Ladd, Webster & Co.,

131 BALTIMORE ST., BALTIMORE, MD., Manufacturers of Improved Tight-stitch SEWING MACHINES,

for Families and Manufacturing Establishments. Let Manufacturers, Planters, Farmers, Housekeepers, or any other persons in search of an instrument to execute any kind of Sewing now done by machinery, make sure they secure the best, by examining ours before purchasing.

☞ Samples of Work sent by mail.

WHAT CONSTITUTES A GOOD SEWING MACHINE?

1. It should be well made, simple in its construction, and easily kept in order.

2. It should make a TIGHT LOCK-STITCH, alike on both sides of the material.

3. It should sew any and all materials that can be sewed.

4. It should be able to use Cotton, Thread, or Silk, directly from the spool.

5. It should be able to sew from coarse to fine, and from thick to thin, with rapidity, and without changing the tension.

6. It should be able to make the tension greater or less, on both the under and upper threads, and with uniformity.

7. It should have a straight needle; curved ones are liable to break.

8. The needle should have perpendicular motion. This is absolutely necessary for heavy work.

9. It should be capable of taking in the largest pieces of work.

10. It should be able to bind with a binder, hem with a hemmer, should stitch, fell, run and gather.

11. It should be always ready to work.

12. It should be capable of using the same size of thread on both sides of the work, and of using different colored thread or silk, above or below, to correspond with any two colors of cloth to be united.

13. It should be able to make a long or short stitch.

14. It should be able to fasten off the seam, and commence sewing tightly at the first stitch.

15. It should run easily and make but little noise.

16. It should have a wheel feed; none others are in constant contact with the work.

17. It should not be liable to get out of order.

18. It should not be liable to break the thread, nor skip stitches.

19. It should not be necessary to use a screw-driver or wrench to set the needle.

20. It should not be liable to oil the operator's dress.

21. It should not form a ridge on the under side, nor ravel out, nor be wasteful of thread, as is the case with ALL CHAIN-STITCH machines.

22. It should not be "more trouble than it is worth."

23. Finale, all of these advantages are possessed by our Sewing Machine.

Sixpence a Day,

ENOUGH FOR A FORTUNE.—A London paper states:—There is now in an Almshouse at Bristol an old man who states, that for sixty years he spent sixpence a day in drink, but was never intoxicated. How much would this sixpence a-day put by every year at five per cent. compound interest amount to in sixty years? enquired a thoughtful neighbor. Putting down the first year's saving (365 sixpences) equal to $13 54, he added the interest, and this went on, year by year, until he found that in the 60th year, the sixpence a day reached the startling sum of $14,336 28. Judge of the old man's surprise, when told that by *saving his sixpence a day, and depositing it in* a Savings Institution he might now, at the end of 60 years, have been worth that noble sum $14,336 28, which would have bought him a fine farm, or town mansion, and surrounded him with comforts and luxuries, and left a handsome estate to his children after him. He had, and hundreds now in our midst have, but to deposit sixpence a day in the FARMERS' AND MECHANICS' SAVINGS INSTITUTION OF ADAMS COUNTY, to accomplish this result.
