I feel it to be my duty to call your attention to the permisions, practice of leaving many bills to be hurried through at the close of the session. During the last ten days of the last session, 390 bil s were presented for my signature, many of them of the most important character. The whole number of hills, presented for me curing the session was 715. In consequence of this hebit, not only are bills passed without an of portunity to either House for a proper consucration of their provisions, but the Executive is com-pelled either to sign them without examination, or to hold them over perhaps to the public inconvenience. It was often happen that a bill not approved by reason of a single obnoxious clause, might, if there were time, be repassed, omitting the objectional provision. I must refer to mother mischief. General laws have been passed to give relief in NO. 16. cerium cases which formerly required a spe-pial act in each case. As for instance the sale of lands by executors, administrators and trustees, the adoption of childrens the creation of mining and manufacturing corporations, and so forth. These laws were nassed to ensure such an examination in each care as would enable justice to be done to the parties and to the public, and also to save the time and expense consumed in private legislation. They have hitherto effected neither purpose, but I do seriously tirge on the Legislature the consideration that whoever applies for a special act under such circumstancas must either four the result of an impar-
