I am now a healthy man, with a large cavity in the middle lobe of the right lung, the lower lobe very much hebatized and complete adhesion of the pleura. The left lung is sound, and the upper lobe of the right lung is in a follerably healthy condition. The great reacon why physicians do not cure consumption is they try to do too much: they give medicines to stop the cough, to stop chill, to stop night sweats, hectic fever, and, by so doing, they derange the whole digestive power, locking up the secretions and eventually the parties of John Culp, respectfully associated with him in business John S. I will conclude b) relating three cures I have made in New York, and which are all different, and wish any one who feels any interest in the matter to visit them. She camback to my rooms, 32 frond street, in two week's, somewhat better; her tongue had figgun to clean a little around the edges her skin whiter and her eyes brighter, and the tumor discharging very oftensive matter, much faster than it had ever done before. She kept gradually improving, and in about two months she came to my rooms very much frightened, saying that the timor had nearly stopped running, and was hedling up, and that every doctor had to'd her that if it ever healed it would cause her death. I told her that the disease had all left her system, and nature would heal the ulcer up. They are now healed, and have. been for about a year, and she is as hearly and robust a wom a as you will find in a day's walk. She is glad for any one to call on her, and takes great pains to visit any one that she hears has anything like her case, and tries to get them to come and see me.

The next case is Miss Scofield, from Stamford, Conn. Mrs. Bartholomew got her down to see me, and she has been ever since at her house. When she first came to my rooms, she was much emaciated with a distressing cough, spitting lirge quantities of blood. Lecamined her lungs with the respirometer, and in all my practice never found one with one lung so far gone and the other lung so sound. I could not and the afflicted know where and how they may be cared.
