A Silver Mountain.

The excitement concerning the new'y discovered silver mines, says the Oregon City Argus, on the head-waters of the Molalia, seems to be getting intense. Parties are continually arriving in town, making their outfit, and departing for the silver regions. A party from town went out this week and re-turned, after each one had taken out a claim of one hundred feet front, running to the top of the mountain. The amount of silver sup posed to be there is almost fabulous. D. P. hompson, Esq., one of the returned party, thinks the mountain is a mass of silver or containing probably hundreds of millions of the mineral-or at any rate double as much as there is in the Santiam mines, which were stated by us to-amount to 100,000,000 of tons. which, at \$5,333 to the ton, (estimated.) would give \$5,333,000,000. Supposing the Molalla silver mines to contain 200,000,000 of tons, and to be equally as rich as the Sansiam ere, there is no question but they are worth \$1,066,600,000,000.

A Monster Press .- The Scientific American thus describes a monster steam press, upon which Moses S. Beach, who has just retired from the New York Sun, is at work:

He is even now just completing the construction of a monster steam printing press, by in seinted on both sides, at the rate of forty thousand impressions an hour, folded up, unted and delivered from the machine, ready for the carrier and the mail.
