Now as a practical man I propose to weigh t and measure it, that we may thereby obtain a more definite idea of its immensity. "A silver dollar measures, 12 inches in diameter ; \$8 placed edge to edge will make one foot in length, and \$42.240 so placed will make one mile in length. The earth is 21,600 in circumference. It would, therefore, require \$912.384.000 to go once ound it. This vast sum must be multiplied by four and four-tenths to make it equal the amount of our national debt, which would make the silver dollars go round the earth's circumference four times, and cover 8.640 miles besides. Allowing a silver dollar to weigh an once, 16 to a pound, 2,000 counds to the ton, our debt would weigh
