courage is more than cash, and an up head more than a bost of friends." I believe in that doctrine.—
Show me a man or woman with courage, energy, and ambition, and I will show you one who will succeed in life. With courage and time deter our progress. Energy levels the mountain and raises the plain; courage quails not before the greatest difficulties. If you have not succeeded as you had hoped, never be disheartened. The true estimate of an individual is not determined by accidental or occasional achievements or failures, but by his every day conduct; and he who makes firm resolution to conquor in life, well do it. I have strong faith that every one can be what he or she resolves to be.

Boots are said to have been invented by the Carisns. They were at first made of leather, afterwards of brass or iron, and were proof against both rust or cut. It was from this that Homer called the Greeks brazenfooted. Formerly, in France, a great foot was much esteemed, and the length of the shoe in the fourteenth century was a mark of distinction. The shoes of a prince were two feet and a half long, those of a baron two feet, those of a knight eighteen inches long. The trouble now days is to get them short enough.

A Singular Story.

Alexander Dumas has lately published a singular story concerning the late Czar Nicholas, of Russia, vis: That after the disastrous news from the Crimea of Russian defeats, the Casr resolved to die! Should be retrace his footsteps and abandon his policy, he would have to give the lie to a reign of thirty years. Should he persist in carrying on the war, he would ruin Russin. On the morning of the 18th, the Emperors wallowed the poison, after which he sent for the Grand Duke Alexander—now Emperor—and told him all. The latter would have cried out for help, but the Emperor prevented him by an order so positive that, as a son and subject, he could not disobey his father and his sovereign. Then the Emperor explained to him in detail the motives which induced him to take this heroic step. The young Prince, broken-hearted, the tears streaming from his eyes, his utterance choked by sobs, listened to the dreadful narrative on his knees, and clasped his hands, exclaiming, "my father! my father!" The Emperor would not allow him to quit his side until he had obtained from him a solemn promise to let death take its

Conversion of an Abolitionist,

OR, THE NIGHT AFTER MARRIAGE. The most bigoted and unreasonable party man I ever met with, says a St. Louis editor, was Jack D., now a prosperous and in-

fluential attorney. Jack was a red-hot abolitionist, and his chief pleasure seemed in making the fact as notorious as possible. His friends and associates with one consent, pronounced Jack a bore, and his politics a nuisance, but with a stranger the thing was essentially different. Seized by the buttons at the moment of introfor two months, a dose of poison strong enough to kill him, but yet weak enough to and branch out into an interminable shared, and branch out into an interminable shared and branch out into an interminable rhapsody on the manifest destiny of the great Nigger

The wedding was over and all the guests had departed, the happy pair had retired to their chamber and were snugly ensenneed in hod, when Jack in the course of a quiet converantion with his wife, unwittingly alluded

to his favorite subject by casually speaking of himself as a Republican. "What?" exclaimed his wife, turning course without attempting to stop it. But the instant the young Prince was out of the a Republican?" What?' exclaimed his wife, turning sharply and suddenly towards him, " are you a Republican?"

"Yes," replied Jack, delighted with the idea of finding a patient listener to his long restrained arder. "Yes, madam, I am a Republican, attached to the principles of the

That the very wife of his bosoms should prove a traitor, was horrible; she must be jesting. He remonstrated, but in vain; tried persuasion, 'twas useless; entreaty, 'twas no go; she was in earnest, and the only alternative left him, was a prompt renunciation of his heresy, or a separate bed in another room.

Jack did not hesitate. A Boiled Dish.

Almost every family has a dinner, as often as once a week, of what is popularly called a "boiled dish," and which, properly cooked, is one of the best dishes in the world; but all cooks do not know the best way to boil corned beef. The common method, in order to make it tender, being to put it in cold water, and let beef and water come gradually to boil.-This certainly makes beef tender, but it also extracts the strength and juice. A better way is to wait till the water boils before putting in the beef; it will then be equally tender; duction. Jack would astonish him by a rapid and will retain all its strengthening and juicy properties. Many housekeepers suppose that putting ment in hot water inevitably renders it hard and tough, and so it will, if the water s only hot; but if it hoils the effect will be the reverse. Just as putting a discolored table cloth in hot water will set the stains; but pot it in boiling water and it will take them clean out. The same rule applies to all boiled meats. Hams, after boiling four or five hours, according to size, should be taken out, the skins taken off, and cracker or bread he became assiduous in his attentions, forgot crumbs grated over them, and then baked in a brisk oven for one hour. A leg of mutton for awhile his "principles," and without incan be treated successfully in the same way, only it does not require to be boiled so long. Of course, the boiling process should be gentie.-Mrs. J. C. CROLY.

> Ginger Crackers .- A pint of molasses, two cups of butter, one and a half of augar, one teaspoonful of saleratus, and two of ginger add flour enough to make it easy to roll out. Stir the butter and sugar together, boil the molasses and pour it into the pan, and stir steadily until the butter and sugar are melted, then put in a few handfuls of flour and add the saleratus. Stir in a few minutes, and then work in all the flour. To be rolled very thin, and baked but a few minutes.

Softening Hard Water .- Some twenty years ago, a well was dug twenty feet deep, on the Cottage Hill Farm, near Ravenna, Ohio. It contained eight feet of water—after being stoned—the earth about which was hlue clay, and the water was very hard.—)
This serious defect was cured entirely, and the water softened permanently, by putting in debt, or in love. You will get wet if you into the well about four feet of gravel of the size of beans and upwards.

How to Promote Fruitfulness in Barren Trees.

Awful Catastrophe-Seven Females Burnt to Death .- The fuse factory of Joseph Toy, in Simsbury, Coun., took fire at about half-past seven o'clock on Tuesday, and was entirely destroyed. The fire started in the lower part of the building while the employees were at work in the upper story, and the flames spread with such rapidity as to cut off all chance of escape, consequently seven females were burnt to death, and two others, together with a boy, the son of the owner, so badly injured that it is believed that they cannot sur vive. The names of the dead as far as ascertained are: Catharine Brissey, of New York in something decided, for about midnight State, Mary Jane Bacon, of Simsbury, Han-three distinct raps were made at his wife's nah and Harriet Head, (sisters,) two other females names not ascertained, and a married

woman named Lampson.

i may be asked, as I have been asked when I would consent to a dissolution of the Union. I answer, Never! never! never! If the agitation in regard to the fugitive slave law should continue and increase, and become alarming, it will lead to the formation of two parties, one for the Union and the other against the Union. * * And the platform of that Union party will be the Union, the Constitution and the Enforcement of the Laws. * * I announce myself in this place a member of that party, whatever may be its component elements." --- Henry Clay.

Remarkable Spot on the Sun .- It is stated that a spot of remarkable size is now visible on the surface of the sun, more than sixty thousand miles in dismeter, or eight times screen. The area occupied by this distur-bence of the sun's surface is about three thousand millions of square miles, some fifteen or sixteen times the size of the whole surface | yet lie still.

Some merika age we explied from the Bos-ton-Medical and direction Journal an account of the great straight of Dr. Windelip, of Reabers; Manuscrimetts. The gentleman af-ter greatesting at Hillward University studied medicine; but we believe that he is destined mediane; but we believe that he is destined to effect a greater revolution by his lectures on physical culture and by his practical exempRimation of the same, than by pills and powders. In many towns and cities, at the fast, gymnasia spring up from the new impulse which he has given to the subject of bodily training. It appears that from a youth of sixteen years it has been his drawn his of sixteen years, it has been his dream—his ideal—which he is now endeavoring to realize to stir up the community to the importance of this subject.

The medical journal to which we have al-

ready aliaded stated that in June of this year, Dr. Windship lifted, without apparent effort, 827 lbs. more than a foot from the floor, and afterwards iron plates amounting to \$27 lbs. We see, however, by recent New England journals that, after one of his late lectures, he lifted several nail-kegs, filled with their heavy contents, whose combined weight was 1,032 lbs. Topham, the old English Athlete. and Beain the Belgian giant, each lifted 800 lbs. We believe that it might now be said with safety that Dr. W. is the strongest seem in the world. Four years ago he could lift but 500. He shoulders a barrel of flour with the ease that an ordinary man places in the same position a bushel of potatoes. This he considers more difficult than the dead lift of the enormous weight mentioned above. Perhana our New York frequenters of the gymnasia will have a more ready appreciation of Dr. Windship's powers when we state that he holds up with one hand a dumb bell which weighs 164 lbs. The strongest man our city has produced, so far as we know, was one who thus held up a dumb-bell weighing 130 lbs. We are glad that Dr. W. has excited so much interest on this subject, and hope that he will come this way.—N. Y. Jour. Com.

Alleged Homicide in a Gaming House.—Washington, Dec. 25th, 1859.—Charles W. Raborg, associated with the importing house of Hartzell, Market street, Philadelphia, met with a violent death in this city, by being knocked down and stamped on the head and face at Gordon's Salutation House. Raborg, with his friend Bligh, assistant at the Kirkwood House, were together and met with John Essex and Charles Polkinhorn, of this city. The four retired to an upper room, for Raborg and Essex to play cards. Over the table they quarrelled; Bligh hastened for the proprietor, and whilst he was down, heard the fall and stamping. Raborg's head and face were severely injured. He died a few hours afterwards. An inquest was held and the jury rendered a verdict that deceased came to his death from blows and stamps inflicted by John Essex, and that Charles Polkinhorn was present aiding and abetting.
