WONDERFUL REFECT OF BAIN AP-TER A DROUGHT.

The past summer bus demonstrated what can be done by rain. In the middle of the season. and after, the rains commenced. The crops had suffered from the drought-and the fall crops, such as pointnes, buckwheat, &c., were pressures; potstoes are a success, greater than SL, INSECTS ON PLANTS, FOWLN, ANI- public's patronage, promising to spate no ef-formany years; buckwheat the same. But miracles have been accomafforded every time sufficient moisture for the most rapid growth. Now, there is no doubt but that drought had prepared the ground for this rapid growth, either by hear changing the chemical properties of the soil and the manare in it, or the absence of water having an effeet, or some other iquison. It is known that Der See that "Costan's" name is on each Box the pain which tails after a drought has more Bottle and Finsk, before you buy. fertility than before. This is in consequence of the accumulation of fertile gases it. the 1-

mosphere, which rain carries down. Another thing, and that important. We have found that soil made mellow, deep, is still better against both wet and drought. Hence the use of sub-soil-ploughs; hence the use of deep ailings. The whole secret, then, as we have more thoroughly learned this season than ever, is deep, tich, mellow tillage. We have satisfied many people the past season-which was an anusually dry one in many parts of the counsty-of this one thing-this benefit. Need we take the reader into the field? Or will he take pains to satisfy bimself? Keep the cultivator

going ; you cannot stir the soil too much -- the more the better, and the richer the better. This is the grand preventive sgainst drought, and it is the only practicable oue for a farmer. We must look to this thing, for drought is our

great enemy in the West. By guarding against It in the way specified, we not only prevent it, (in its effect,) but at the same time scently improve the soil, both in fertility and easy working, as well as in killing the weeds. , We shall continue to enforce this subject. Its observ-ance is north millions to each state --- Valley Farmer.

The Chicago Tunce has the following cheerful account of the condition of affairs in Kentucky :----

Kentucky is having a good time in her position between the upper and nether millstones of federal and rebel armies. Breckinridge of federal and rebel armies. Breekinning raided through the State, carrying off every-thing that he could flud wagons to transport. Burbridge followed, and banished everybody who had any property, and confiscated their personal possession to his own use. Erysipelas-General Debility-Purify the

Elood. From Dr. Rold. Sawin, Houston St., New York. "DB. Arth. I acidom fail to remove Eruptions and Scroyulous Sores by the persectring use of your SARSAFARILLA, and I have just now curred an attack of Milignant Erupipelus with it. No alterative we possess equals the SARSAFARILLA you have sup-piled to the profession as well as to the people." From J. E. Johaston, Esg., Wakeman, Okio. "For twelve years, I had the yellow Erysipelas on my right arm, during which time I tried all the celetificted physicians I could reach, and took hun-dreds of dollars worth of medicines. The ulcers were so had that the cords became visible, and the ductors decided that my arm must be amputated. I began taking your SARSAFARILLA. Took two bot-ties, and some of your Pitts. Together they have eared me. I am now as well and sound as any body. Being in a public place, my case is known to every body in this community, and excites the wooder of all."

St. Anthony's Fire, Rose, Salt Rheum, Scald Head, Sore Eyes.
From Harrey Sickler, Lag, the able editor of the Tranhannock Democrat, Pennyltania.
"One only child about three years of age, was stacked by jimples on his forchead. They rapidly spread until they formed a loathsome and vurdent sure, which covered his face, and actually blinded his eyes for some days. A skilful physician applied histate of silver and other remedies, without any apparent effect. For fifteen days we guarded his hands, less with them he should tear open the fea-tring and corrupt wound which covered his whole face. Having tried every thing cles we had any hope from, we began giving your SARSAPAHILLA, and applying the iolde of potsh lotton, as you direct. The sore began to heal when we had fuished the second. The child's cyclashes, which had come out, grew again, and he is now as healting and faished the any other. The whole neighborhood prodicted that the child must die."

Syphilis and Mercurial Disease.

From Dr. Hirom Sloat, of St. Louis, Missnuri. "I find your SARSAFARILLA a more effectual remedy for the secondary aymptoms of Synhilig and for ayphillitic disease than any other we possess. The profession are indebted to you for some of the bost medicuses we have."

Prom A. J. Freuch, M. D., an eminent physician of Lawrence, Musz., who is a prominent weaker of the Legislature of Musachusetts.
"Dr. AVER. My deer Sir: I have found your SursarARILL an excellent remedy for Syphilis, both of the primary and secondary type, and elfo-thal in some cases that were too obstinate to yield to other remedics. I do not know what we can em-ploy with more certainty of success, where a power-fal alternative is required."

fai alterative is required." Mr. Chas. S. Fan Lice, of New Branswick, N. J., had dreadfai alters on his legs, caused by the abuse of mercury, or mercurial discate, which grow more and more aggravated for years, in split of every remedy or treatment that could be applied, until the persevering use of AYER'S SARSAPARILLA releved him. Fow cases can be found more invectorate and distressing, than this, and it took several dozen bottles to cure him.

Leucorrhosa, Whites, Female Weakness.

Leucorrhose, Whites, Female Weakness, are generally produced by internal Scrn/ulous U-crration, and are very often cured by the alterative effect of this SARAFARILLA. Some cases require, however, in aid of the SARAFARILLA, the skilful application of local remedies. From the well-known and widely-celebrated Dr. Jacob Morrill, of Chacismoni. "I have found your SARAFARILLA an excellent elterative in diseases of females. Many cases of Irregularity, Lencornhous, Internal Uncerstion, and local debility, arising from the secrofalous distheris, have yielded to it, and there are few that do not, when its effect is properly aided by local treatment."
