THE SERIES OF NORMAL ARITHMETICS, By Edward Brooks, A. M., Professor of Math-TOWN Property

The subscribers offer for sale and making engagements with the subscriber, their property on the North side of East this Flour, Bacon & Grocery Store, in West York street, in the Borough of Gettysburg, bounded by an alley on the West and in the Nov. 2, 1800. 4t

| Nov. 2, 1800. 4t | Street | S will receive in return by express, free of other unnecessary with a more perfect Text Book.

The series above named has been published but a short time, and yet within a few months, without advertising or puffing, the demand amounts to almost one hundred thousand co-

pies. Some of their advantages may be briefly stated, as follows: 1. They contain more new matter than any similar series.

2. They exhibit a number of new arithmetical solutions to problems that have heretofore

3. The matter is arranged more philosophican be reproduced on porcelain wares or Vascs | cally than in others, and is therefore better of every quality of finish, ranging in price from | adapted for instruction. 4. No suljects or phrases, signs or figures, are infroduced in lessons previous to those in which N. B .- Be particular in writing the address, they are fully explained, and the pupil is thus led along without the necessity of frequent and troublesome explanations on the part of the "Manager, American l'hotographic Porcelain Co.," 781 BROADWAY, New York. teacher. Very few elementary works have this

5. New modes of Teaching are suggested throughout the series, and under the name of "Social Arithmetic," curious and interesting problems are introduced; which may be used with advantage in wakening up the attention, Hair from turning gray.

6. The key is not only what its title imports, but it is also a complete treatise on the art of it, when there is the least particle of vitality or tenching Mental Arithmesia; being filled with

recuperative energy remaining.
