# TERIOUS.

THE GREAT PLAGUE. THE BREAT FLAGUE. United States Treasury Notes, bearing seven variety of Dollector Draper, of New York, has issued United States Treasury Notes, bearing seven variety of CLOTHS, stringent instructions for the inspection of all and three teaths per cent. interest, per snaum, vessals that arrive in that city from any Rus- known as the

sian port where the plague is now raging .---This timely precaution is so wise and prudent These notes are issued under date of June that it cannot fail to be immediately followed 15th, 1865, and are payable three years from by all revenue officers who may bave it in their that time, in currency, or are convertible at power to act in the premises. Independent of the option of the holder into the local danger resulting from the contact with Russian vessels, the New York World thus properly considers a more general and more formidable one in the moral and mental con-

dition of the times : The researches of modern medical science taxation adds from one to three per cent. more, into the origin and history of the great pesti- according to the rate levied on other property. lence of the middle ages conclusively prove that 'The interest is payable semi-annually by couse the imagination has a very serious share in pons attached to each note, which may be cut the production of disease in individual cases. so the condition of what we may call the col- off and sold to any bank or banker.

lective moral entity of society materially determines the production and diffusion of epidemic disorders. The "dancing plagues" of the thirteenth and

fourterath centuries, in Europe, thus supervened apon the complete prostration of particular regions by war and famine, and by convulsions of nature. These strange disorders were propagated as upon the beams of the light and the

of men through the morbid excitement of their minds and their nervous systems. The terrible "Black Death" which five cen-

ruries ago swept over Christendom, destroying advance. This is in some countries, as in Italy and England, nearly one half the population, followed the most extraordinary cosmical convulsions of which we have any record. Destructive earth-guakes, floods and famines had succeeded each will make it the other for several years consecutively, and had GREAT POPLLAR LOAN OF THE PEOPLE. Billed the continent with want, mitery, and despair. The minds of men had been over-Siberis, made its first faci in Constantinople

and Greece, and thence traveled through Italy, Spain, France, Germany. England and Scan- command a premium, as has uniformly been dinavia, culminating in Russia three years of the case on closing the subscriptions to other ter its first appearance in Constantinople. | Loans. The disease which is now working so much | In or

Davoc in Russia and which has already appear-ed in its weetward course on the frontiers of tion of the country may be afforded facilities Germany, seems to have many analogies with for taking the loan, the National Banks, State other articles in this line-all reseived in the this frightful "Black Death" of the fourteenth Banks, and Private Bankers throughout the best order end of the taking the loan. In order that citizens of every town and seccentury, and to have been imported like that from the steppes of Mongolia. That the "Black Desth" was conveyed by contagion we know, country have generally agreed to receive sub- us a call, in Bultimore street, nearly opposite scriptions at par. Subscribers will select Death" was conveyed by contragion we about, their own agents, in whom they have confi- other country produce-for which the highest but we know also that contagion was detical inter own agents, in which they neve con-of the causes and means of its propagation. deace, and who only are to be responsible for "It was consequence," says the ablest Ger-ithe delivery of the notes for which they re-man historism of the malady, "of violent com-motions in the earth's organism, if any dis-prive orders. JAY COOKE, lace, and who only are to be responsible for cash price will be paid.

Une spring set a thousand others in motion tor powerful of all was contagion; but in the most. National Bank of Gettysburg, and the Gettys-distant countries, which had scarcely yet burg National Bank. [Feb. 27, '65. 3m] heard the echo of the first concursion, the peop ple fell a sacrifice to organic poison, the unmely off-pring of vital energies thrown into

violent commotion:" It is a noticeable circumstance, in this connection, that the increasing frequency of earthquakes and other phenomena of cosmical ag- | tation has attracted the attention of the scientific world during the past five years, and has given rise to a great deal of varied speculation as to its causes and consequences. So far as we in America are concerned there

can be no question that the agitation and eftervescence of men's minds, the general nervous and moral "exaltation" of the country in consequence of the tremendous svents of the past four years must be regarded as dangerously predisposing us to extraordinary epidem-

ics. The fearful "sweating sickness" of 1485, we are told, made its appearance not without great and general premisory events which, for a survive of years, imparted to the people of kug. land a susceptubility to dangerous and unusu-al diseases. If we take into account the general depression of the popular mind in conse-quence of the sanguinary civil wars of the red and white roses we may readily conceive that it would require but a very slight impulse to excite a powerful commotion in the mysterions mechanism of the human body - Even uader ordinary circumstances wars beget pe-ti-

mings, as well as an assorted stock of READY lential disorders; how much more inevitably must these not have arisen in the then state of MADE MILITARY GOODS. affairs. The wasted and desolated condition of a

fall into disorder and decay. The scrofulous contamination is varionsly caused by mercurial disease, low living, disordered digestion from unhealthy food, impure air, filth and filthy habits, tood, impure air, fifth and filthy matts, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth reneration;" indeed, it seems to be the rod of Ham who says. "I will visit the injointies of the tethers upon their visit the iniquities of the tothers upon their children." The diseases it c iginates take various names, according to the organs it attacks. In the lungs, Scrofula p. oduces tubercles, and finally Consumption; in the glands, swellings which suppurate and become ulcerous sores; in the stomach and bowels, derangements which produce indigestion, dyspepsia, and liver complaints; on the skin, eruptive and cutaneous affections. These, all having the same origin, require the same remedy, viz., purification and invigora-tion of the blood. Purify the blood, and these dangerous distempers leave you. With feeble, foul, or corrupted blood, you cannot health; with that, "life of the flesh" healthy, you cannot have scrofulous disease. Ayer's Sarsaparilla

is compounded from the most effectual antidotes that medical science has discovered for this afflicting distemper, and for the cure of the disorders it entails. That it is far superior to any other remedy yet devised, is known by all who have given it a trial. That It does combine virtues truly extraordinary in their effect upon this class of complaints, is indisputably proven by the great multitude of publicly known and remarkable cures it made of the following diseases : King's Evil, or Glandular Swellings, Tumors, Eruptions, Pimples, Blotches and Sores, Erysipelas, Rose or St. Anthony's Fire, Salt Rheum, Scald Head, Coughs from tuberculous deposits in the lungs, White Swellings, Debility, Dropsy, Neuralgia, Dyspepsia or Indigestion, Syphilis and Syphilitic Infections, Mercurial Diseases, Female Weaknesses, and, indeed, the whole series of complaints that arise from impurity of the blood. Minute reports of individual cases may be found in Aven's AMERICAN ALMANAC, which is furnished to the druggists for gratuitous distribution, wherein may learned the directions for its use, and some of the remarkable cures which it has made when all other remedies had fuiled to afford relief. Those cases are purposely taken from all sections of the country, in order that every reader may have access to some one who can speak to him of its benefits from personal experience. Scrofula depresses the vital energies, and thus leaves its victims far more subject to disease and its fatal results than are healthy constitutions. Hence it tends to shorten, and does greatly shorten, the average duration of human life. The vast importance of these considerations has below a production of the second determined and below to another the second determined and the second below to the second determined and the second determined an led us to spend years in perfecting a teniedy which is adequate to its cure. This we now offer to the public under the name of Alla's SARSAPARILLA, although it is composed of ingredients, some of which exceed the best of Sarsoparila in alterative power. By its aid you may protect yourself from the suffer-ing and danger of these disorders. Purge on the foul corruptions that rot and fester

in the blood, purge out the causes of discuse, and vigorous health will follow. By its pecu-liar virtes this remedy stimulates the vital functions, and thus expels the distemptres which lurk within the system or buist out on any part of it.

We know the public have been decrived by many compounds of Sartaparilla, that promised much and did nothing; but they will neither be deceived nor disappointed in this. Its virtues have been proven by abundant trial, and there remains no question of its surpassing excellence for the cure of the afflicting diseases it is intended to reach. Although under the same name, it is a very different medicine from any other which has been before the people, and is far note effectual than any other which has ever beca evailable to them.

Dust received a large and beautiful assort-ment of Photographic Albums, which we offer below city prices. TYSON BROTHERS. Dec. 14, 1868. This Heuse is on a direct line wetween the horizon control and Baltimore and Ohio Bail-road Depots. It has been refitted and com-fortably arranged for the convenience and the entertainment of guests/ Oct 31, 1864. If

In poor, low-spirited animals, it has the most beneficial effect.

The use of them improves the wind, strength-ens the Appetite, and gives to the Horse a fine, smooth and glossy skin—thus improving the appearance, vigor and spirit of this noble animal.

FOUTZ'S

These Powders

will strength-en the Stomach

cleanse them from offensive

matter, and

FOR MILCH COWS.

-----

The property this Powder possesses in in-creasing the quantity of Milk in Cows, gives it an importance and value which should place it in the hands of every person keeping a Cow. By actual experiment it has proven that it will increase the quantity of Milk and Cream twenty per cent., and make the Butter from and saveet. In fattening Cattle, it gives them an appetite, loosens their hide and makes them thrive much faster.

HOGS. In all Diseases of in all Diseases of the Swine, such as Coughs, Ulcers in the Lungs, Liver,

the Lungs, Liver, &c. By putting from half a paper to a paper of these Powders in a bar-rel of Swill, the above Diseases can be cured or entirely pre-vented. By using these Powders the Hog Cheirs can be prevented Cholera can be prevented.

Price 25 cts. per Paper, or 5 Papers for \$1. PREPARED BY

S. A. FOUTZ & BRO., AT THEIR WHOLESALE DRUG AND MEDICINE DEPOT, No. 116 Franklin St., Baltimore, Md. For Sale by Druggists and Storeksepers throughout the United States.
