Papering Rooms.

The Scientific American remarks that many lives have been lost from the laziness or ignorance of paper hangers, who have laid one paper bove another, instead of tearing off the old before hanging the new. There was a very handsome house near one of our provincial towns, which could never keep its tenants. At last it stood empty and became worthless, because a detestable fever seized upon every family that lived in it. A ready-witted observer promised the owner to find out the cause. He traced the mischief to one room, and presently conjectured what was the matter there. He let a slip of glass into the wall, found it next day dimmed with fætid, condensed vapor. He tore down a strip of paper, and found abundant cause for any walls had been papered afresh, without the removal of anything underneath. And there was the putrid side and the fomenting old papers inches deep! A thorough clearance, scruping and cleaning put an end to the fever, and restored the value of the house.
