Russia, while in London on his way to St. Petersburg, addressed a letter to the Lon-

don Times on American affairs, in which he endeavors to enlighten the English people concerning the nature of the conflict be-tween our Government and rebellion. In

most particulars he states the case clearly. "We do not propose to subjugate the revol-

ted States," says he, "we propose simply to put down the rebel citizens. We go to the

rescue of the loyal Unionists of all the States. We carry safety, and peace said liberty to the Union-loving people of the South, who will of themselves (the tyranny

overthrown) send back their representa-

tives to Congress." In all this Mr. Clay represents the prevailing designs and expectation of the North. But in answer to the inquiry, "Where should British honor place her in the contest?" he undertakes to

peak not for the whole people but for the Republican party when he says:

"We overthrow that political element in America which has all through our history

been the studied denouncer and real hater of the British nation, while we have been always from the beginning the friends of

half of our Government on the ground that

the present Administration was elevated to power by the friends of England, is discret-

itable in an American Minister, whose post tion makes him the representative of the whole nation and not of a political party.

But appeals to British honor are worse

than useless. England is governed by her interests, and her policy with reference to this country may be expected to conform

thereto. Because the moral sentiment of the English people is against slavery it has been rashly inferred that her sympathics would be entirely on the side of our Government

-and much surprise and disappointment

is expressed because this expectation has not been realized. But England may ap-

ways be trusted to follow her commercial interests wherever they may lead, whether

to make war upon China for the purpose of drugging the Celestials with opium, or to procure supplies of slave-grown cotton by

encouraging the rebellion of the Southern States., Her rulers lay aside philanthropy

when it comes in conflict with interest. The whole history of England with relation to this country is an illustration of this truth. She forced 300,000 naked barbarians from

Africa upon the Colonists in spite of their remonstrances, and this established slavery in America. After the abolition of slavery

in the West India Islands she promoted

the agitation of the question in the United States, and contributed men and money to keep this firebrand alive among us. Now

after this agitation has culminated in open war, true to her selfish policy she turns the cold shoulder to our Government and leans

affectionately towards the South, because

she has a greater interest in cotton than in

the maintenance of the government. And
