----THE NOMINATION.

The name of George B. McClellan is presented to the American people as a candidate to occupy the Presidential chair on the plutform of the Union and Constitution. One more worthy, to be trusted, more able to sustain the reegonsibilities devolved on him, could not be found in the country. The irreproachable man, as he was styled a few days since by a radical paner, the young and accomplished soldier and defender of the Union, the American citizen of strangely mature statesmanship, the scholar, the Christian, the man, is demanded for the highest service in this country. Ho is a man,

svery inch of him.

And he will be elected. The signs of the times leave no doubt of it. Neither extreme of polities can be expected to command the n-nited vote of the people, and it is, therefore, eminently fortunate and well judged, that the con vention should select a mun who is known by his published letters and papers to be one of the soldiers of the Union, who was taking a complete view of the political as well as the miliary condition of the country, and who has never failed to understand the relations which each bore to the other-who views war only as a means to peace, and who will waste no blood or life if he can save the Union by other means. The good men of all parties will unite on McCkellan. The samy who love him as of old with faithful affection, will sustain him. The pation, under his lead, will emerge from the trial of blood into peace and prosperity. The Union will be restored. The Constitution will he restored. The Constitution will he act tablished. The affections of a divided for he established. The affections of a divided fam-

of the separated will be knit buguther.

In this nomination we see the first strong glow of light on the future. It is like clear supshine breaking through clouds and storm, with the wind freshening from the westward.

We shall have a cleur sky before high noon on this beloved land, and the mid-day of our glory will not know thy more such hours of tempes-

tudes alony, then, to the work, young men and the more than, to the work, young men-and the mon! Your leader is young, but he is all the wight, calm injudgment, strong in act. His name with ring through the land as when he lid the house as fautetam. He has twice, you mirror, saved she capital. Call him now to the nation!—Journal of Commerce,

I, ELIZABETH BRANSON, of Brandywine, Del., formerly of Old Chester, Del., do certify that, for one year end a half I suffered everything but death from that awful disease called Dyspepsia. My whole system was prostrated with weakness and nervous debility; I could not digest my food; if I at even a cracker or the sm liest amount of food, it would return just as I swallowed it; I became so costive in my bowels that I would not have a passage in less than from four and often eight days; under OR RA'S, MICE ROACHES, ANTS, BED tirely to give way. Hearing of the wonderful cures per-formed by Dr. Wishard's Great American Dys-pepsia Pills and his treatment for Dyspepsi, my husband called on Dr. Wishart and stated my case to him. THE peculiar taint or call Scroftla lurks in the constitutions of multitudes of men. It either produces or is produced by an enfeebled, vitiated state inpetent to sustain

igorous action, and

leaves the system to fall into disorder and

decay. The scrofulous contamination is variously caused by mercurial disease, low living, disordered digestion from unhealthy food, impure air, fith and fithy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children." The diseases it originates take various, names, according to the originate take. children." The diseases it originates take various names, according to the organs it stacks. In the lungs, Scrofula produces tabercles, and finally Consumption; in the glands, swellings which suppurate and become ulcerous sores; in the stomach and bowels, derangements which produce indigestion, dyspepsis, and liver complaints; on the skin, cruptive and cutaneous affections. These, all having the same origin, require the same remedy, viz., purification and invigoration of the blood. Purify the blood, and these dangerous distempers leave you. With feeble, foul, or corrupted blood, you cannot have health; with that "life of the fiesh" healthy, you cannot have scrofulous disease.

Ayor's Sarsaparills

Ayer's Sarsaparilla is compounded from the most effectual anti-dotes that medical science has discovered for this afficting distemper, and for the cure of the disorders it entails. That it is far supe-rior to any other remedy yet devised, is known by all who have given it a trial. That it does combine virtues truly extraordinary in their effect upon this class of complaints, is indisputably reven by the great multitude is indisputably proven by the great multitude of publicly known and remarkable cures it has made of the following diseases: King's Evil, or Glandular Swellings, Tumors, Eruptions, Pimples, Blotches and Sores, Erysipelas, Rose or St. Anthony's Fire, Salt Rheum, Scald Head, Coughs from tuberculous deposits in the lungs, White Swellings, Debility, Dropsy, Neuralgia, Dyspepsia or Indigestion, Syphilis and Syphilitic Infections, Mercurial Diseases, Female Weaknesses, and, indeed, the whole series of complaints, that arise from impurity of the blood. Minute reports of individual cases may be found in AYER'S AMERICAN ALMANAC, which is furnished to the druggists for gratuitous distribution, wherein may be learned the directions for its use, and son of the remarkable cures which it has made of the remarkable cures which it has made when all other remedies had failed to afford relief. Those cases are purposely taken from all sections of the country, in order that every reader may have access to some one who can speak to him of its benefits from personal experience. Scrofula depresses the vital energies, and thus leaves its victims far more subject to disease and its fatal results than are healthy constitutions. Hence it than are healthy constitutions. Hence it tends to shorten, and does greatly shorten, the average duration of human life. The vast importance of these considerations has led us to spend years in perfecting a remedy which is adequate to its cure. This we now offer to the public under the name of ATER'S SARSAFARILLA, sithough it is composed of on the four corruptions that rot and fester out the four corruptions that rot and fester out the four corruptions that rot and fester that he was the first corruptions that rot and fester that he was the first corruptions that rot and fester that he was the first corruptions that rot and fester that he was the first corruptions that rot and fester that he was the first corruptions that rot and fester that he was the wa in the blood, purge out the causes of disease, and vigorous health will follow. By its pecu-liar virtues this remedy stimulates the vital functions, and thus expels the distempera which lurk within the system or burst out on any part of it.

on any part of it.

We know the public have been deceived by many compounds of Sarsaparilla, that promised much and did nothing; but they will neither be deceived nor disappointed in this. Its virtues have been proven by abundant tiple and there remains no question of dant trial, and there remains no question of its surpassing excellence for the cure of the afflicting diseases it is intended to reach. Although under the same name, it is a very different medicine from any other which has been before the people, and is far more effectual than any other which has ever been available to them.

I am now a healthy man, with a large cavity in the middle lobe of the right lung, the lower lobe very much heba ized and complete adhesion of the pleura. The left lung is sound, and the upper lobe of the right lung is in a tolerably healthy condition. The great reason why physicians do not cure consumption is they try to do too much: they ever medial.

fieshy. L can produce a number of my old consumptive patients now enjoying good health, weighing nearly 200 pounds. I will conclude weighing nearty 200 pounds. I will conclude by relating three cures I have made in New York, and which are all different, and wish any one who leels any interest in the matter to visit them. First is Mrs. Farlow, residing then at No 107 Houston street. Her husband GREAT SUCCESS ATTENDING IT!!! then at No 107 Houston street. Her husband called upon me at my rooms, 32 Bond street, and wished me to call and see her. He said I could do no good; that he had had all the best medical/attendance, and all said she was too far gone with Consumption to be cured; but she had heard or some great cures I had made, and he desired to gratify her wishes.— I called, and found her lying confined to her bed in the last stage of broughful consumption, and without doubt must have died soon. I examined her lungs, found both bronchial tubes very much affected, but no cavifies had tubes very much affected, but no cavifies had formed, her cough was very sowers, the spithox was half full of thick pur. Pulse 140, Ilcus swollen very much; and worse than all, she had chronic diarrhus. Her bowels had been movet eleven times that day. I told her that she had lungs enough to be cured, but that this diarrhus had been of long standing, and her stangard was in such an algeratoric on. and her stemach was in such an alcerated condition that I was afraid nothing could be done. She insisted I should try and do what I could

She was low-spirited, skin sallow, tongue content od, bowels costive, no appetite, and fast sinking into the grave. The said tumor had been running over fourteen years. I gave her Scrup, Tonic and Phils, and told her to take them just as the directions were printed. She cannot hack to my rooms, 32 Bond street, in two came back to my rooms, 32 Bond street, in two week', somewhat better; her tongue had begun to clean a little around the edges, her skin whiter and her eyes brighter, and the timor discharging very offensive matter, much faster than it had ever done before. She kept gradually impoving, and in about two montus she came to my rooms very much frightened, saving that the tumor had nearly stopped run-ning, and was healing up, and that every doc-ter had to deer that if it ever healed it would cause her death. I told her that the disease had all left her system, and nature would heat the alore up. They are now heated, and have been force out a year, and she is as hearty and robust a worn in as you will find in a day's gealk. She is glid for any one to call on her, and takes great pains to visit any one that she hears has anything like her case, and tries to

get them to come and see me.

The next case is Miss Scotleld, from Stamford, Come. Mrs. Bartholomew got her down to see me, and she has been ever since at her house. When she first came to my mouns, she was much enactated with a discressing cough New York. We intered at, March 39, '64.

This was my notive place, where all my family lived and helder to Consumption. Dr. Thornton who attended my latter in his list illuses was called, and gave me one week, to fix ub an affairs. He had scendill my family go that way, and thought I was to go, toor. Then I heard of the remedies I move offer to the public, which cited me. It seemed to me that I rould feel them penetrating my whole system.

They soon ripened the matter on my lungs, and I would spit off more than a nint of offensive yellow mitter every morning. As soon as that began to subsite, my cough, fever, purning the sweats—all began to leave me, and my mppeine became so great that it was with difficulty I could keep from cating too much.
