A correspondent of the New York Herald who has had an interview with the cobel General Lee, gives the following as his (Lee's) opinion of peace two years ago.— We publish it as another proof of the correctness of Democratic teachings. Their advice has always been that terms, reasonable and explicit, should be stated and confirmation. Had such a course been pursued, according to Lee's testimony, the loodiest half of our struggle would have

Tun peculiar taint or call SCROFULA lurks multitudes of men. It either produces or is produced by an en-feebled, vitiated state that fluid becomes in-

competent to sustain the vital forces in their vigorous action, and leaves the system to decay. The scrofulous contamination is va-riously caused by mercurial disease, low living, disordered digestion from unhealthy impure air, filth and filthy habits, the depressing vices, and, above all, by the venercal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children." The diseases it originates take various names, according to the organs it attacks. In the lungs, Scrofula produces increles, and finally Consumption; in the glands, swellings which suppurate and become ulcerous sor s; in the stomach and bowels, derai gements which produce indigestion, dyspeps a, and liver complaints; on the skin, eruptive and cutantous affections. These, all having the same origin, require the same remedy, viz., purification and invigora-tion of the blood. Purify the blood, and these dangerous distriputes leave vot. With these dangerous distempers leave you. With

this afflicting distemper, and for the cure of the disorders it entails. That it is far superior to any other remedy yet devised, is known by all who have given it a trial. That it does combine virtues truly extraordinary in their effect upon this class of complaints, is indisputably proven by the great multitude of publicly known and remarkable cures it has made of the following diseases: King's Evil, or Glandular Swellings, Tumors, Eruptions, Pimples, Blotches and Sores, Erysipelas, Rose or St. Anthony's Fire, Salt Rheum, Scald Head, Coughs from tuberculous deposits in the lungs, White Swellings, Debility, Dropsy, Neuralgia, Dyspepsia or Indigestion, Syphilis and Syphilitic Infections, Mercurial Diseases, Female Weaknesses, and, indeed, the whole series of complaints that arise from impurity of the blood. Minute reports of individual cases may be found in Aven's Avenican ALMANAC, which is furnished to the druggists for gratuitous distribution, wherein may be learned the directions for its use, and some of the remarkable cures which it has made when all other remedies had failed to afford relief. Those cases are purposely taken from all sections of the country, in order that every reader may have access to some one who can speak to him of its benefits from personal experience. Scrofula depresses the vital energies, and thus leaves its victims far more subject to discase and its fatal results than are healthy constitutions. Hence it tends to shorten, and does greatly shorten, the average duration of human life. The vast importance of these considerations has led us to spend years in perfecting a remedy which is adequate to its cure. This we now offer to the public under the name of Alle's SARSAPARILLA, although it is composed of SARSAPARILLA, BILLOUGH II Is composed of ingredients, some of which seek of the best of Sarsaparilla in ulterative power. By its and you may protect yourself from the suffering and danger of these disorders. Purge out the foul corruptions that not and fester in the blood, purge out the causes of disease, and vigorous health will follow. By its peculiar virtues this remedy stimulates the vital furctions, and thus expels the distempers which lurk within the system or burst out on any part of it.

Ayer's Sarsaparilla is compounded from the most effectual anti-dotes that medical science has discovered for

by many compounds of Sarsaparilla, that promised much and did nothing; but they will neither be decrived nor disappointed at this. Its virtues have been proven by abundant trial, and there remains no question of its surpassing excellence for the cure of the afflicting diseases it is intended to reach, Although under the same name, it is a very different medicine from any other which has been before the people, and is far more effeetual than any other which has ever been
