Literary Notice.—One of the most interesting and useful publications which come to our notice is the Scientific American, a weekly publication, devoted to popular science, new inventions, and the whole range of mechanical and manufacturing arts.

Those of our readers, who may not be familiar with the character of the paper, will state some of the subjects of which it treats. Its illustrated descriptions of all the most important improvements in steam and agricultural machinery, will commend it to the Engineer and Farmer.

The Scientific American is universally regarded as the inventor's advocate and monitor; the repository of American inventions, and the great authority on law, and all business connected with Patents.

A New Volume commences on the 1st of July, and we hope a large number of our townsmen will avail themselves of the present opportunity to subscribe. By remitting \$2 by mail to the publishers, Messrs. C. & G. Park Row, New York, they will send you their paper one year, at the cad of which time you will have a volume which you would not part with for treble its cost.

A Thorn for the Rose.—At the late Woman's Rights Convention, an argument, decidedly in favor of the "oppressed sex" (this is probably an allusion to the female element of our population) had the right of taking part in elections and of serving on juries.

Lincoln and the Mexican War.—"Lincoln," the celebrated Mexican correspondent of the New Orleans Delta, writing shortly after the delivery of LINCOLN'S speech in Congress against the Mexican war, and referring to those who had made anti-war and anti-national speeches in Congress, said: "If they had Mexican muskets on their shoulders, they could not assist the Mexicans as much, or do us as much harm, as they have done by their speeches. In the name of God, will the politicians of our country never cease gambling for the presidency upon the blood of our countrymen? Our army dreads no danger; nor do they fear to die in defence of their country; but they do dislike to be sacrificed to the unwholesome ambition of aspiring politicians and political knaves. Is there no way by which our friends at home can put a stop to the unpatriotic conduct of politicians who would sacrifice the whole army in order to give tone to the next presidential election? The army will defend and fight the battles of the country. Then let their friends at home defend them from the injuries arising from such speeches as those, or the conduct of such men."

Dear Sir:—I feel it my duty as well as my pleasure, to state to you the following circumstance, which you can use as you think proper. A gentleman of this place, (a lawyer), has been declining ever since his early youth, so much so, that he could not get on his feet, and he was induced to use a bottle of your "Hair Restorative," which he liked very much; and after using some two or three bottles his hair grew out again, and he has been able to get on his feet, and he is now a hale and hearty man. The gentleman's name is Bradford, and he is very well known in our adjoining counties, many persons can testify to the truth of this statement. I give it to you at the request of Mr. J. W. Wood, who has a great deal of your "Hair Restorative" in his and the adjoining counties if you can sell the proper agents. Yours, &c., THOMPSON BURKHOR.

M'Cormick's Reaper and Mower.—HIGHLY IMPROVED FOR 1860.—Constructed from the first on correct principles, it has always been eminently successful, and with its present improvements fully meets all the requirements of the age, it now defies all competition.

Farmers who may desire it are at liberty to work one of these Machines through the harvest season, and they will find it to be the best of its kind, and the most economical. The Machine is now perfectly balanced, not leaving a pound of weight on the horses' necks; its execution in reaping and mowing, in both wet and dry, is perfect; it cuts the wheat neat, and as new made with the lightest draft of any Machine now in use. It is so constructed that the labor of raking off is very much lightened, a castor wheel, on an entire new principle, on the grain side, wholly relieves the horses from the pressure of the machine from strain in turning; and is so arranged that the cutting bar is completely and easily thrown over obstructions while in motion by the driver without the use of levers and complicated machinery. A very practical and important feature in its improved construction is its perfect arrangement for separating and clearing the track in mow run.

It is the most simple, most substantial, most durable, and in every way the most complete and important Mower in the world, and as such is warranted. The Two-horse Machine (with easy draft for two horses), cuts a swath of feet wide, and the Four-horse Machine a foot wider. For particulars address Fairfield, Adams county, Pa., Agent for Adams county. Col. R. S. PATRICK, Canvassing Agent.

The various parts of the Machine for Reaping will be kept on hand at convenient prices. June 4, 1860.

E. Ball's REAPER AND MOWER FOR 1860.—I am the manufacturer of the best of these Machines this year, which I offer to the public. All I ask of those wishing to purchase machines, is to give me a trial. I am satisfied to let my machines recommend themselves. I know they are all right, and I have had them in use in York, Pennsylvania, for last week, that almost astonished me. I think J. H. Shireman must be hard up in making sales, or is very much excited and afraid of the Ball Machine. The Ball Machine is the best of its kind, and I think I own the corn.
