We have up to make sales," when he offers his succines which we offer for next fail sales. We have for a less price than the same Machine is offerably by the manufacturers of the same Machine? I agent for this county, who is authorized to make sales and take orders.

FAIR MOUNT NERSERIES having been earlied, or a fraid of the Ball Machine." I would inform may friend and the public, that I tablished for more than 20 years, the Propries

was at the greatest practical field trial of Respers tors flatter themselves that their trees are of the and Mowers over held in the United States, at best selected kinds, having fruited many of Syracuse, 300 miles west of New York city, in them, and knowing what they are. The great-July, 1857, when all the different Machines were ly increased and increasing spirit of planting, tried, in every shape and form, and after all as well as the degree of patronage extended to was over, the first premium, grand gold Medal us, warrant us in greatly increasing our nurand Diploma, was awarded to the Buckeys series, so that we are prepared to offer for the Machine as the best Mowing Machine, over autumn of 1860 and succeeding years, a much Burrell's, Hallenback's, Kirby's, Heath's, Ho- more extensive stock than ever offered before vey's, Ball's Ohio Mower, Manny's, Ketchum's, -cultivating from 35 to 40 acres, containing and a number of others. I have no reason to several hundred thousand trees at various be excited or afraid of the Ball Machine, after stages of growth, all of which are grown on it has been linked at such a great trial.

before he ever knew anything about it.

thing, by saying that some of his Machines were that persons wishing to purchase fruit can see lying in the fence-corners "-that was the me. The cultivation of good fruit of all kinds report. I can't say that I saw one of his Ma. has been entirely too much neglected in this chines exactly in a fence-corner, but I did see county. The demand for good fruit is very one of his Machines in a field—where I started much on the increase.

JOHN BURKHOLDER. in a fence corner out of the road.

5th. My friend denies that he made the Ball Machine last Summer, and states that I knew it. I don't know what he called his Machine at the end of the Season, but at the beginning of it.

Jacob Bastress and Charles F. Winter, in the cry was Mr. Hoffheins is making the Ball the Produce, Mercanille, Coal and Lumber Respectant Coal and Lumber Respectant Coal and Lumber Respectant Coal and Lumber Coal and Lumber Coal and C Resper and Mower. Now I can't see where business, is this day, by mutual consent, dis-Resper and Mower. Now I can see where pusiness, is this can have originated from than from solved. All accounts will be settled by J. It Tells You Mr. Hoffheins himself, the maker of the Machine. So, if I misrepresented that, I think my friend can blame himself for it; men wanting Machines will generally enquire the name of it, and whose patent it is. Now, Mr. H., what was the name of your Machine at the end of the season?

the driving wheels last summer and could not make them work, the agent says he told Mr. H. that we could not make quite as nice a sheaf as our other way of raking off, which is quite a different story from what Mr. H. says. We wish him not to make so many changes in his state—

JACOB BASTRESS, ments. We made only one Machine last season to cut behind-he says Machines: and as for entting, if our friend will ever make a Machine to equal it he will do well. All that was ever said in regard to its working the raking off in grain, I had aix different men on to rake off, and all agreed that they could make the nicest sheaf with the cutting operation in front. My friend charged me with misrepresenting, but he can beat me far at that. He asks why not make my Machines to cut behind? I am ready to make all that are ordered, and insure them to cut as well as any other double driving

wheel Machine. Mr. H. talks about his Machine being so perfectly balanced, having no weight on the tongue at all. From my practical experience I think that any fool must know that a Machine EXACT-LY balanced, standing on level ground, must tilt up cutting up hill. I den't want mine so well balanced as that, because we don't want to get off the Machine and walk up the hill to rake the grain off. We prefer riding on the Machine all the time to rake off. Now, farmers, which will suit you best, a Machine that will tilt up go-ing up hill, or one you can stay on all the time? If the latter, you can get them at my shop; and further, a Machine that you sit in front of cutting apparatus, so if you are by accident thrown off you are in danger of being cut up, as I know of two cases having happened on a Ma-chine that you set behind the cutters. If LOCKS and Je-thrown off of my Machine you are entirely out of danger. If the latter suits you best, you can

get them at my shop.
Now, my friend Hoffheins, Do not get excited at these few lines. Some day we will have a mowing match, In some tangled clover-patch. And whoever can do the best mowing, Will have all the chance for blowing When the mowing match we attend, I expect to meet you as a friend.

J. H. SHIREMAN.

East Berlin, June 4, 1860. tf

More Light. OU may talk about your Gas lights just as you please, but there is one thing certain, H. G.
