Panning and Currying

For grateful thanks, and hereby makes known that he carries on the business of Tanning and Currying, at the Old Stand. Determined not to be outdone in the manufacture or finish of his work, he is bound to have the best workmen and materials, and to treat those who have so liberally patronized (as well as those also who shall be pleased to patronize him) with that attention which he hopes to insure him a full share of public patronage.

All kinds of Produce taken in exchange. Hides and Bark not refused, for which the highest market price will be paid in cash or in exchange for leather.

L. STERNER, March 25, A. D. 1850.

IT IS A FACT,

One consideration, that no Miller can make good clean flour without he has good clean wheat. I suppose you wish to know the remedy. I tell you—it is to get one of Messrs. Giddes & Marsh's Scourers, or Smut Machines. He being an old, practical and experienced Millwright has invented, got up and put in successful operation the best Wheat Scourer now in use. Any person ordering a machine and afterwards finding that it does not prove to operate as represented, there shall be no sale, as these machines are to be warranted good. Further recommendations are thought unnecessary. He is now having a supply made at Lewisburg, by Messrs. Giddes & Marsh. Orders for machines, or letters of inquiry, will be promptly attended to. Machines will be sent and put to all orders. Address J. BERGESSER, Lewisburg, Union Co. Pa. Sept. 1, 1850.

ANOTHER SCIENTIFIC WONDER!

PEPSIN: THE true DIGESTIVE FLUID or GASTRIC JUICE—a great Dyspepsia Cure!

Prepared from Rennet, or the fourth stomach of the Ox, after directions by Baron LIEBIG, the great physiological chemist, by J. S. Houghton, M.D., No. 11 N. 8th St. Philadelphia, Pa.

A truly wonderful remedy for Indigestion, Constipation and Debility, curing after Nature's own plan, by Nature's own agent, the Gastric Juice. It is a truly scientific discovery, and is the only fluid in water, can digest or dissolve Five Pounds of roast beef in about two hours, out of the stomach.

Digestion is chiefly performed in the stomach by the aid of a fluid which freely exudes from the inner coat of that organ, when in a state of health, called the gastric juice. This fluid is the great solvent of the food—the purifying, preserving and stimulating agent of the stomach and intestines. Without it there can be no digestion, no conversion of food into blood, no nutrition—but rather a foul, torpid, painful and destructive condition of the whole digestive apparatus.
