Farmer.

For the Lewisburg Chr the Officers of the Society, are not farmers, year. silent in the Convention. Our farmers such place. have the mental ability, the time and the It shall be their duty to report, at the of gentlemen of other occupations.

What surprised me the most in connec-Capt, Jacob Gundy as a Vice President, board of managers. and insert that of a friend of his own Wir. VIII. - This constitution can only be alhim to be an worthy, intelligent, practical thirds of the members present. and experimental farmer, who does as in the District. If he does not know him, he was most ungenerous to attempt to cast a stigma upon him, by rejecting him as unworthy a place in an agricultural society. Capt. Gundy as a farmer is worth a regiment of Gen. Packers, and the Convention had the good sense to reject the General's attempt.

And this leads me to remark, that the Farmers must take hold of agricultural so cieties, or they will be managed by schemends. I have seen thorough Agriculturists who were not practical farmers; but it Fall. is the duty of Farmers to take the lead. In more than one instance, I have known agricultural societies to dwindle away and expire, for no other reason than that they were suffered to be conducted by persons not farmers themselves, and who (though sincere triends to improvement,) would make much better members than efficers. " A word (in season) to the wise is sufficient."

Feb. 1 1851. A MECHANIC. Constitution of the Centre County Agricultural Society.

We the undersigned in order to improve agriculture by attracting the attention, eliciting the views, and combining the efforts of individuals engaged in that pursuit in the good old Commonwealth of Pennsylvania. and aiming at the development of the soil, and so to promote the prosperity of all conselves into a society and for its government adopt the following Constitution:

"The Centre County Agricultural Socie. power, for which he has taken measures the border States, show the downward tenty," auxiliary to the State Agricultural So. to secure a patent. He places friction

which are injurious to husbandry to collect wheels. all foreign and domestic trees, shrubs, vines, plants, seeds, fruits, and grains which may to their growth and adaptation to our climate, and different kind of growth and tend to improve the agricultural and rural annual and special meetings and pass all in the manufacture of glass. needful rules and by-laws for the attainment of the end in view and as soon as its ACRICULTURAL FAIR .- The citizens of
